Two Engines and Six Cars De-railled Between Memramook and Calhoun's

Moncton, N. B., Sept. 16.—(Special).—No. 75 train was badly derailed this morning about 11 o'clock between Memramook and Calhoun's. The cause is unknown but is supposed to have been a broken rail.

Two engines and six cars were off the track and all quite badly damaged. The track was torn up for some distance and traffic was delayed for about four hours. The drivers and firemen of both engines escaped unhurt.

Moncton Times:—The home of Mr. and Mrs. Suberland, Upper Grand, was the scene of a very unusual experience during the first week of September. A funeral, a marriage and a christening were conducted there during that week.

On Sunday afternoon next Miss L. L. Shaw, B. A., who has for the past five years been working in the mission field of Oshana, Japan, will address the children of St. John's (Stone) church Sunday school, telling them about the work of the missionaries during the Japanese war.

Visitors will be welcome. Miss Shaw will have on the platform a little girl dressed in Japanese costume. An interesting meeting is promised.

Many things are more embarrassing to a man than to feel that, on account of her costume, or some portion of it, she is the center of attention. It is a fact that a hat which is both fashionable and becoming will cover a multitude of other defects—even if the suit is last year's—and make the wearer feel at ease anywhere. It is just because hats are so fashionable and becoming that they enjoy such wide popularity.

INVENTION WINS \$10,000

Poor Young Mechanic Finds Fire-proof Covering For Wire

York, Pa., Sept. 16.—H. Luke Owen, a young mechanic of this city, who has been struggling for years on a small salary, has suddenly become rich through the invention of a fireproof covering for wire.

The General Electric Company, of Schenectady, tested the discovery, which proved most intense heat proved itself absolutely indestructible. The company offered \$10,000 for the right to use the new invention. In addition, Owen is to receive a handsome salary for superintending the manufacture.

Writing with defective insulation causes a fire loss of many millions of dollars annually. This loss, it is said by electricians, will be reduced to a minimum by the new covering of the North Pole.

GRAFT IN 'FRISCO'S

POLICE DEPARTMENT

San Francisco, Sept. 16.—That the San Francisco police department is so interested with graft that it may be completely ruined is the substance of a report sent by Mayor McCarthy to the police commission.

Mayor McCarthy says he is convinced the police are extending protection to criminals.

At the Opera House

Boars of laughter and frequent applause greeted the presentation of "The Explorer" by Phil Ott and his comedians last night in the Opera House. There was a fairly good sized audience and they seemed very well pleased with the show, which was a comic satire on the exploits of Dr. Cook, Arctic navigator, and alleged discoverer of the North Pole.

Phil Ott on every appearance provoked applause, and in his monologues and singing made a hit. He was surrounded by a bevy of chorus girls, who sang and danced capably. As Crook, the actor explorer, Phil Ott was much favored, as did Henry Alexander in the part of Andrew Bull. Miss Edwards, Tarrance, Collier and Engle were seen to advantage in pleasing parts.

The Explorer will be repeated tonight and twice Saturday. At tomorrow's matinee the ladies of the company will hold a reception on the stage after the performance. Souvenirs will be given to the children attending.

Rev. Father Chapman, who has been attending the Eucharistic Congress, arrived in the city on the noon train today.

SIR PERCY LAKE

IN FREDERICTON

Engineer Scammell Inspects Site for Wharf—W. E. Foster Buys Book Debts

Fredericton, N. B., Sept. 16.—(Special).—General Sir Percy Lake, quartermaster general of the militia, arrived this morning from Ottawa and is inspecting No. 3 regimental depot. He will leave this evening for Camp Allard, N. S.

The body of a man found in the old McAdam house, at Lower Prince William, a few days ago, has not yet been identified. To the young man who found him, just before he passed away, he muttered the name "O'Brien," and it is assumed that was his name. The words "Portland Maine," were stamped on his hatband. He is supposed to have been a tramp on his way to this city.

Engineer Scammell was here today looking over the site of the wharf to be built here by the public works department. He returned to St. John.

The stock in trade and book debts of Frederick Glover, merchant tailor, of Stanley, who lately assigned, were sold at auction by Sheriff Lowe here this afternoon and purchased by W. E. Foster, of St. John for \$20.

FORMER LORD MAYOR, THE CHILDREN'S ALDERMAN

SIR WILLIAM WILSON BART, ALD. MAYOR OF LONDON.

London, Sept. 16.—Alderman Sir William Trevelyan, Bart., one of the past lord mayors of London, who is known in town, if not throughout the whole kingdom, as the children's alderman, on account of the number of his business ties in the city, was in the city today.

His visit to the United States is primarily for the purpose of inquiring into and observing the methods employed in America in caring for crippled children. In spite of his business ties in the city, the welfare of crippled children is Sir William's main life work.

Every Christmas he sends out hundreds of hampers of food and toys for the maimed infants in whom he is interested, and it is a remarkable fact that at that busy time, when so many packages get lost in the post, not one of these hampers has ever been known to go astray.

ILL IN NEW YORK

Mr. Whelpley, Returning Home From St. John, Was Over Come in Street

Brown Whelpley, of New York, who left St. John late in August to rejoin his sister in New York, after spending a few months here with relatives, is quite seriously ill at his home. The circumstances of the case are rather peculiar.

It seems that Mr. Whelpley when he left here intended staying a day or two in Boston. He afterwards changed his mind and went to New York, without notifying his people there of his decision. His daughter in New York, meanwhile, on not hearing from her father, telephoned to Boston but could learn nothing as to his whereabouts. A telegram, to St. John brought back a reply that Mr. Whelpley had left here.

After some further messages on the wire inquiries were also instituted in New York and finally Mr. Whelpley was discovered in a hospital where it was learned he had been found in the street partially paralyzed. He was afterwards taken to his home and his condition has somewhat improved, but as he is now fairly well along in years it is doubtful if he ever fully recovers from the stroke.
