

Dominion Ammunition

TRADE MARK *Metallic and Shot Shells*

What to look for when buying ammunition

Accuracy, uniformity and reliability are features that can be determined only after exhaustive tests, unless you profit by the experience of seasoned hunters and choose Dominion Ammunition. More Dominion Shells are used in Canada to-day than all other makes combined. Made entirely in Canada by Canadians, for Canadians. Look for the "D" with shell and cartridge. On every box of ammunition manufactured by Dominion Cartridge Co., Limited 517 Transportation Building, Montreal

Send 10c. (stamps or coin) for 16 beautiful colored pictures of Canadian game.

For Walls and Ceilings

Bishopric Sheathing Board is a combination of lath, asphalt-mastic and heavy, rosin sized, high-grade cardboard. Walls and ceilings made of "Bishopric" are satisfactory in every way and your house will be warm in winter and cool in summer because the Asphalt-Mastic is absolutely moisture and temperature proof.

Lath side out "Bishopric" makes a back-ground for plaster that is without a creditable competitor. The laths are keyed by a patent process, each lath is undercut in a "V" shape and the plaster curls under and locks itself securely.

Bishopric will cut the cost of applying plaster, cement or Stucco, in half.

If your dealer does not handle our products we will gladly send you samples and a booklet showing houses built of our materials together with full details as to cost delivered at your home. 53

BISHOPRIC WALL BOARD AND SHEATHING

Good Land!

Good Crops

come from

Homestead Fertilizers

Homestead FERTILIZERS produce good crops because they contain the crop-making, available plant food to re-enforce the natural productiveness of the soil, and yield more profitable crops. For example, an ordinary fed cow, in good condition, will always give some milk, but good farmers have learned that by scientific feeding they can make her give more. Rations of special food for the cow are not patent medicines or stimulants, but the most nourishing food—the same as our fertilizers are food for the plants.

About seven million tons of fertilizers are used in the U.S. We supply a large portion of this from our factories—located from Maine to California.

We want agents for unoccupied territory under our Consignment Contract. Send your name and address. We are sure we can interest you.

THE MICHIGAN CARBON WORKS

HARVESTING PEAS

Solving the Labor Problem

The **TOLTON PEA HARVESTER** saves the work of four or five helpers. It can be attached to your mower in a few moments with a wrench, and it does your pea-harvesting in a clean, rapid and satisfactory manner. The peas are bunched automatically as they are cut, enabling you to do ten or twelve acres a day with ease. You should investigate.

We have a number of agents all over the Dominion. If there's none handy to you, write us for catalogue, which explains details of this profitable machine. **WRITE TO-DAY.**
