PRINCE EDWARD ISLAND, CHARLOTTETOWN.— The annual crop report for Prince Edward Island has been issued. Hay is double last year's yield and is the havelest crop ever known on the island. Wheat is average. Oats are the island. Wheat is average. Oats are fair but considerable damage has been done by the weet!. Corn is slightly better than average. Potatoes are 25 per cent. above the ordinary yield and of exemt. above the ordinary yield and of exemt. above the arminer of the ordinary islend and the varieties are fair; those sown late are good.

BOUTH DUMFRIES TOWNSHIP. — We have had a particularly good season for most kinds of crops. Threshing returns seen. Pall wheat is averaging all the acceptance of the particularly way from 15 to 35 bush an acre: barley about 35 bush bush and acre barley about 35 bush bush are not possible. Pattures have been splendid all consistent of the particular of the particular threship was proposed to the particular threship was not been presented as yet hence complete returns are not possible. Pattures have been splendid all.

The pastures furnished abundance of the particular par the any supplementary feeding as is unthe heatures furnished abundance
of fodder for the dairy cattle. We never
knew a better dairy season. Corn, though
it received a bad start owing to the wet
weather at seeding time, has since done
exceptionally well and the silos will be
well filled this fail. It will require ten
days or two weeks yet to mature.—A.B.

MIDDLESEX CO., ONT. APPIN.—Farmers are nearing the closing of a harvest which has been a succession of work since haying opened on June 18th. Scarcely has there been surcease sufficient to permit the preparation of the soil for the sowing of fall wheat. Many a piece of stubble land in course of preparation is awalting the enabling rain. The wheat crop and the corn crop of preparation is awaiting the enabling ratio. The wheat crop and the corn crop are pressing some questions upon us for any pressing some questions upon us for any pressing some questions upon us for any pression of the pr

RRUCE CO., ONT.

WIABTON—Harvest is over, after a rather anxious experience in the early part. What is probably the best crop. Oats promised well but the grasshopers two or three seedings left on the ground. Early sown peas were a good crop, probably 20 to 25 bush an arer. Barley was very fair. Cora is along fine where the mostly one of the missed it. Boots were mostly one of the missed it. Boots were mostly one of the missed it. Boots were notify one of the missed in grasshoppers of the missed in the probable that is the rotation till the grasshoppers of the missed in grasshoppers of the missed in the probable that the hoppers will not amount to anything next year. Poisoning with Paris green did not prove a success. Potatoes need rain. Gows are doing well considering the summer. The price is too low yet. Sheep have done well, and both sheep and lambs have brought good prices. Perhaps the class of live stock which has been dropped by the price is the second of the price is the class of live stock which has been dropped by the price is the price is the propers of the price is the price is the class of live stock which has been dropped by the price is the price is the price is the class of live stock which has been dropped by the price is the pric

of the grain is so short as to be very hard to bind, but, of course, none was the solution of the grain of th number will be here next season. The duck shooting season has opened, and the town "sports" and counter-jumpers are taking a holiday. As usual they are shooting the birds that have been feeding at the farmers' expense all summer. There seems to be no way for the latter to get even. The farms are large and to get even. The farms are large and by the time the farmer gets within range with his own gun, the chappies are out of reach.—S. J. N.

BUSINESS SYSTEMS SCHOOL.

We would direct the attention of our boys and girls to the unique advertise ment of Business Systems School, of Tornearly of Business Systems School, of Tos-ment of Business Systems School, of Tos-school although a comparatively new one, already tunds out preeminently among the business colleges of Ganada. Their course it a most thorough one and em-bodies the latest and best systems for of-fice use. Their students learn to do by deling and in the doing use the most mod-ded to the states of the systems of the few use. Their students learn to do by deling and in the doing use the most mod-ded to the states of the systems of the deling and in the doing use the most mod-les the first to mike a specialty of Loose Leaf Systems now so generally used in business offices. Their Shorthand-Type-writing Department, in charge of Mr.Chas. E. Smith and Miss Elliss Sott, needs no further recommendation. In the two type April last, Mr. Smith had be pleasure of hearing two of his pupils, Miss Rose L. Fritz, and Miss Elliss Sott, amounced as the winners in their respective events, th-one retaining possession of the champion. the winners in their respective events, the one retaining possession of the champion-ship cup and the other getting a hand-some gold medal. A handsome catalogue will be mailed free to all who cut out the advertisement. Fill in the name and address and mail it to them. Do it to-day.

The latest food to be introduced among Canadian farmers, is known as the Hex Canadian farmers, is known as the Hex and fattener for every animal on the farm. While this food is comparatively new to farmers in this country, it has been thoroughly tested and proved to be has yet been introduced. It is prepared from pure medicinal roots, barks, herbs, seeds and cane sugar. The pure food inspector that called at the schibit of this that the ingredients were nothing but pure foods. The manufacturers of Rex Sugar Food claim that by its use, a richer and larger supply of milk its obsiderable of the supply of milk room one to four quarts a day. There is nothing in it that is detrimental to the milk, butter, cream or cheese. Although this firm has only recently started to manufacturers in The latest food to be introduced am cream or cheese. Although this firm holly recordly started to manufacture Canada, the sale of their food has rendy approached nearly 1000 tons. A person desiring to obtain samples or find out exactly what ingredients a used, can obtain them by applying the Res Nugar Food Co., Weston, Ont.

prise winning sows. One of our sows, which has a promising litter sucking, is almost a full sister to the silver medal boar at Toronto this year, and is very closely related to the silver medal sow. We have a number of boars and sows three months old and upwards which we are pricing right.

HOLSTEIN FRIESIAN NEWS

The Canadian Dairyman and Farming World is the official organ of The Canadian Holstein-Friesian Association, all of whose members are readers of the paper. Members of the Association are invited to send items of interest to Holstein breeders for publication in this column.
