

ton. A very distinct species (*Rhodora*, Jan., 1904) recently separated from *S. lucida* by Dr. Fernald. The capsules of this species do not dehisce until late in October or the beginning of November, while those of *S. lucida* do so in June.

*SALIX PURPUREA*. Rare. A shrub near Puslinch Lake, in the south of the county.

*SALIX SERICEA*. Our most abundant willow.

*SALIX PETIOLARIS*. Scarce.

*NYMPHÆA RENIFORMIS*. Common in Puslinch Lake.

*ADLUMIA CIRRHOSA*. Scarce. Rockwood, Ont.

*LEPIDIUM CAMPESTRE*. Scarce.

*LEPIDIUM INTERMEDIUM*. Our common *Lepidium*. I have not yet found *Virginicum* here.

*BARBAREA VULGARIS*. Scarce.

*ALYSSUM CALYCINUM*. Common along roadsides south of Guelph.

*AMELANCHIER CANADENSIS ROTUNDIFOLIA*. Common at Puslinch Lake.

*PHUS VENFNATA*. Rare at Puslinch Lake.

*VICIA TETRASPERMA*. Along the C. P. R. track near Killean, Ont.

*VIOLA SELKIRKII*. Rare.

*LYTHRUM SALICARIA*. Rare. At the west end of Guelph by the roadside.

*CONIOSELINUM CANADENSE*. Common in bogs and damp ground in the south of the county.

*ANGELICA ATROPURPUREA*. Common near Guelph and eastward in the county.

*MONOTROPA HYPOPITYS*. Scarce at Puslinch Lake.

*MONARDA DIDYMA*. Common along the Speed west of Guelph.

*VERBENA STRICTA*. Rare at Puslinch Lake.

*VIBURNUM CASSINOIDES*. Scarce.

*LONICERA OBLONGIFOLIA*. Rare at Puslinch Lake.

*LACTUCA HIRSUTA*. Common at Puslinch Lake.
