The newspapers declare that they are really of no practical value in rendering the issues more certain, because Greece is well aware that the agreement between the

A detachment of 600 Russian troops and a detachment of 700 British troops have arrived here.

London, April 9.—The Times this morning publishes the following dispatch from its Canea correspondent patch from its Canea correspondent: The Cretans are now massing around Kissamo. They have mounted four guns and intend to attack the fort, which is held by 150 Turks. Yesterday they wrote to the captain of the Austrian warship anchored in the bay, delaring that as the action of the international fleet had hitherto been hostile to them, they would repel forcibly any attempts of the warships to interfere with their designs at Kissamo. It is xpected, therefore, that the Cretans will direct their guns upon the warships if the latter open fire. It has been decided to remove the few Mohammedan families still there, and to blow up the blockhouses in the vicinity of the fort in order to prevent the Cretans from occupying them.

Having conducted for a number of years in this city business on the Cash and Credit system, we have resolved as a result of our experience in giving credit, that the cash system of doing business is the only satisfactory way, both to ourselves and patrons, and we take this means of notifying our customers, and the public generally, that in future we intend to conduct our business on a

a strictly CASH BASIS,

which will enable us to sell our goods 15 Per Cent. Cheaper than we we consider the close margin on which we have always done business, with an assured further reduction o 15 Per Cent. in price, we not only teel assured of the continued patronage of our old customers, but also of a considerable extension of our trade. There is nothing in the world like the omnipotent spot cash to bring prices to the lowest level, and the lowest level in prices in future will be found with us.
