

THIS WASHER 'MUST PAY FOR ITSELF

A MAN tried to sell me a horse once. He said it was a fine horse and had nothing the matter with it. I wanted a fine horse, but, I didn't know anything about horses much. And I didn't know the man very well either.

So I told him I wanted to try the horse for a month. He said "All right, but pay me first, and I'll give you back your money if the horse isn't alright."

Well, I didn't like that. I was afraid the horse wasn't "alright" and that I might have to whistle for my money if I once parted with it. So I didn't buy the horse, although I wanted it badly. Now this set me thinking.

You see I make Washing Machines—the "1900 Gravity" Washer.

And I said to myself, lots of people may think about my Washing Machine as I thought about the horse, and about the man who owned it.

But I'd never know, because they wouldn't write and tell me. You see, I sell my Washing Machines by mail. I have sold over half a million that way. So, thought I, it is only fair enough to let people try my Washing Machines for a month, before they pay for them, just as I wanted to try the horse.

Now, I know what our "1900 Gravity" Washer will do. I know it will wash the clothes, without wearing or tearing them, in less than half the time they can be washed by hand or by any other machine.

I know it will wash a tub full of very dirty clothes in six minutes. I know no other machine ever invented can do that without wearing the clothes. Our "1900 Gravity" Washer does the work so easy that a child can run it almost as well as a strong woman, and it don't wear the clothes, fray the edges nor break buttons, the way all other machines do.

It just drives soapy water clear through the fibres of the clothes like a force pump might.

So, said I to myself, I will do with my "1900 Gravity" Washer what I wanted the man to do with the horse. Only I won't wait for people to ask me. I'll offer first, and I'll make good the offer every time.

Let me send you a "1900 Gravity" Washer on a month's free trial. I'll pay the freight out of my own pocket, and if you don't want the machine after you've used it a month, I'll take it back and pay the freight, too. Surely that is fair enough, isn't it?

Doesn't it prove that the "1900 Gravity" Washer must be all that I say it is?

And you can pay me out of what it saves for you. It will save its whole cost in a few months in wear and tear on the clothes alone. And then it will save 50 to 75 cents a week over that on washwoman's wages. If you keep the machine after the month's trial, I'll let you pay for it out of what it saves you. If it saves you 60 cents a week, send me 50c a week till paid for. I'll take that cheerfully, and I'll wait for my money until the machine itself earns the balance.

Drop me a line today, and let me send you a book about the "1900 Gravity" Washer that washes clothes in six minutes.

Please state whether you prefer a washer to operate by hand, engine, water or electric motor. Our "1900" line is very complete and cannot be fully described in a single booklet.

Better address me personally, E. A. Morris, "1900" Washer Company, 357 Yonge Street, TORONTO.

Our "Gravity" design gives greatest convenience, as well as ease of operation with quick and thorough work. Do not overlook the detachable tub feature.

Revival of English Royal Show.

EDITOR "THE FARMER'S ADVOCATE":

The recussitation of the English Royal Agricultural Society's Show can hardly fail to be the big agricultural event of the present year, if only because it will show that the first and foremost, as it is the most essential, of the arts of peace has once more revealed itself as it really is, rather than it has been confused in the cloudy atmosphere of political and (so-called) social discussion. The great merit of our Royal Shows is that they really represent the great British agricultural industry in all its magnitude and all its comprehensiveness, so that even the "Prize-Sheet" of the 78th annual show which the Royal Agricultural Society of England will hold at Cardiff, from the 24th to the 28th of June next, is a better guide to what the industry is than anything we have had from our political friends during the past four and a half strenuous years of confusing advice, perplexing orders, and inept control. The "Prize-Sheet" is a closely-printed booklet of 92 pages, and it describes in detail how the large sum of £10,800 is to be distributed in prizes, in order to improve our agriculture in the details in which improvement is most possible and needed. Of this sum, the greater part comes from the Society itself; the other contributors being the breed societies, who give £3,547; the local Cardiff committee, who contribute £1,035; and "other sources," with £505 10s.

There are a few classes for produce, but the bulk of the prizes are for live stock, and a glance through the prize-sheet will soon give a very good reason for this, as well as for the well-known saying of British farmers that "Live stock is the sheet-anchor of the farmer." The figures and facts relating to the distribution of the prize-money among British farm live stock are, of themselves, very illuminating on this point. In the figures which we give below it must be noted that when we speak of "classification" we indicate a section of the show devoted to either a breed or a utility which is complete in itself, and has anything, from five or six to a dozen or fourteen, classes in it.

The sum of £3,348 is allocated to horses, which are classified into 12 sections, with 110 classes; £2,959 10s. is allotted to cattle, which have 19 classifications, with 131 classes; £2,020 10s. is set apart for sheep, these having 26 classifications and 108 classes; while the sum devoted to pigs is £1,057 5s., divided into seven classifications and 44 classes. Horses, cattle, sheep and pigs embrace what we usually term the farm live stock proper, and this prize-sheet, therefore, shows us that of these alone we have 65 distinct breeds, every one of which is British, every one of which is pure, or is being improved by some recognized society for some point of utility; and all of which make up a wealth of animal industry that no other country in the world, whatever its area, can anything like approach.

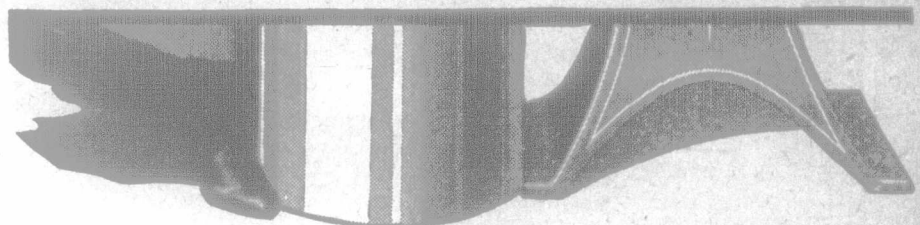

This is not all, for the Royal Agricultural Society also takes a hand in the improvement of the minor breeds of stock useful to the farmer or the small holder. For goats the prizes amount to £108, given in three classifications and 13 classes for poultry, £457 11s. is allocated to 25 classifications and 148 classes; while for rabbits £72 is allocated in 10 classifications and 24 classes. With regard to these minor species of live stock, it must not be forgotten that the Royal Agricultural Society has for many years eliminated the "fancy" element, and all its classifications are on lines of absolute utility.

Taking the major and the minor species of farm live stock, it will thus be seen that the Royal Show is thus representative of no less than 103 classifications of stock, all of which are not only of the highest standard of excellence at the present moment, but all of which are at the present time being developed and improved on lines of utility in the service of man.

ALBION.

The Man Who Buys a DE LAVAL Is Taking No Chances

MOST any kind of cream separator will do fairly good work the first few months, when it is new.

But if it is a cheaply made or inferior machine, after the first few months your trouble will begin.

And the worst of your experience with such a machine will not be the fact that it wears out quickly or that it runs hard, or that you are piling up repair expense, but that you are losing a lot of butter-fat that is worth 50 to 60 cents a pound.

And that is what you really buy a separator for—to save this valuable butter-fat.

Any time you buy a cream separator—no matter who makes it or what claims are made for it—that has not behind it a long record of satisfactory service, a record known to all, a record that is in itself a guarantee of satisfactory service, you are taking a gamble with all the odds against you.

Why take chances at all when you come to select a machine that may mean so much in increasing the profit from your cows?

There is one cream separator that has been the acknowledged world's standard for over 40 years. It's the one cream separator that is used by the creamerymen almost exclusively. Dairy farmers the country over know the De Laval and its sterling quality. Experience has shown them that

*It is the best cream separator that
money can buy*

Order your De Laval now and let it begin saving cream for you right away. Remember that a De Laval may be bought for cash or on such liberal terms as to save its own cost. See the local De Laval agent, or, if you don't know him, write to the nearest De Laval office as below.
