already two Presbyterian Universities, besides three Theological Colleges, most people will agree with the Committee that 'the carnest attention of the United Church should be given at the earliest possible moment' to the state of Education amongst us. 4th. The resolution accuses the Committee of recommending 'the adoption of a principle contrary to the views very generally held and advocated by the Canada Presbyterian Church in relation to University Education.' On this, the undersigned denies that any Presbytery has power to declare 'the views of the Canada Presbyterian Church' on this or any other question. only for the General Assembly to do so, and until that Court has declared its judgment, it is incompetent for any inferior Court to assume the power of speaking for all the rest. And further, it is unfair to represent the clause of the Committee's Report which refers to this matter, as if it recommended 'Sectarian Education,' which was done on the floor of the Presbytery, for Sectarian education, as understood amongst us, always includes State support, a thing which is not even hinted at by the Committee. 5th. The undersigned cannot but regard the resolution of the Presbytery as having a tendency to retard, if not to frustrate the contemplated. Union, which he verily believes would prove a blessing to the Churches.'

W. TAYLOR.
