## THE SPEECH OF GENERAL CAVAIGNAC ABOLITION OF SLAVERY IN CAVENNE ON ITALIAN INTERVENTION.

General Cavaignac, the head of the French government, when recently called on to give some explanation of the action of the government on the Italian question, made the following speech, which the London Times, of August 25th, thus notices:

"On this ground he made, in answer to questions put to him with reference to the Italian mediation, the most important and successful speech he has yet delivered, and he encountered with great superiority, an opponent far more practised than himself in the war of words,-We have seldom read a more dexterious address, if, indeed, it had not higher merits than those of oratorical ingenuity, than this speech of the French government

from the Paris National, of August 22d:

It does not enter into my mind to address repreaches to any people, and though disposed to a pacific solution, I declare that these people have excited my admiration by their conduct and their energetic resistance. No one is ignorant in what a disposition of mind our declarations have been received in Italy. They were received with a generous sentiment which we could not blame; not only the nation which tent its assistance to Lombardy, but Lombardy itself has said that the wish to manage their own affairs themselves, to 'secure their liberty themselves. This generous thought is maintained till the present day. The Piedmontese army was in full retreat before the desire of interrention was manifested. I know that a country so susceptible on questions which touch its honor, (and I make it no reproach on account of this susceptibility, for it does it honor,)-and I know well, that often more courage is required to plead for peace than to plead for war. In the history of our country, I have seen more than one man who has gained a great name by war. I have, also, seen many who have ended obscurely, after having efficaciously servep the pacific interests of their country. As to me, I solemnly declare, I think that the Republic will be founded in France, that the republican education will be finished. only when the men whom chance calls to the head of affairs, shall know how to accept a modest policy, and to think less of themselves.
