ONE CENT. H.M.S. QUADRA ON A REEF. THE VESSEL IS NOT LEAKING AND THE SEA IS SMOOTH.

Gloicester Fishing Schooner Sailed at Cause-Alberta to be Divided-Increase of Fishes in the Gulf-International Postal Statistics-Risky Work in Georgian Bay-Ottawa Notes.

Ottawa, Oct. 27.-A telegram was received at the Marine Department Saturday from Victoria stating that the Government steamer Quadra had run on Portland reef, about eight miles east of Victoria, and had been wrecked. The vessel, and as the Quadra is not leaking and the sea is smooth, it is not anticipated that there will be serious trouble.

An Important Seizure. In July last the fishing schooner, J. M. Nicholson, of Gloucester, Mass., contravened the provisions of the contract of 1885, the Nicholson not having a license from the Dominion Government under the modus vivendi arrangement. Before she could be seized, she was sent into port of Cape Cod, Nova Scotia, where the contract was promptly taken possession of her. Captain Spain, commandant of the fisheries protection cutter, has been instructed to report on all the facts in connection with the case.

At the forthcoming session of Parliament it is the Government's intention to introduce a bill dividing Alberta into two electoral districts, with an additional representative in Parliament.

Increased Pack of Salmon. The fisheries department has received full returns of the salmon catches in the various rivers in British Columbia this year. The total figures are as follows: Fraser River, 347,346 cases; Skeena River, 67,000 cases; Bulkley River, 18,000 cases; other northern ports, 20,000 cases. The total output of the pack last year was 984,375 cases, and this year's pack is larger by 17,226 cases. It is estimated that \$500,000 to \$600,000 worth of salmon will be packed during the few weeks of the season. The number of fishermen this year is larger than in any previous year, and the number of licenses has been issued. The number of canneries in operation was also larger than in any previous year. For an year, as it is called, the result of the season's operations is considered highly satisfactory, and the pack has exceeded the expectations of the cannermen. It might, indeed, have been better if the pack had been prepared for a two weeks of fish which occurred at a time when some of the canneries were not in operation. The pack leads to the conclusion that the Fraser River hatchery has had considerable effect on the pack.

International Postal Statistics. The Post-office Department has just received the annual report of the Postmaster-General of the United Kingdom. From this document it appears that the latest postal international statistics give the number of letters, postcards and newspapers per head in the principal countries of the world as follows: New South Wales 103, United States 76, United Kingdom 71, New Zealand 61, Germany 57, Austria 51, Italy 44, Russia, British India 1.

The foregoing figures do not render justice to Canada. This country has a freer postal law than any other in the world. In the United States the cost for transmitting newspapers from the office of publication to the subscriber is 10 cents, but this rate is limited to the county within which the newspaper is published. In Canada the cost is limited to the carriage of newspapers through the mails. They are carried anywhere free, and an accurate estimate of the average of mail matter per head for the Dominion even higher than that of New South Wales.

Lake of the Woods Fisheries. The Fisheries Department is considering various schemes for improving the fisheries of the Lake of the Woods. Many complaints have been received that the fishery is over-exploited, and the Minister is to place the electric fishery in the hands of Canadian companies.

Risky Work. Mr. W. H. Noble, of the Marine Department, was recently dispatched to the Georgian Bay place to examine a new fog alarm and machinery on Double Top Rock, on the western side of the lake, where a lighthouse has just been built. Mr. Noble left Midland with a tug and scow carrying the machinery and crew, and a report which has just reached the department. It appears that considerable work has been done on the fog alarm, a sale having started up shortly after the fog alarm was put in place. The case was brought to the attention of the Minister, and a quantity of coal was ordered overboard.

Rewards for Saving. The Government has awarded a silver watch and cheque for \$25 to P. Murphy of Quebec, for his services in rescuing several parties from drowning on various occasions. Several other persons have also been awarded medals for their services in rescuing persons from drowning.

WAR TALK FROM LONDON. THE CHAPLEAU RUMOR AGAIN.

Statement that His Brother May Receive the Honorary Colliery-Inspector's White's Attitude.

Montreal, Oct. 27.-It is stated here in alleged that are almost semi-official that an attempt is being made to induce Lieut.-Governor Chapleau to again give his services to the Ottawa Ministry, and that one of the promises held out to the Governor is the collection of customs for the Honorary's brother, Major St. Onge Chapleau.

Mr. White's Attitude. There is nothing new regarding Mr. R. B. White's attitude except that it is reported his course is approved of by Hon. C. Wallace, and that the latter thinks the Government's refusal to open Cardwell as a slight upon the comptroller. A gentleman from Ottawa, who had seen Hon. Mr. Wallace and the impression was that the comptroller had fully assented to Sir Mackenzie Bowell that Cardwell would be all right if Mr. White were made comptroller. Another gentleman saw the Premier yesterday and was told that Mr. White would yet be appointed, but it is thought that offer it made now would be refused.

RENDERSHOTS' INSURANCE. Father of the Murdered Man Suing to Recover the \$11,000.
