Otisse 612 The winter shipments from the new silver camps in the Montreal River and Gowganda sections were the result of persistent development, and prospecting of the former season.

The summer of 1910 will witness much greater progress in development work on the various properties being actively and energetically worked as prospecting will be followed by sinking and drifting.

Many of these north country propo-

sinking and drifting.

Many of these north country propositions receive very little publicity because they are privately controlled.

The Gowganda Belle and Mines Producers are among the class where the stock is closely held by a few individuals, with an allotment for the treasury that has resulted in continuous work, which should put them in the shipping list before the close of the season.

the season. The former company owns 15 pro-perties at Miller and Gowganda Lakes and on Calcite Creek,
The Macrae lot on the west branch of the Montreal River and near the Macrae-McAlpine and Henderson-Ramey group is one of the properties Standard Stock and Mining Exchang where considerable work has been

Several strong cobalt silver veins have been uncovered. A shaft is being sunk on one vein, and at depth of 26 ft., the vein has width of 4 1-2 Inches and the wall rock is shot with silver on either side of the vein.

The properties of the Mines Producers are located in the Miller, LeRoy ers are located in the Miller, LeRoy and Gowganda Lakes section.

The MacKay-Morrison property ad-joins, and is being worked by a strong

oins, and is sold for a large sum.

Strong calcite-silver veins have been uncovered, and trenching will be continued during the summer.

Little Nipissing McKin-Dar.-Savage Nancy Helen Nipissing

erected and accommodation provided for a crew of men to work several of the claims that give every indication of becoming producing mines.
The company owns 15 claims and that judicially expended will enable the parent company to dispose to sub-

themselves.

In any event the money is being spent in and on the ground under the direction of Resident Engineer Rorke.

NEW ROAD FROM KELSO

Dr. Reaume Inspecting Proposed New **Road Into Porcupine.*

KELSO. (Mileage 222, T. & N. O. Ry.). May 4.—Dr. Reaume is to-day inspecting the proposed road from here to Frederickhouse Lake. At the present moment there is no good way to get into Porcupine. There are some gasoline iaunches on Frederick-house Lake, but these are not yet in running order and are not adapted for the shallow waters of these northern lakes. A new navigation company is preparing to put on a service in a few days, but even with this there will be a walk of seven miles at this end of the journey and nine miles at the Porcupine end...

Many have already stafted in by canoe, but traveling can only be done on days when there is little or no days when there is little or no days when there is little or no myind, as on windy days the shallow waters of Frederickhouse Lake are almost impossible to navigate in a canoe.

The station facilities here are very.

The station facilities here are very.

PRESIDENT SUPPORTED

Session and Vote Satisfaction in Management.

The annual meeting of the Beaver Mexican dollary, 46

Mexican dollary, 46

Mexican dollary, 46

Mexican dollary, 46

Consolidated Mines Co. was held the Trader's Bank Building yesterday. As Back as a proper series of the Beaver Consolidated Mines Co. was lead to the Trader's Bank Building yesterday. As Back as a proper series of the same and the case for some time.

There was a sharp demand for Beaver this morning, induced, it was thought, by reason of the annual meeting, which took place this afternoon. These shares rain up two or three points, and maintained the advance with ease. Yesterday's rapid anovement in Rochester served to bring out considerable speculative boldings to-day, and under these sales the price of the stock reacted from yesterday's advance.

There was a good general demand for all of the active shares at slight advances, but enquiry for the higher priced stocks was very limited, and there were few transactions in these at only steady prices.

The appearance of the market shows considerable improvement, and a much more cheerful attitude is being adopted by tradere and investors in these securities.

PERSISTENT DEVELOPMENT

The winter shipments from the new silver camps in the Montreal River and Gowganda sections were the read Gowganda sections were the read Gowganda sections were the result of persistent development, and Gowganda sections were the result of persistent development, and contents of the sections were the result of persistent development, and contents of the sections were the result of persistent development, and contents and the presented that the sould be appearance of the market of the search of the sections were the result of persistent development, and contents of the contents of the contents of the sections were the result of persistent development, and contents of the onsolidated Mines Co. was held in the

property, which he said was one of great promise.

The meeting was drawn out to considerable length, Chairman Culver allowing entire latitude for complete discussion of the company's affairs.

The result of the contest for the directorate left this body practically the same as before, the name of A. J. Pattison being inserted in the place of J. M. Wallace.

The directors now are W. L. Church-

The directors now are W. L. Church-ill, Bay City, Mich.; C. J. Booth, Ot-tawa; Wm. Muir, Titusville, Pa.; J. T. Roberts, Buffalo; and Messrs. F. L. Culver, H. E. Tremain and A. J. Patti-son, Toronto.

Annual Sermon. The annual sermon of the Upper Canada Tract Society will be preached in Old St. Andrew's Church, Toronto, on Sunday evening, by Professor Law of Knox College, and the annual meeting will be held in the Northern Coning will be held in the Northern Con-gregational Church on the following evening. Addresses will be given by Rev. Dr. Hincks of Broadway Taber-nacle, and J. S. Potter, Superintendent of Sailors' Missions

Had Weak Back. Would Often Lie in Bed for Days Scarcely Able to Turn Herself.

Weak back comes from the kidneys, and when the kidneys are out of order the whole system becomes deranged. Those who have never been troubled with kid-

who have never been troubled with kidney trouble do not know of the suffering and misery which those afflicted undergo. Doan's Kidney Pills are a specific for all kidney troubles.

They begin by heiping the kidneys to flush of all the acrid and poisonous impurities which have collected, thus clearing out the kidneys, bladder and all the urinary passages and carrying away the uric acid, the chief cause of rheumatism, from the blood.

Mrs. Arch. Schnare, Black Point, N.B., writes:—"For years I was troubled with

writes:—"For years I was troubled with weak back. Oftentimes I have lain in bed for days, being scarcely able to turn myself, and I have also been a great. sufferer while trying to perform my household duties. I had doctors attendhousehold duties. I had doctors attending me without avail and tried liniments and plasters, but nothing seemed to do me any good. I was about to give up in despair when my husband induced me to try Doan's Kidney Pills, and after using two boxes I am now well and able to do my work. I am positive Doan's Kidney Pills are all that you claim for them, and I would advise all kidney sufferers to give them s fair trial."

Price, 50 cents per box, or 3 for \$1.25, at all dealers or The T. Milburn Co., Limited, Toronto, Ont.

ELK CITY, May 4.—With the opening of navigation, which is now in full swing, the greatest of activity prevails at the various mines and prospects in this vicinity and the city is rapidly recovering from the recent fires.

The district is likely to become another Cobalt and the veins run to depth with values. Among the shippers and properties bagging ore are the Lucky Godfrey, the Borland-Thompson, the Devlin and the Moose Horn mines.

The McKenzle company are in a very construction of the McKenzle vein, where the new 7 inch vein crosses. Mr. McMaster states that in his opinion this week will result in the placing of the value of the mine beyond question. The necessary buildings have now all been erected, including bunk house, cooking camp, manager's dwelling, blacksmith shop, powder house, and the necessary machinery is being installed. A good wagon road has been built from the main road which parallels the road from Elk Lake.

The McKenzle company are in a very

Horn mines.

The Moose Horn mine put in a new plant this spring and are now sinking a winze at the 125-foot level on a vein which has shown values from the surface.

In the midst of the mines is the McKenzie, a group of five properties on which work was begun last Jan-
