

THIS IS THE SHEET METAL AGE.

To make a factory, warehouse, barn, shed or outbuilding of any description, wind, water, snow, fire and lightning proof cover it with

Galt Corrugated Sheets

which are accurately pressed from the best and most durable British Steel it is possible to procure.

All corrugations are straight and true, assuring an accurate fit at both side and end laps without waste. Special hip and ridge covers make tight, neat joints at these points.

Where warmth is not important "Galt" Corrugated Sheets save three-fourths of the wood sheeting as well as considerable labor, and will give good service for a life time of at least fifty years.

It costs no more for a "Galt" Corrugated Sheet Steel Building than for a wood one. Which do you think is the better investment? Galvanized or painted material always in stock. Complete information in catalog "3-B."

WINDSOR SALT

THE BEST FOR CHEESE

Some cheese makers even say that they have got to use Windsor Salt to make good cheese.

For years, the prize winners at all the big fairs have used Windsor Salt.

It is found in practically all the cheese factories—large and small—from coast to coast. Farmers and dairymen depend on it because cheese makers know that Windsor Salt makes the best cheese and that's the salt they want. Don't you?

How Weather Changes Bring Death to Roofing

The life of Roofing is Saturation and Coating. Yet this vital part is sorely neglected by nearly every Roofing maker. The Basis of most Roofing, except Brantford, is wood pulp, jute or cotton-cloth—all short fibred. When it passes through "Saturatory Process" it does not become actually saturated—merely coated. This "Coating" is of refuse and quickly evaporates—wears off—exposing foundation to savage weather. It absorbs water and moisture, and becomes brittle, cracks, rots and finally crumbles. Even when new it softens under heat, sagging and dripping. But the Foundation of Brantford Crystal Roofing is a heavy, evenly condensed sheet of long-fibred pure Wool, saturated with Asphalt, which is forced into every fibre—not merely dipped. It is heavily coated with time-defying, fire-resisting Rock Crystals, which require no painting. This special Coating cannot evaporate and protects insides. Brantford is indestructible, pliable, tight, water, weather, spark, acid, alkali, smoke, fire-proof.

Brantford Roofing

cannot absorb moisture, freeze and crack in cold weather, or become sticky and lifeless in hot weather. Brantford Crystal Roofing is not the kind all manufacturers care to make, because it costs extra money, yet it costs you no more than short-life Roofing. Roofing Book and Brantford Samples are free from dealer or us. Brantford Asphalt Roofing, Nos. 1, 2, 3. Brantford Rubber Roofing, Nos. 1, 2, 3. Brantford Crystal Roofing, one grade (heavy) Mohawk Roofing, one grade only.

BRANTFORD ROOFING COMPANY, LTD., BRANTFORD, CAN.

For Drain Tile, Red and White Glazed Brick AND CEMENT CHIMNEYS, WRITE R. J. DOYLE, OWEN SOUND.

Use Plymouth Binder Twine, and *that* detail of the harvest will take care of itself.

One man says: "I used 200 pounds and threaded my machine when I started in; and cut my whole crop without a break or having to thread my needle any more."

Look for the wheat-sheaf tag on every ball. Get Plymouth Twine from the local dealer. Guaranteed.
