## CITY HALL NOTES.

The work of placing the asphalt surface on Main street will be begun on Monday next, and the officials of the public works department hope to finish that part of the work in about five days.

It is understood that the commissioner of public works will submit a proposal to the council in the near future in regard to the collecting of ashes and garbage. It is believed that he will propose that the city put on their own teams and collect all the refuse and put the cost of this work in the general taxation.

The men of the water department were busy yesterday digging down to a leak in the 15-inch main on Brasels street. This leak was not a very serious one, and the broken piece of pipe will be taken out today and a new section put in as it was not bad enough to warrant night work. The breaks in the 24-inch mains have delayed the stringing of the work at Lake Lattimer, but it is hoped to begin work there very soon now.

## THE POLICE COURT.

In the police court yesterday the case was continued in which two sailors were charged with refusing duty on board the bark Solkheim. The case was adjourned until the food conditions on the vessel are investigated. One drunk was fined the usual amount.

## Gas In The Stomach Is Dangerous

Physician Recommends the use of Magnesia to Stop Acid Indigestion.

Sufferers from indigestion or dyspepsia should remember that the presence of gas or wind in the stomach almost invariably indicates that the stomach is troubled by excessive acidity.

This acid causes the food to ferment and the fermenting food in turn gives rise to noxious gases which distend the stomach, hamper the normal functions of vital internal organs, cause acute headaches, interfere with the action of the heart, and charge the blood stream with deadly poisons, which in time must ruin the health. Physicians say that to quickly dispel a dangerous accumulation of wind in the stomach and to stop the food fermentation which creates the gas, the acid in the stomach must be neutralized and that for this purpose there is nothing quite so good as a teaspoonful of the bisulphated magnesia taken in a little water immediately after meals. This instantly neutralizes the acid, thus stopping fermentation and the formation of gas, and enables the inflamed, distended stomach to proceed with its work under normal conditions. Bisulphated magnesia is obtainable in powder or tablet form from any druggist; but as there are many different forms of magnesia it is important that the bisulphated which the physician prescribes should be distinctly asked for.

## A Glass of Ready's Lager Beer

is far more wholesome than a cup of tea or coffee, as it contains more food value. It is often given to convalescent patients and nursing mothers where tea and coffee are refused them. A pure malt and hop beverage, used at mealtimes, creates an appetite, aids digestion and nourishes the body. On sale everywhere.
