

Order Paper Questions

In so far as the Department of Public Works is concerned: 1. None. However, the Department of Public Works shares with the Province of British Columbia on a 50/50 cost sharing basis the operations and maintenance of the Okanagan Flood Control Project. Expenditures: 1971-72, \$46,828; 1972-73, \$61,505; 1973-74, \$43,830; 1974-75, Estimated \$65,000.

2. None.

ATOMIC ENERGY CONTROL REGULATIONS—INSPECTION OF LICENSEES

Question No. 1,725—**Mr. Francis:**

How many licences issued by the Atomic Energy Control Board were reviewed for breaches of the regulations in that particular licence and what action, if any, was taken as the result of such a review?

Hon. Donald S. Macdonald (Minister of Energy, Mines and Resources): Atomic Energy Control Board reports as follows: There are currently approximately 3000 Atomic Energy Control Board licensees of which total 2900 are for radioisotope users and the remainder for other prescribed substances users and nuclear facility operators. The regulatory compliance performance of each of these licensees is reviewed continuously through a system which includes some or all of the following elements, depending upon the nature of the licensed use or operation. 1. Inspections. AECB-appointed inspectors make periodic and unannounced inspections of the premises of all licensed users and operators to determine that the terms and conditions of the licence and the requirements of the Atomic Energy Control Regulations are being complied with. In the case of nuclear power plants being constructed, tested, commissioned and in the early stages of operation, resident AECB inspectors are stationed at the plant.

2. Film Badge Monitoring. Licensees are normally required, as a condition of licence, to use a film badge service to provide a record of individual radiation exposures. Film badge results are reviewed and overexposure and chronically-high exposure cases are monitored.

3. Mandatory Reporting by Licensee. All licensees are required by the Atomic Energy Control Regulations to report unusual occurrences which did or could have resulted in a breach of regulatory requirements. These reports are investigated by AECB staff and/or advisers. Prescribed substance supplier and user licensees are required to submit periodic material inventory reports for review. Nuclear facility licensees are required to submit periodic safety performance reports for review.

4. Licence Renewal Reviews. All licences are issued for a limited term after a full review and evaluation of the detailed information submitted in support of a licence application. Similarly all applications for licence renewals are reviewed with particular attention being given to the past safety compliance performance of the licensee.

[Mr. Sharp.]

5. Monitoring and Review of Radioactive Effluents. All licensees are required to monitor and report releases of radioactive effluents. In some cases, these reports are audited by an independent survey conducted co-operatively by the federal and provincial departments of environment and health. In all cases, reports are made to the AECB for appropriate follow-up action. Actions taken as a result of such review procedures may take a number of different forms depending on the nature of the licensed use or operation and the nature of the regulatory breach. Such actions may include one or more of: (a) determination and ordering of corrective action (b) removal of over-exposed person from work areas involving significant exposure risk (c) amendment, suspension or revocation of licence.

BRANKO MILOŠIĆ

Question No. 1,860—**Mr. Cossitt:**

1. Did Branko Milosic enter Canada during 1962 and, if not, on what date did he enter Canada?

2. Has the RCMP ever conducted an investigation in regard to this person and, if so (a) on what dates (b) for what reasons (c) what were the details of the investigation?

3. What are the names of all persons who at any time made representations to the government on behalf of this person for purposes of his admission to Canada or for any other purpose and, in each case, what are the details of such representations?

Hon. Mitchell Sharp (President of the Privy Council): I am informed by the Departments of Manpower and Immigration and the Solicitor General (Royal Canadian Mounted Police) as follows: 1. Branko Milosic arrived in Canada on August 30, 1962.

2. No.

3. In accordance with the schedule for the destruction of files, the file concerning Branko Milosic has been destroyed. It is therefore not possible to respond to this part of the question.
