

RE-OLD STAR FINANCES

A Record of the Property and Some Peculiar Features of its Management

OF STRATTON'S INDEPENDENCE

Sales of and Closing Quotations on Canadian Mining Stocks on Friday—Notes.

The Mining Investor, published in St. Paul, Minn., has a lengthy article in support of the independence of the Golden Rule mine and in condemnation of the two sets of management which have run the property. The investor says:

This mine, with a top-situated mill, having had its two years' development work ahead of the installation of the mill plant, produced sufficient bullion to enable the former management to pay \$50,000 in dividends.

The gold bullion produced out of the property, the investor says, will not be returned, but a certain individual, who has advanced considerable money for the development of this mine, must not only be reimbursed, but must be given an opportunity to make about 200 per cent. out of the mine.

It is not a difficult matter to get the action of the mine, when the big big suggest such a plan, and every man concerned in the history of this property is today well off.

How have they made it? If they knew anything about the business, they would not have done it. Whether or not the property would have been sold, the investor says, after having settled this important question, and having confidence in the further development of the property, they could have gone on to make the mine a success.

It is not a difficult matter to get the action of the mine, when the big big suggest such a plan, and every man concerned in the history of this property is today well off.

SUFFERED 15 YEARS

With Backache and Kidney Complaint, Doan's Kidney Pills Cured After Every-thing Else Failed.

Mr. Wm. Brundage, a highly respected resident of Jasper, Grenville Co., Ont., out of whom appears here, suffered all sorts of troubles for over fifteen years as a result of kidney trouble. So pleased is he at being cured by Doan's Kidney Pills that he has given the following statement of his case.

Mr. Wm. Brundage.

THE DOAN KIDNEY PILLS CO. GENTLEMEN,—I have been troubled with backache and kidney complaint for the last fifteen years, so bad at times that I could hardly walk.

I have taken almost everything I saw advertised for kidney trouble, but nothing seemed to do me much good.

A friend suggested that I try Doan's Kidney Pills. The first box gave me great relief, and the second box has completely cured me. I feel like a new man.

You are at liberty to use this in any way you think proper, and I hope it may be the means of inducing some sufferer to try Doan's Pills.

Wm. Brundage.

WAS NOT AT LIBERTY LONG.

John Quackenbush Escaped From the Police, But Was Re-Arrested Early Yesterday.

An alleged thief, who is known to the local police as John Quackenbush, escaped from custody Thursday night, and was not recaptured until an early hour this morning.

Quackenbush was arrested on suspicion of having stolen several pairs of boots, which he was carrying. On the way to the Wilson-Avenue Station with his prisoner Detective Forrest met Constable Frank Tripp, and asked him to take charge of Quackenbush, and have him locked up, pending an investigation into the supposed theft.

When the policeman was in the act of opening the door of the station the prisoner seized the opportunity to make his escape, and ran away. The officer followed, and, despite the fact that he threatened to use his revolver, Quackenbush kept on the run, and gained steadily on his pursuer, until he made his escape in the darkness.

The police of the various stations were notified to keep a sharp lookout for the fugitive, and the result was that Quackenbush was recaptured by Constable Crowe.

MARK TWAIN'S RICH SATIRE.

New York Has the "Most Fragrant" Municipal Government in the World—on the Limelight.

New York, Dec. 7.—Mark Twain, who responded to the toast, "Our City," at the annual dinner of the St. Nicholas Society last night, said that the city of New York was the most fragrant of the physical improvements of the Metropolis, especially of the street railways.

Twain said that the city of New York was the most fragrant of the physical improvements of the Metropolis, especially of the street railways.

A L A M S

The Niagara and Georgian Bay Mining and Development Company, Limited

Incorporated under the Ontario Mining Companies Incorporation Act.

Charter Granted October 17, 1900

Capital \$1,000,000

HEAD OFFICE ST. CATHARINES, ONT.

"NOT SUBJECT TO CALL."

THE DIRECTORATE.

PRESIDENT—GEORGE DAWSON, Contractor, St. Catharines, Ont.

VICE-PRESIDENT—BARNETT TUCKER, Merchant, Allandale, Ont.

SECRETARY—J. E. YARLEY, Barrister, St. Catharines, Ont.

THOMAS B. BATE of the firm of Taylor & Bate, St. Catharines, Ont.

H. GLASGOW, Physician, Welland, Ont.

D. W. ROSS, Merchant, Parry Sound, Ont.

W. T. MCNEIL, Broker, St. Catharines, Ont.

MANAGING DIRECTOR—GEORGE DAWSON.

BANKERS—The Bank of Toronto.

SOLICITOR—J. E. YARLEY, St. Catharines, Ont.

OFFICIAL BROKER—W. T. McNeil, St. Catharines, Ont.

NO PERSONAL LIABILITY

THE NIAGARA AND GEORGIAN BAY MINING AND DEVELOPMENT COMPANY has been formed for the purpose of working three valuable copper and gold mines in the Parry Sound district of Ontario.

The development work has been done. These claims are now mine and not prospects.

The experimental stage is past, and nothing remains to be done but to get out the ore and reduce it and put the product on the market.

The directors have offered to pay for all the claims and done enough development work to disclose a large body of ore on each claim. All the work is fully paid for.

No. 1—The Burns Lot

On this lot, four miles southwest of the Town of Parry Sound, and about one-quarter mile from the Canadian Atlantic Railway, and about two miles from the shore of Lake Huron, there is a large body of ore, and it can be made to pay nicely, even if a better ore should be found as depth is attained. There is no doubt but this is a very valuable property.

No. 2—The Christy Road

On this lot a shaft 10 by 12 feet has been sunk 115 feet deep, and the ore assayed \$3.00 at the surface, and \$1.50 at 100 feet, and \$1.00 at 150 feet. There is a large body of ore, and it can be made to pay nicely, even if a better ore should be found as depth is attained. There is no doubt but this is a very valuable property.

No. 3—Deer Lake

On this property are two shafts and a large body of ore has been exposed running very high in value for the depth attained.

Situation

All the properties of the company are in Ontario, within easy reach of trade centres, and are easy of access for purposes of inspection by intending investors. The district of Parry Sound is just passing thru the development stage in its mining experiences, and every day only brings forth fresh evidence of its mineral wealth. Surface indications are abundant, and samples have been assayed from the district showing as high values as \$5.00 to the ton.

The company has been in operation for a number of years, and has obtained a depth of nearly 200 feet, and a good body of ore has been exposed. With this property had less development than has already been accomplished on this company's property, No. 2, an offer of \$100,000 is said to have been refused, and at the time no better values could be shown than exist upon this company's property today.

Copper as an Investment

To acquire an interest in a profitable mine in any of the big copper companies is now practically an impossibility. Prices are so high that an investment, large enough to yield anything worth while, requires a fortune; in fact, the big profits in the big copper companies were made by the early subscribers, those who went in when the big opportunities were open. Now, however, the big opportunities are closed, and the big profits are gone. The only way to get into the big copper companies is to get in when the big opportunities are open, and the big profits are gone.

A-CHANCE OF A LIFETIME

is now offered to a few investors to get in on the ground floor, what is unquestionably a very rare opportunity, and a chance of a lifetime. The company has been in operation for a number of years, and has obtained a depth of nearly 200 feet, and a good body of ore has been exposed. With this property had less development than has already been accomplished on this company's property, No. 2, an offer of \$100,000 is said to have been refused, and at the time no better values could be shown than exist upon this company's property today.
