Mr. William de Leigh Wilson gave a most successful dance at the Metropolitan Assembly Rooms last night in honor of his two charming daughters, who received with him. Miss Edythe Wilson was in a beautiful pink gown with gold lace embroidery and roses, a pink and gold mount in her hair and a bouquet of yellow roses and lily of the valley. Miss Lella Wilson carried a large bouquet of violets and lilies with her smart frock of lavender charmeuse and white lace. A GORGEOUS EVENING WRAP.

Cloth of gold and cerise satin were the materials combined in this garment, which would make a noticeable spot of color on almost any group. The shorter length is new for this season, as are the sleeves, which taper quite sharply toward the wrists. The garment clings the figure closely at the hips, but is voluminous above, having wide revers, which can be worn closed or open. The fastenings are made of the gold cloth.

The Boy's Companions

"Girls are so much easier to manage than boys," I have heard, "you know where girls are, but you never know where boys are." Which is very probably why some mothers think boys hard to manage. They should know where their boys are; and if they would take half the trouble to follow them up that they give to their girls, they would learn much that mothers should know. This does not mean that boys are to be called to account for every hour they spend from under the maternal eye. If mothers and sons are on the right terms of intimacy they will want to talk freely of friendships and occupations; and the boys will come as naturally as small girls come to mothers with their feminine needs and interests.

The easiest method of cultivating such an intimacy is to begin at the beginning, when the boy is a baby, and not permit the intimacy to drop at any stage of the son's career. Mothers claim that this would be very easy if they were their sons' only companions, but what of the boys they play with, the people they meet, do they not always come between mother and son? The influence of the boys they play with is very strong, but it cannot be exerted to the exclusion of other influences if the only opportunity it gets is in school hours. It is in the play-time after school that this influence has most exercise; and the play should be under the mother's supervision.

I fancy I hear a murmur, if not of disapproval at least of dissatisfaction; isn't it enough to be tied down while the kids are babies, without having to stay at home to superintend their play after they have begun to grow up?

It may seem a wee bit hard to some, but then we are willing to put up with a whole lot of things to win the joy of perfect motherhood. And it is worth while to go without little good times now to experience later the wonderful good times one may have as the chum of a big manly fellow.

So with that reward to help you, stay at home now to watch your son and his companions. Let him choose his own associates, but let him understand that you want to meet them, every one. Perhaps when you were a youngster you remember always wanting to go to play at a certain house. One of your acquaintances, such a jolly home that you would rather play there than at home. Well, just remember that hard enough to resolve that if there is any running to be done it shall be to your boy's home; and that your child, when he is going to have such good times that all their playmates will want to come.

Set aside certain days when playmates will be welcome at it, if the visitors are usually on their best behavior, there are many little things that instill character and habits. The very fact that companions are to be admitted into the home makes children careful in their choice; so that rarely does the parent need to interfere.

There are two parts to the mother's responsibility: To judge; to choose; and to counterbalance by her personal influence any bad effects of these friends.

MRS. KELLEY HERE WEEK FROM TODAY

Will Lecture on "The Shopping Problem and the Wage-Earner" at Foresters' Hall.

Mrs. Florence Kelley, who is to lecture on "The Shopping Problem and the Wage-Earner" under the auspices of the club for the study of social science in Foresters' Hall on Tuesday night, Jan. 28, is the daughter of Judge Kelley of Pennsylvania, who was elected a member of congress in 1880 and from that time till his death in 1890, held office without interruption. He was for many years leader of the Republican party in congress and was one of the dominating figures in the Washington of those days.

Of Mrs. Florence Kelley, Mr. Paul U. Kellogg writes in The American Magazine: Mrs. Kelley is a graduate of Cornell. As a young woman she translated Engels' Conditions of the Working Class in England. In 1892 she became a resident at Hull House. During this time she was special agent for the bureau of labor statistics of Illinois in an investigation of the needle trades in the tenements of Chicago. In 1892 she was agent in charge of the Chicago division of the investigation of the slums of great cities for the department of labor at Washington and chief inspector of factories of Illinois from 1893-1897.

As secretary of the National Consumers' League since 1899 and as a

resident of the Henry Street (Nurses') Settlement, New York, Mrs. Kelley has in recent years served both the City of New York and the United States. She was one of the first advocates of a children's bureau at Washington and was influential in beginning a movement to remedy the congestion of population in New York. She was a colleague in the work of the Pittsburgh Survey. Her ideas have been set forth in her book "Some Ethical Gains Through Legislation" and in many such lectures as the one which she is to deliver within a few days in Toronto.

A Mild Remonstrance

Editor World: The rather pointed references to my work, in your issue of Saturday, and also of last Tuesday call, I think, for a mild remonstrance from me. One so intimately associated with Dr. Struthers as your correspondent, M.L.H., cannot be entirely ignorant of the fact that there is but one class for mentally defective children under the board of education, and that that class is mine. Pretended ignorance of this fact imparts a show of fairness to what are rather personal attacks.

I have been two years and a half engaged in this particular work in Toronto, with almost no encouragement except from grateful parents. Were it not for the gratitude and interest of these parents and the love of these unfortunate children, I should long since have given up in despair. Do not misunderstand me, I enjoy my work; I know the value of the work I am doing, but I am not ignorant of the strength of the forces arrayed against me, for while I de-
