

Hupmobile

This car will add a new interest to farm life

The Hupmobile seems as though it were built to order for men like you who study their farm journals and are constantly seeking better methods and better materials to work with.

You demand a car that will carry you surely and economically.

Five reliability tours in all we entered last year, ranging in territory from the "Farmers Tour" in Texas to the "Winnipeg Glidden" in the Northwest, and in every one the Hupmobile made a perfect score. Last winter we competed victoriously with the best of foreign cars over the ice-bound hills of Sweden.

The Hupmobile is priced as low as its high class will allow. Free from all superfluous weight, it costs less in gasoline and oil and is more saving on tires than other cars of equal power.

Machinery values you have learned from the gas engine and the tractor. Thus

you will readily understand why the Hupmobile long-stroke motor gives a surplus of power. You will appreciate why the construction of the full-floating rear axle eases strain and wear and riding qualities. You will note that the extra size multiple disc clutch makes gear shifting easy.

The advantages of oil-tight, dust-proof parts completely enclosed will appeal to you.

Style and quality you ask for too; and again, we are glad to put the Hupmobile up to your judgment for your experience with machinery and materials make you a far better judge of these details than the average business man.

The Hupmobile will not only serve your business needs, but will drive monotony out of your lives and give you and your family the recreation that you need for a better day's work.

It will serve you faithfully at high efficiency for many seasons. The Hupmobile will endure long after it has paid you over and over again on your investment.

May we not put you on our mailing list for complete information about the Hupmobile? A post card will bring you a catalogue.

This Engine Runs on Coal Oil

Every farmer can afford an Ellis Coal Oil Engine. They give far more power from coal oil than other engines do from gasoline. They are safe, as well as cheap; no danger of explosion or fire.

The strongest and simplest farm engine made; only three moving parts: nothing to get out of repair. Anyone can run it without experience. Thousands of satisfied customers use these engines to grind feed, fill silos, saw wood, pump, thresh, run cream separators, and do dozens of other jobs. Cheaper than horses or hired men. Fill up the tanks and start it running, and no further attention is necessary; it will run till you stop it.

FREE TRIAL FOR 30 DAYS. You don't have to take our word for it. We'll send an engine anywhere in Canada on Thirty Days' Free Trial. We furnish full instructions for testing on your work. If it does not suit you send it back at our expense. We pay freight and duty to get it to you and we'll pay to get it back if you don't want it.

Absolutely guaranteed for 10 years. (Write for free catalog and opinions of satisfied users. Special offer in new territory.)

Name and Address _____
Dyer says: "A 10c Postage to me now may mean many a \$1 saving to you."

Your Soil Is Alive

To all intents and purposes, soil is alive. It breathes, works, rests; it drinks, and, most important of all, it feeds. It responds to good or bad treatment. It pays its debts, and pays with interest many times compounded. Being alive, to work it must be fed. During the non-growing seasons certain chemical changes take place which make the fertility in the soil available for the next season's crop. But this process adds no plant food to the soil. Unless plant food is added to soil on which crops are grown, unless the soil is fed, in time it starves. There is one best way to feed your soil. Stable manure, which contains all the essentials of plant life, should be spread evenly and in the proper quantity with an

I H C Manure Spreader

I H C manure spreaders—Corn King or Cloverleaf—are made in all styles and sizes. Sizes run from small, narrow machines for orchard and vineyard spreading, to machines of capacity for large farms. The rear axle is placed well under the box, where it carries over 70 per cent of the load, insuring plenty of tractive power at all times. Beaters are of large diameter to prevent winding. The teeth that cut and pulverize the manure are square and chisel pointed. The apron drive controls the load, insuring even spreading whether the machine is working up or down hill, or on the level. I H C spreaders have a rear axle differential, enabling them to spread evenly when turning corners.

The I H C local agent will show you all their good points, and will help you decide on the one that will do your work best. Get literature and full information from him, or, write the nearest branch house.

NATCO EVERLASTING SILOS

need no insurance—because they are permanent. They cannot burn; they will not blow over; last a lifetime.

Built of Hollow Vitrified Clay Blocks

The most lasting material known. Blocks are air-tight and moisture-proof. They are glazed and keep silage sweet and palatable. No hoops to tighten; no staves to paint. Never swells or shrinks. Attractive in appearance—a silo that will improve the looks of your farm.

Any Mason Can Build a Natco Everlasting Silo

Once up—it will last a lifetime without needing repairs.

We have a 50-page illustrated book on silos and silage.

Every stock owner should have it for its valuable

feeding information. It contains

articles by prominent writers, including Prof. Hugh G. Van Pelt.
