TOPICS OF A WEEK.

The Important Events in a Few Words For Busy Readers.

CANADIAN.

Alexandria Bay wants water-works. Shad flies greatly trouble Brockville. Brantford has been busy at Midland. Acton is asking for better fire protection. They are fighting grasshoppers in Manitoba. Bush fires are raging on Manitoulin Island. London has a pest of white moths and snails. Mosquitoes have been seen recently near Port Severn. Onahwa will soon have a fine new public park. There is no longer a post-office at East Grafton. The electric light is being introduced at Eggleston. There has been a full harvest in the North-west. Whitepines are at work at Ellersville, near Gananoque. At Alexandria Bay there are 3,000 summer visitors. Starford's fair will be held September 24th and 25th. The new Government pier at Thebeson is being built. Lindsay has voted \$1,500 for an isolation hospital there. Work on Samtara's new hospital was begun last week. Many country mills have been stopped for want of water. Gray flocks are killing horses and cattle near the Redoubt. Farmers are raising more potatoes than usual this season. Smith's falls new post-office will be opened in a few days. Some Schomberg women parade the streets in male attire. There was a heavy frost in East Middlesex on July 15th. The London painters and decorators have organized a union. A gold medal buried for many years was unearthed at Vesper. Caledonia is moving to close all its stores at 7 p.m. daily. Ottawa motormen and conductors must establish a House of Industry. Kingston's water-works will have an additional pumping engine. Ex-Mayor James Cowan, London, has lost the sight of his left eye. Chatham will vote on a by-law to buy the water-works for \$145,000. Lambton County Government has voted to establish a House of Industry. Oil Springs wants a Government commission to inspect its finances. It is said that Barris's arduous well water is the best in the country. The reported murder of Mr. and Mrs. Webb, Muskoka, is contradicted. There are 50 applications for the vacant pulpit of Knox church, Mitchell. A frequently seen fooling through New York on fashionable rigs. The relations between himself and his cousin, William G. Vanderbilt, Jr., once cordial, are now somewhat strained. Jim Flak was worth about \$2,000,000 when he was killed by E.L. Stokes. The Dr. Flak widow is living in an humble frame house in the tenement district of Boston on an income of \$50 a month. And even though the miserly stipend is derived from her husband's estate, but from property owned by her father, she has not been allowed to see the money. Mr. Flak's estate has vanished utterly. The first Japanese Christian church in Toronto was dedicated in San Francisco last week. It belonged to the Methodist denomination, and had about three hundred members. The church organization was managed by the Japanese members with very little help or interference by Catholics. J. Sidney Villiers, a Chicago architect, has received from the De Beers brothers, the well-known diamond and gemstone dealers, a commission to build a new and splendid hotel at their country seat in Poland. Every part of the structure is to be completed in Chicago by the first of the year. The architect is to be the first instance in which Western ideas of architecture and comfort are adopted by any foreigner. A jury composed of the best men in the town of Perry, O., has just rendered a novel verdict. It was a case of drunkenness and disorderly conduct, and the verdict read as follows: "We find the defendant not guilty as charged, but we find the judge of this court guilty of the offence charged against the defendant, and that the defendant be assessed a fine of \$100.00." Since the verdict was entered the judge has been arrested for intoxication.

FOREIGN.

It is estimated that while the annual revenue of all countries of Europe are \$2,980,000,000, these expenditures are \$3,900,000,000.

A cloud burst destroyed recently half of the village of Olanesh, in Rumania. Many persons perished. Other villages suffered from the same calamity.

The Krueze Zetling, Berlin, announced Baron von Hammerstein was suspended from the editorship of that paper on July 4. Intense heat prevails throughout Italy, several deaths caused thereby have been reported. At Palermo the mercury registered 111 degrees in the shade.

The first act of the new Serbian Constitution was to release all the Radicals who were convicted of conspiring with the Royal family in connection with the Cabinet trial.

The general elections in Great Britain practically commenced Friday, when the return of thirty-six unopposed candidates, including thirty Conservatives, three Liberals and three Independents.

Another sanguinary raid by seventy-five Indians upon a settlement of ranchmen and cowboys in the Royal river valley, Mexico, has taken place. The Indians were fully armed and equipped, and made an attack at night. Many ranchmen, a cattleman, his wife, and three cowboys were killed.

"Diamond Charlie's" Case. Toronto, July 29.—The extradition proceedings in the case of Alie Rothchild, a woman, were held on Monday, owing to the absence of papers from Washington.

Cutworms and Birds. Where cutworms are unusually plentiful this season birds seem to be more numerous. The ruthless slaughter of birds may be in part account for the increase of insect pests. Indeed some species of birds are already extinct in many localities where they were formerly common. The farmers are naturally interested in protecting their bird flocks.

If you are making a specialty of some farm crop, give a portion of it extra care with a view of showing to the country this coming autumn. It will encourage agricultural society and give you a greater interest in better farming.

LARGEST IN THE WORLD.

New Steel Arch Bridge to be built at the Falls—Will Have an 830 Foot Span.

Niagara Falls, Ont., July 16.—The annual meeting of the Niagara Falls and Ontario Steel Bridge Company, which was held on both the American and Canadian sides of the river on Tuesday.

The matter of the new steel arch bridge was generally discussed, and the plans looked over. These call for an 830 foot span, which is said to be the largest single span in the world. The bridge will be built to the same grade as the present Suspension bridge in order to bring it to the level of the Canadian side.

President Smythe was seen after the meeting, and said: "We do not want to say much about the new bridge before we present. But you may say that we mean business. We recognize that there is a great future before Niagara Falls, and our companies intend to keep abreast of the times and to be prepared for the rapid growth of this territory on both sides of the river. Just when we will begin operations, I do not care just now to state, but you can say that the directors have authorized the advertising for bids for the masonry work. The commencement of the new bridge will be in the future.

It certainly looks as if this "near future" of President Smythe would be near at hand. The bridge will be built by the company intended to be all right before going ahead in this great undertaking. It is a matter of money, and there can be no risk or chance of mistake. It is the intention of the company to have the most perfect bridge in the world of its kind.

CRAIG'S ROAD DISASTER. The Coroner's Inquest Continued. Threatened Action Against the Railway.

Quebec, July 15.—The coroner's inquest in the Craig's Road disaster was continued at 10 o'clock this morning. Conductor Dionne was cross-examined, but not much new evidence was elicited. It was established that the train was approaching the station from the north, and that the engine and tender were on the west side of the track, as customary on approaching a station.

Dr. G. B. Magog, a passenger on the second train, swore that the train travelled very fast, and one of the train hands was killed as the train ran through to Lewis without stopping. The bell was rung at Somerset, where the train stopped.

Several of the injured have taken actions for damages against the railway company.

Chatham News. Chatham, July 13.—Word was received yesterday of the death of one of the Ontario Antiochian, of Tilbury North, on the lower line, about two miles south of Tilbury village, while two more of his cattle have been poisoned and are dying.

Three cattle belonging to Napoleon Dequette, and pastured on Richards' farm, were also dying yesterday from poison, the farm being covered with Paris green. It is also reported that half a dozen cattle belonging to Moffat & McGregor on the opposite side of the river, near the village of Dionne, are also dying.

In fact, it is said that most of the farms on the county line right through to Marsden sections, the cattle have been poisoned with Paris green. The whole section is up in arms over these deaths, and action upon the part of the Government and municipal authorities cannot be taken any longer.

Mr. McGlashan said that he had written to a reporter he stated that there is no doubt the animals have been poisoned by Paris green.

In the case of the charred human remains found in Raleigh bush, the coroner's jury at Berlin returned an open verdict, coupled with a request that the Ontario Government send a detective to search for the culprit, who is believed to have been a foul murderer.

A Bag of Silver at the Customs. Windsor, Ont., July 13.—A man representing himself as a collector of duties from Canada for Portland, with 35,000 packages of tobacco, were landed here on Wednesday by the schooner "The Breeze," which ran down at ten o'clock on Tuesday morning south-west-west of Beaver Island by the steamer "Lionel," from the Dominion Coal Co., from Sibley, also for Portland. The Landing took Captain Morris and the men, and immediately after the schooner was seen. When last seen the "Valorous" was full of water on her broadside. There was an instant of panic on the hall in the Nova Scotia Marine. The cargo is said to be uninsured. The cargo is owned by Messrs. Hurrell & Marshall, Portland.

Wattstown, N.Y., July 12. A shocking and cold-blooded murder was committed last night at Chappell Hill, thirty-five miles from the city. The victims are 16-year-old pretty Miss Ingersoll, and Nicholas E. Strife, a old man, who was a farm hand in the employ of the girl's brother. The murderer is John Hoch, aged 36, who was sentenced to seven years at Auburn for attempting to murder a young man in Denmark, Lewis County, several years ago. He fell in love with Miss Ingersoll, but his intentions were not reciprocal. Last Wednesday evening Hoch sneaked into the Ingersoll barn, and when Miss Ingersoll passed by first, he laid his hands on her neck. Strife was following the girl, and the murderer fired the second time, a substitute for ball-cartridges in a new material called gasoline. It is a kind of open canvas which holds its stiffness, and that is used next to skin fabrics.

Miss Helen Gould always buys the most expensive materials for gowns, but is usually dressed with Puritanical severity, whereas her sister, the famous countess, is very fond of showy costumes and makes heavy inroads on her enormous income to gratify her love of adornment.

That Tired Feeling. Is a common complaint and it is a dangerous symptom. It means that the system is debilitated because of impure blood, and in this condition it is especially liable to attacks of disease. Hood's Sarsaparilla is the remedy for this condition, and also for that weakness which prevails at the change of season, illness or life.

Hood's Pills not only, yet promptly and efficiently on the bowels and liver.

HOUSE OF COMMONS.

Ministerial Statement.

Mr. Foster said: I have very few remarks to make about the new hon. friend, (Mr. Landis.) Some difference arose in the Cabinet about the question of remedial legislation, chiefly a new law. Some of our colleagues thought it useless to prolong negotiations, or to enter into further discussions, and they resigned from the Government. The position of the Federal Government was that we would grant to Manitoba the amount of \$250,000 to arrive at an amicable settlement, and that no remedial legislation should be introduced by the Dominion Government.

I regard it as a pity that our colleagues find it impossible to see to it that the remedial legislation has not only been sent in but accepted. As to the principle, that remedial legislation was necessary, there was a divergence of opinion, but not as to the principle. With respect to other members of the Government there was a misunderstanding in respect of details, but this has been cleared up, and they remain with us.

Sir Adolphus Caron and Mr. Oulmont homologated Mr. Foster's statement.

Mr. Foster's Statement.

Mr. Laurier moved the adjournment of the House. He said there was one thing which bound the hon. gentleman of the Government together and that was the common office.

Mr. C. H. Tupper asked what it was that left the Opposition in a pitiable minority. Neither the Hon. Mr. Oulmont, nor the hon. gentleman stood upon the Manitoba school question today. There was no necessity regarding the position occupied by the Conservative party and the Government.

Mr. McCarty could not understand what this three or four days trouble had been about. The promise was that the majority of the Cabinet might have accepted something else than the remedial order. If that was so, then the hon. gentleman from Quebec, who was in a position of clear understanding with the colleagues. "Now we know where we are." It was perfectly hopeless to raise the question back to Manitoba.

Mr. Jones said he could foresee that there was now nothing to be gained by delay.

The motion was defeated by 116 to 68.

Mr. Mills moved: "That in the opinion of this House, section 60 of the B.N.A. Act of 1871, which prevents the removal of the Dominion-Governor of provinces for five years from the date of his appointment except for causes assigned and communicated to the House of Commons by message, was intended to prevent the undue influence of Federal Ministers in provincial affairs, and the message which has become prevalent of permitting Lieutenant-Governors to continue in office for long periods of time after the expiry of their commission, by which they become removable at any time without assignment of cause, is an abuse of authority calculated to impair the authority of the provinces of the Dominion."

Sir Chas. H. Tupper agreed that there was a question of time after the expiry of a fitting one for such a resolution. The House had yet to learn a case where in the slightest degree of abuse of authority, raised to the extended term of a Lieutenant-Governor's term of office.

Mr. McCarty urged that at the end of his term of five years the independence of the occupant was likely to be destroyed by his liability to removal.

Sir Adolphus Caron agreed that nothing was more destructive of independence than that gentleman should hold office at the will and pleasure of the Ministry of the day.

Mr. Wilson (Lanark), on the item of \$26,700 for weights and measures drew attention to a notice in the "Globe" by the farmers on account of the uncertainty of the law with respect to the system of purchasing weights. He urged that the country should be made aware of the fact that the weights should be made and by bushel measure should be made to agree or the Government should subsidize the bushel by weight.

Mr. Wood (Brockville) promised to communicate further with the different Boards of Trade, and if it was found to be in the interests of the country, to endeavor to move the hon. gentleman's wishes. The item passed.

Supplementary Estimates.

Mr. Foster presented to the House the supplementary estimates for the current year, made necessary on account of the change in the main estimates, and to provide for savings in the estimates in the Militia Department, where \$80,000 was struck out to drill active corps in the cities.

Facts and Figures.

A person who makes millinery a study says that the bonnets of the future are to be made of paper and that it is true this season's bonnets are practically the one of last year turned inside before. In order to make the bonnets suitable for different occasions it is of course necessary to disguise them with various sets of jeweled pins and buttons, so that they may be adapted to the market, the spots, the shopping expedition, visiting day or even a funeral.

"I'm afraid I shan't like this place," said the summer girl, as she surveyed the prospect-extended hotel, where not a sign was to be seen. "There's too much balcony and not enough bonnet."

Much of Mrs. John Jacob Astor's \$60,000 a year is expended for jewelry. Her collection of diamonds is one of the largest and finest in America.

A substitute for ball-cartridges in a new material called gasoline. It is a kind of open canvas which holds its stiffness, and that is used next to skin fabrics.

Miss Helen Gould always buys the most expensive materials for gowns, but is usually dressed with Puritanical severity, whereas her sister, the famous countess, is very fond of showy costumes and makes heavy inroads on her enormous income to gratify her love of adornment.

That Tired Feeling. Is a common complaint and it is a dangerous symptom. It means that the system is debilitated because of impure blood, and in this condition it is especially liable to attacks of disease. Hood's Sarsaparilla is the remedy for this condition, and also for that weakness which prevails at the change of season, illness or life.

Hood's Pills not only, yet promptly and efficiently on the bowels and liver.
