

# PIONEER REMOTE CONTROL

PUTTING YOU  
..IN CONTROL

Tuner, Double Cassette Deck and High Power Amplifier are all packed in one compact, high performance component - Syscom's Stereo Cassette Deck/Receiver. Made for serious music lovers, it delivers 125 w/ch continuous average power output, a 5 band graphic equalizer, a host of deck functions, and 24 random fm/am station presets. Put it together with a fully automatic turntable with DC-servo drive motor and stable hanging rotor, and a CD player with digital filter and you have true quality music sources. The remote control operates virtually all functions on the cassette deck/receiver and CD player.

**\$1378<sup>00</sup>**

With the SYSCOM X550M and A/V SR remote control on your side, total system command is right at hand— even for components that aren't part of the basic system! And still the SYSCOM X550M brings you the computer for Random Play, not to mention the SA-1480 high-power amp with 130 W continuous output power per channel and a 7-band graphic equalizer/spectrum analyzer, to shape frequency distribution any way you want. Of course, a Quartz-PLL Synthesizer Tuner and Double Cassette Deck are also included. And the cabinet has a luxurious wood grain finish.
