Is One Symptom of Low Vitality and

Waning Nerve Power-- A Sign

That You Need Dr. Chase's

Nerve Food.

To the practical physician, skilled in the diagnosis of disease, there is much to be read from this symptom. A failing memory signifies that the nerve force is exhausted, and that the mind lacks energy to give attention. It points to low vitality, to the exhausted condition of the nerves, to thin, watery blood, and to weakness and irregularities of the organs of the body.

The person with the failing memory has sleepless nights, is nervous and irritable, suffers from nervous headache and dyspepsia, and gloomy, despondent feelings. He is weak, exhausted and run down, and may be fast approaching nervous prostration paralysis, epilepsy or insanity.

This wasting away of the newers.

This wasting away of the nervous energy of the body must be stopped, and stopped quickly if robust health is to be restored. Whatever the cause of this waskened condition, the cure is the same—restoration by the building up process—restoration by the use of Dr. Chase's Nerve Food.

This great blood-builder and blood vitalizer has proved wonderfully success and hundreds of pale, weak and nervous men and women. It promptly stops the wasting process, and aids nature in the restoration of health and strength.

Dr. Chase's Nerve Food is not a patent medicine, but the favorite prescription of the world's greatest physician, Dr. A. W. Chase. It is thoroughly up-to-date and scientific. It has proven its right to the high estimation in which it is held by physicians and people alike, by the marvellous cures which it has breught about. As a restorative it is unapproached by any preparation known to tran. Fifty cents a box, at all dealers, or many the complete of the contingent of operators will be women, and the remainder men.
