May be that the reason for his present hostility is the company's unwillingness to be coerced any more into indirect subsides. Our opposition to the persecution of the C.P.R. is based on The Telegram's foolishness. Certain wiseacres thought to construct an ideal viaduct. The World at once pointed out that the actual position of the Grand Trunk, which was already on the ground, rendered the scheme impracticable, by reason of the expense and compensation. The whole community is now, so far, on our side. The Viaduct scheme is dead and buried. Then came obstruction to the reasonable and hitherto unopposed occupation of the Pornised quick service to the Don by the C. P. R. The World saw in this step an unnecessary interruption of the promised quick service to Montreal, shindrance to the rutilization of the straightening of the river, and a general imstraint option of the revenue and a general imstraightening of the river, and a general imstraightening of the river, and a general imstraint option of the reasonable and inthered are received and pleasing.

The Telegram speaks of subsidized newspapers, referring to those which admit to their columns any contradiction or exposure of the absurdities, published in its columns respecting the alleged encroachments of the C.P.R. Wesley Simpson—Dear Sir, A remarkable experience prompts me to write concerning DR. HALL's 'Health Pampliet' purchased of you some time ago. The treatment unfolded therein is, to my mind, the greatest health discovery of the present century. It certainly has proved a great boon to me in a recent and severe attack of inflammation and hemorrhage of the kidneys, accompanied with piles of a painful character. The treatment acted like a charm in aliaying the inflammation, stopping the issue of blood and causing the piles to disappear almost immediately. The rapidity with which the inflammation was arrested and healthy action restored was simply wonderful. I do not believe that any system of drug treatment in a case so critical could possibly have accomplished a cure so safely, effectually and rapidly. The treatment has also cured me of a very distressing headache, periodical in character and threatening to become obstinately chronic. This unique home treatment is simply of priceless value, and should be known and practised by everybody, however slightly out of health, as it would not only excident the disease from the system, but prevent much signed to better advantage.

GEORGE J. It is not only a great comfort to me, but it enables nature to fulfil all her offices and do her work so thoroughly that it is the nearest approach yet made to a 'universal panacea.' I visited the Massachusetts General Hospital, but got no encouragement there. A specialist for nervous troubles was recommended to me and consulted, who informed me that I would require six months of treatment before I could expect to be any better. I came home, where I had about three quarts of medicine of different kinds, but having adopted your treatment I threw away these drugs and have not taken any medicine since. That was about five weeks ago. I have applied your remedy three times a week in the meantime and the result has been apparent from the very first. I am getting better rapidly. I have not felt as well for five years as I do now. I certainly feel like a new man. A SORENESS I HAVE HAD IN THE STOMACH FOR THE LAST EIGHT YEARS ENTIRELY PASSED AWAY WITH THE SECOND TREATMENT. WILLIAM B. ROSE, Esq.—Dear Sir: Yours of the 11th inst. received, and for reply to same say that I gave the testimonial printed in Dr. Hall's circular. The 1st of June last when I commenced using Dr. Hall's remedy I was not only afflicted with the piles, but had also dyspepsia and kidney disease, and had been then afflicted for many years. I feel now cursed of them all. The same remedy has perfected other cures of persons living here afflicted with various diseases. One woman here who has been bedridden and thought to be incurable of a complication of female diseases for more than eight years, is now up and going about from same treatment. It cures all chronic diseases—no failure here so far as tried and dozens of persons are now using Dr. Hall's hygienic remedy. Every family should be in possession of the doctor's pamphlet. Yours truly, GEORGE T. HALBERT, Attorney-at-law.

SUCH PERSONAL, POSITIVE, AND UNIMPEACHABLE TESTIMONY, deposed in

ary aliments ever offered to the public. As a preventive of disease it must be equally protent and efficacions. I would just say in conclusion that your treatment was not entirely new to me, as I had occasionally practised it in part for many years—but only in part—and never with the slightest idea of its far reaching physiological and theraputical effects so carefully traced in your forty-one years' experience, and also so clearly and lucidly unfolded in your Health Pamphlet, and, therefore, the little I had known and practised was quite useless for any purpose save the most transient results. This, I doubt not, will salo be the experience of many others. Another fact in favor of your treatment is that unlike all systems of drug medication—it is so consonant with nature that it cannot lose its specific effects on the system.

Yours very truly,

Toronto, July, 1890.

Note.—The remarkable bona fides of Dr. Hall's Hygienic Treatment without medicine, as proved so conclusively in my own expertence of well-known friends and others, has in also confirmed to me by the personal experience of well-known friends and others, has induced me to identify my name with the treatment and to become a general agent for its sale, though quite outside of my regular line of business. Nothing but intrinsic and proved merit could have induced such action on my part.
