

NEW LIST OF JUSTICES TO TAKE NAMES

No woman need now fall to register in addition to the regular booths the following are justices of the peace and can be found at their offices as below at the exception of some of those in Guys and Brooks whose office address are not given and who are at their homes in the evening.

West End.
Frank F. Belyea.
B. B. Brittain.
Charles H. Belyea.
George M. Baillie.
Alfred Burley.
J. Firth Brittain, Colwell Fuel Co., Ltd., Union street.
W. E. Emerson, 81 Union street.
W. E. Scully, Union street.
H. Colby Smith, Corner Union and Rodney.
J. M. Driscoll, King street.
L. Boran Clark, 184 King street.
W. M. Campbell.
W. I. Fenton.
R. W. Ingham, 181 Union street.
S. Herbert Mayes.
S. Merritt Wetmore.

Lansdowne.
Frederick C. Beatty, Stetson's Mill.
Alexander S. Holly, 73 Main street.
Oscar Price, Main street.
Dufferin.
Thomas A. Armour, F. S. Thomas, 548 Main street.
J. Herbert Crockett, Crockett McMillan Co.
George A. Chamberlain, 164 Mill street.
J. S. Gregory, Portland Point.
Charles P. Wade, 44 Wall street.
Wm. Seavey, Main street.

Victoria.
R. R. Patchell, Byron Bros, Stanley street.
George A. Kimball, J. Kimball & Son, Marsh street.
Stanley.
Alexander M. Rowan, Millidgeville in evening.
Wellington.
Samuel C. Denny, 37 Waterloo street.
Patrick J. Fitzpatrick, 100 Waterloo street.

Nervous Women

Nothing is so good for you as

Vinol

Why drag around weak, tired and nervous? Vinol will make you strong, feel well and banish nervousness.

Your money back if it fails at leading drug stores—look for the Vinol sign on windows.

CHESTER KENT & CO., WINDSOR, ONT.
THE ARTHUR SALES CO., TORONTO.

Provincial Government Grants \$2,500 and St. John Rotary Club Will Raise \$5,000

Fredericton, Oct. 2.—The disaster which overtook the village of Oromocto in the fire of Tuesday and dire necessity which confronts a number of the inhabitants of the village were brought to the attention of the provincial government at its regular monthly meeting this afternoon and immediate action was taken by Premier Foster and the other members of the provincial executive so that by Friday morning there will be in the hands of the relief committee organized among the citizens of Oromocto and vicinity, the sum of \$2,500 granted from the provincial treasury to be disbursed at once in the relief of the pressing wants of the victims of the fire.

The relief committee which will disburse this and other sums which may be received from other sources, is composed of R. M. Smith, M.P.E., chairman; Charles Gilmore, secretary; Alex.

USE The Want Ad Way

R. Burnett, T. J. McElroy, Martin Kimball, T. H. Estabrooks, J. W. Gilmore.

The Rotary Club.

The inhabitants of Oromocto are in urgent need of outside assistance as a result of the fire, according to a message sent to this city last evening by T. H. Estabrooks, who got in touch with H. D. Paterson, president of the Rotary Club, and suggested that the Rotarians might do something at once towards raising funds. Mr. Paterson acted immediately. He communicated with members of the executive of the club, with the result that it was decided to make preparations for a spirited canvass of the city by members of the club next Tuesday with the hope of raising \$5,000. It is felt that no difficulty should be encountered by the Rotarians in this effort, for it is highly necessary that St. John should contribute this comparatively small amount to so worthy a cause. As a sufferer by fire in his worse form in days past this city is in a position to know what Oromocto has gone through, and the appeal by the Rotarians should be met by a ready and generous response.

Synod Appeal.

The executive of the Synod met on Thursday afternoon and transacted much routine business in receiving and adopting reports. It was decided to make a diocesan appeal on October 10 for the church in Oromocto.

A resolution expressing deep appreciation of the late William Ewing and sympathy for his bereaved relatives was unanimously passed and will be forwarded to them.

Adjournment was made until January.

THIN PEOPLE NEED BITRO-PHOSPHATE

Increases Weight, Strength and Nerve Force in Two Weeks Time

The average person is beginning to realize more and more that the lack of physical strength and nerve exhaustion (frequently evidenced by excessive thinness) are the cause not only of the failure to succeed in life's struggle for the necessities of existence, but also for the handicap in one's social aspirations. Compare the thin, sickly, angu-

lish frame with the well rounded form which is accounted for by the bloom of health and attractiveness.

Thin people are conscious of the continued appearance in newspapers and magazines of many suggestions proposing various remedies in food or medicine or exercise, either of which might or might not be appropriate for a given case.

Authorities, however, agree that healthy nerve tissue is absolutely essential to a strong, robust body and mind. Weak nerves, while indicated by a multitude of different symptoms, generally result in lack of energy, sleeplessness, irritability, depression, etc., when conditions gradually consume the healthy flesh, leaving ugly hollows, a flat chest, bony neck and scrawny arms and legs.

Our bodies need more phosphate than most of them are able to extract from the foods we eat nowadays, and many opinions affirm that there is nothing which may be taken into the system that so effectively supplies this deficiency as the pure organic phosphate known as bitro-phosphate.

The essential phosphate assimilated by the nerve cells should soon produce a pleasing change in nerve energy and hence increased vitality and strength. With the burdens of nervousness, sleeplessness, lack of energy, etc., lifted, normal weight with attractive features and ruddy glow of health replaces the former picture of skin and bones.

Frederick L. Roderick, who was once thin and frail, reporting his own experience, writes: "Bitro-Phosphate has brought a complete transformation with me. I gained 15 pounds and never before felt so well."

CAUTION—Although Bitro-Phosphate is unexcelled for the relief of nervousness and attendant disorders, owing to its tendency to increase weight, the thin should watch the scales while taking it unless it is the desire to put on flesh.

Frederick L. Roderick, J. Roderick & Son, 36 Brittain street.

Frank T. Lewis, Wm. Lewis & Son, 60 Brittain street.

FINISH RENEWALS BEFORE SNOW FLIES

Commissioner Jones Explains Why so Many Streets Are Torn up

MOUNT PLEASANT HAS COMPLAINT

No Water For Three Days and Commissioner Gives as Reason Magnitude of Renewal Work at Haymarket Square—Good Progress in Brussels Street and Douglas Avenue.

Commissioner Jones, head of the water and sewerage department, speaking to a Telegraph reporter, yesterday afternoon, said that in reply to certain criticisms, relative to tearing up so many streets at once, and of insufficient service on high levels, he would like to have it fully understood that the renewal work must be completed before the very cold weather sets in in order to avoid a repetition of delay and additional cost to the taxpayers that occurred on the jobs at Lake Fergus and other big municipal work when he was rushing the work of main and sewer renewals about the city as rapidly as possible.

Asked to give a detailed account of the extensive operations of his department, Commissioner Jones said that in Douglas avenue the water main had been all laid and the sewer renewals were nearing completion. There have been about 400 feet of fifteen-inch pipe, 350 feet of twelve-inch and 1,100 feet of nine-inch laid in this section. There is still about 600 feet yet to be laid.

The commissioner further stated that it had been found absolutely necessary to tear up the branch line of the street railway in Douglas avenue near the Main street junction. It has been discovered that the main road bed lies in about twenty inches of solid concrete and to remove this it would be necessary to have recourse to dynamite.

But to avoid this, the city has been temporarily halted and repairs will be effected, by the tearing up of the main road bed of the railway. There have been 1,700 feet of new 12-inch water main laid in Douglas avenue to replace the old eight-inch main.

Pipe in Bad Condition.

On city road, operations for sewer and water main renewals have been commenced at the Marsh bridge and the pipe has been laid as far as Gilbert street.

Large. Great difficulty was encountered in this vicinity owing to the depth of the water and the service of the pipe.

Great work and unavoidable delay was caused by the necessity to replace the old ten-inch pipe with a larger one in the neighborhood, night shifts have been put on this emergency piece of work.

The trench, however, is now ready for the reception of a main water pipe right up to Stanley street and the sewer renewal is being repaired from the bridge to near the head of Stanley street. Beyond this the old pipe will be replaced with a terra cotta pipe which undoubtedly will tend to relieve the maintenance if the old pipe was only patched.

In Brussels street the main water pipe has been laid around the Haymarket Square corner into Brussels street for a distance of 1,200 feet, this being a thirteen-inch main to replace the old ten-inch which has been down some eighty-one years. This pipe was found to be leaking very badly in many places. About 500 feet of rock have been encountered in a section of the Brussels street renewal, but as soon as this is passed there will be very easy excavation for the rest of the stretch and the commissioner expects to have the entire job in this vicinity finished within two weeks. The work in Duke street has been completed and is giving every satisfaction.

Better on Mount Pleasant.

Speaking generally of the work, Commissioner Jones said that the renewal, especially in the vicinity of Haymarket Square would tend to give a higher pressure and a better service to the residents of Mount Pleasant. The Telegraph, had a call, last evening from a resident of Mount Pleasant saying that some of the people there had no water for three days.

Commissioner Jones, called by telephone, said that he had already explained to several people in this vicinity that connected with the new main now being laid in Haymarket Square were being made as rapidly as possible.

The commissioner explained that very few citizens have any idea of the difficulties encountered. The wretched condition of both the old water and sewer pipes was almost beyond belief and it had been found necessary to keep pumps going continually through the day and night in order to keep the trench clear and allow the men to work. The connection was being made as quickly as was possible and he expected by today to have it finished.

It is expected that this month will see the completion of all the work of water main and sewer renewals about the city, including the new system in Hawthorne avenue where complete new water services are being put in.
