UP GO SPRUCE PRICES IN NEW ENGLAND MARKET

Boston, June 19.—There have been great happenings in the market for spruce. The result is that those who wanted to buy but hesitated about doing so, because they believed a decline was near, are now buying.

The explanation of these varied feelings is simple. Another of the large manufacturers has withdrawn quotations altogether and the others have advanced their price to \$47 base. At this writing it must be considered doubtful if anyone can purchase for less. The demand has been gradually improving for some time and it now has become evident even to the most casual observer that there will not be enough lumber to go around comfortably unless business falls altogether.

It seems probable, indeed, that from the conference between the mayor, the contractors and the carpenters there may be satisfactory results in which case it is only reasonable to suppose that building will increase and the demand for spruce become more active. It is not generally realized, perhaps, that in spite of labor troubles the building commissioner for Boston for the first five months of 1919 issued a total of 2168 building permits for work valued at \$6,284,504, against 1401 permits and a valuation of \$4,417,618 for the corresponding statement of the number and cost of applications filed for new buildings for May, 1919, and for May, 1918, is certainly worthy of special attention.
