# 1000 Eggs

New System of Poultry Keeping—Get Dollar a Dozen Eggs—Famous Poultryman

**TELLS HOW** 

"The great trouble with the poultry business has always been that the laying life of a hen was too short." say's Henry Trafford, International Poultry Expert and Breeder, for nearly eighteen years Editor of Poultry Success.

The average pullet lays 150 eggs. If kept the second year, she may lay 100 more. Then she goes to market. Yet, it has been scientifically established that every pullet is born or hatched with over one thousand minute egg germs in her system—and will lay them on a highly profitable basis over a period of four to six years' time if given proper care.

How to work to get 1,000 eggs from every hen; how to get pullets laying early; How to work to get 1,000 eggs from every hen; how to get pullets laying early; how to make the old hens lay like pullets; how to keep up heavy egg production all through cold winter months when eggs are highest; triple egg production; make slacker hens hustle; \$5.00 profit from every hen in six winter months. These and many other money making poultry secrets are contained in Mr. Trafford's "1,000 EGG HEN" system of poultry raising, one copy of which will be sent absolutely free to any reader of this paper who keeps six hens or more. Eggs should go to a dollar or more a dozen this winter. This means big profit to the multry keeper who gets the eggs. Mr. Trafford tells how if you keep chickens and want them to make money for you, cut out this ad and send it with your name and address to Henry Trafford, Suite 591S, Tyne Bldg., Binghamton, N.Y., and a free copy of "THE 1,000 EGG HEN" will be sent by return mail.
