GERMANY ADMITS THAT BRITISH GAINED GROUND

A FORMIDABLE WAVE OF DRUMFIRE LAUNCHED BY BRITISH, SAYS BERLIN

Official Report of German War Office Admits that Field Marshal Haig's Men Were Able to Advance Into Crown Prince Rupprecht's Defense Zone.

Berlin, Sept. 21.—The text of today's official statement reads: "Western theatre: Army group of Crown Prince Rupprecht—Troops of the fourth army fighting under the leadership of Infantry General Von Arnim have successfully withstood the first day of the third battle of Flanders."

"The fire effect of the last days presented a powerful effort on the part of the English and the concentration of fighting means employed by the enemy on September 20, on a front of twelve kilometres, (7½ miles) reached the limit of its intensity at Hoochmass."

Behind a formidable wave of the most intense drumfire from guns and mine throwers of all calibres there advanced to attack in close formation in the morning between Langemark and Hollebeke at least nine British divisions, including several Australian divisions, which were often supported by armored cars and flame throwers.

British Advance.

After fluctuating fighting as a result of the attack the enemy was able to

advance as much as one kilometre deep into our defense zone and at Fassechende and Chelweit, the enemy at times pressed further forward. West of Fassechende he was pressed back again by our counter-attacks. North of the Menin-Ypres road a portion of terrain remained in his hands.

"In all the other sectors of the battlefield the English sustaining the heaviest losses, were thrown back to the crater field of our fighting zone by the stubborn and heroic fighting of our troops, which lasted until late in the afternoon. Reinforcements of the enemy, which were newly brought up into the fire throughout the evening, were not able to gain any further ground. The villages situated within the fighting zone are all in our possession."

"So far this morning the English have not resumed the battle. As in the former battles in Flanders our leaders and troops reached the highest point of efficiency."

"From our other armies on the western front and in the eastern and Balkan theatres there were no special events to report."

WOMEN FIGHTERS IN SMALL RIOT

Girls Attack Commander at Moscow and Muss Her Up—Government Agent Killed.

Petrograd, Sept. 20.—A small riot occurred today in the ranks of the women's battalion drilling in Moscow and it resulted in an attack by the women upon Vera Butchkaroff, twice wounded girl officer, who initiated the woman suffrage soldier organizations. According to the Boura Gazette, an infantryman rescued Commander Butchkaroff after some rough handling from the infuriated girls who resented some acts of their leader.

In a second riot a crowd of women wrecked the militia headquarters and had beaten to death a government agent who had shot into the crowd, before they were dispersed by mounted militia and Cossacks.

She Went Days Without Food

When Hospital Treatment Failed an Operation Was Advised—But Cure Was Effected Without the Use of the Knife.

New Aberdeen, N. S., Sept. 20.—Here is a case which sorely puzzled the hospital doctors. It was evident that the great suffering from pain under the left shoulderblade was due to rapidity of the liver, but no medical treatment seemed to do any good. In fact medicines failed, and the doctors said an operation was the only hope. But Mrs. Watkins hesitated before the enormous risk of an operation and decided to try Dr. Chase's Kidney-Liver Pills first.

The result was that she was perfectly cured three years ago, and feels now that she can report the cure as thorough and lasting. This is not an isolated case, but proves that this great medicine cures when ordinary prescriptions fail.

Mrs. Annie Watkins, of New Aberdeen, N. S., writes: "I think it is time for me to give my experience with your wonderful Kidney-Liver Pills. For seven months I suffered with what the doctors called indigestion; but whatever it was, I suffered terribly. The pain would start under my left shoulder and pass down my side until it reached the pit of my stomach. It just seemed as if the flesh were being torn from the bone. At times I used to go without food from one morning until the next. I had no energy left for work at all. At last our doctor sent me to the hospital for a month. For four days and nights I never broken my fast, except for a drink of water. After four weeks' treatment there I returned home, and was back only four days when the pain came back worse than ever. Then I was told I would have to undergo an operation, but I would not consent to that. At last I read about Dr. Chase's Kidney-Liver Pills and started to take them. At first I did not notice much difference, but still I kept on using them, and by the time four boxes were used I was perfectly well again. That was in 1914, so you see I can safely say that I was cured. I shall always be grateful to Dr. Chase's Kidney-Liver Pills, and will advise every one I know of. Refuse substitutes; for they only disappoint."

AGED WOMAN LOSES LIFE FROM FIRE

Clothing Ignited from Pipe While She Was Picking Berries in Kings County Village.

Special to The Standard. Apohaqui, Sept. 21.—A very distressing and fatal accident occurred at Marlow, this county, by which an aged lady lost her life by fire. The victim of the fatality was Mrs. Clements, aged 72 years, who resided with her son, James Clements. Being comparatively smart and lured by the beautiful day she took a walk into the fields to gather berries, having in her pocket as in ancient days her pipe and tobacco, which after she had smoked had not been thoroughly extinguished. The smoldering tobacco set fire to her dress, and her clothing was soon fanned into a flame. Hurrying as quickly as she could toward the house she was seen approaching enveloped in flames. When she arrived it was too late and she died within a few hours.

The deceased was an estimable old lady and her tragic death is a great shock to the community.

KAISER WILLAM HAVING TROUBLES

Goes to Sofia to Settle Bulgarian Difficulties.

London, Sept. 21.—A despatch from Bern, Switzerland, received today by the British admiralty through the Wireless Press, says:—"Emperor William has passed through Budapest Hungary, on his way to Sofia, the Bulgarian capital. It is believed to be the emperor's intention to try to smooth over difficulties which have arisen between Bulgaria and Germany."

"Germany and Austria have demanded military aid which Bulgaria has refused. On the other hand, Bulgaria has asked similar aid which the Central Powers have refused."

THE COUNTRY MARKET.

Very little change from last week is reported in the country market prices. Moose steak is arriving, but only in small quantities, as this meat is very scarce this fall. Fresh vegetables abound and plentiful supplies of meat are on hand. Prices are as follows on vegetables: Potatoes, 40c. a peck; parsnips, 50c. a dozen; cabbage, 10c. a head; celery, 10c. and 15c. a bunch; beans, 15c. a bushel; cucumbers, 2c. each; radishes and lettuce, 5c. cauliflower, 10c. to 25c. a head; green corn, 15c. to 40c. a dozen; squash, 4c. a pound; tomatoes, 10c. a pound; carrots, 5c. a bunch; cranberries, 15c. quart. Prices on meats are as follows: Lamb, hind-quarters, 30c. a pound; fore-quarters, 20c. a pound; roast pork, 25c. to 30c. a pound; veal, 25c. to 35c. a pound; mutton, 20c. to 28c. a pound; western beef, 25c. to 35c. a pound; local beef, 18c. to 25c. a pound; steak, 25c. to 30c. a pound; pork chops, 22c. a pound; fowls are selling at 30c. a pound and chickens at 40c. a pound. Moose steak is selling at 20c. a pound; venison from 25c. to 30c. a pound, and ducks at \$1.25 a pair.

DUNLOP Mechanical Rubber Products

The Infallible Test of Time

Basic Facts About Belting

Dunlop "Gibraltar" RedSpecial Frictioned Surface Belting

A Worthy Product

Universal Recognition of Gibraltar

That "Friction Pull"

Resilient Quality Must Not Be Sacrificed to Excess of Friction Strength

Gibraltar Virtues are Real

Permanent Elasticity Means Life

Duck Finest Obtainable, Made to Highest Specifications

Our Laboratory workers have produced in Dunlop Gibraltar RedSpecial Belting a product that is worthy of the Dunlop Factories, and the quarter-century record of success back of them.

To cite the names of the users of this famous Red Frictioned Surface Belt would necessitate our buying many pages of this newspaper. We have on our files recommendations from every type of user of Gibraltar RedSpecial Belts, 1½ inches to 48 inches. These recommendations are "at your service."

When you are informed that such-and-such a belt has a friction pull of "abnormal" poundage, do not imagine that you are getting a quality friction. What you have to secure in a belt is a friction full of elasticity. There has got to be between the plies of duck only a certain class of rubber to give uniform strength and pliability.

To obtain high figures, such as referred to above, in belt frictions you have to take away from the elasticity of the friction; hence, there is a happy medium, and this medium we have obtained through our laboratory experts. It ensures for you a belt, the friction of which will hold the plies together and will be sufficiently elastic in its properties to allow for the give and take necessary in rounding the pulleys.

Gibraltar Belting owes its success, not to any illogical deductions or fantastic analyses, but to the simplest causes—causes so simple that they are now, always have been, and always will be, in our opinion, the bedrock of success in belt-making—Power, Speed, Service—in actual use as well as in the test-room.

Years of careful study of the high-power belt situation have enabled us to produce the Original Red Face Rubber Belt of Canada. In producing it, our object has been to have the friction coat of rubber between the plies such as will retain its life indefinitely, and to have a quality of rubber with long "fin-gers," and not a quality of rubber the elasticity of which has been sacrificed to obtain the so-called high-pulling test.

Its widespread adoption by various industries is based on the use of the finest quality of selected duck, having the proper tensile strength in the right direction. This, in combination with a superior quality of rubber friction between the plies, insures absolute uniformity of service.

Gibraltar RedSpecial Belting is to be found in practically every plant in Canada; and if it is Power, Speed and Service that you want, then it is Gibraltar Red Frictioned Surface that you require for your work.

The Original "Red"

Gibraltar, as noted previously, is the Original Red Belt—and like most things that are original, its success is of the kind that endures.

All that can be found in any other belt will be found in Dunlop Gibraltar; that is, special quality of duck, special quality of friction, and, in Addition, "That Extra" Resilience of Friction Which in Most Belts is Sacrificed.

DUNLOP TIRE & RUBBER GOODS COMPANY LIMITED

Head Office and Factories: TORONTO. St. John Headquarters, 56-58 Canterbury Street. 'Phone M. 153 and M. 102.

WILL RAISE STOCK. The R. D. Wilmot farm, two miles above Oromocto, has been purchased by T. H. Estabrooks who intends raising stock on a large scale. The farm look after the farm, and states that help conditions. It would not only with additional intervals land com every person who owns property prove profitable but would be paid prices about three hundred acres. Mr. naturally suitable, and is in a post etc.
