The King His Own Record.
An amusing aftermath of King Edward's Parian visit comes in the form of the following story: The king, whose limitless practice in the long years of his apprenticeship, made an expert in speech-making, invariably composes his orations on the spot, and delivers them offhand. But when he is not admitted to state, but must reply as he goes to the Ellysée to the king by the President of the French republic. It followed that when the king was asked for the text of his speech for subsequent publication, no text was forthcoming. His majesty had finally to follow the course of lesser mortals and write out his speech himself. And exactly the same thing occurred at the Hotel de Ville. In this case the dismayed telegrapher begging for the speech only reached his majesty at Portsmouth, and he had there and then written out the two pieces of copy, and whether they will appear in the archives of the future.—Harper's Weekly.

Some people contrive to get hold of the prickly side of everything, to run against all the sharp corners and disagreeable things which the world offers. They find the world often set right. No one finds the world quite as he would like it.

Living well is the best revenge we can take on our enemies.

THE NEED OF RAIN.

More Precipitation Than in April and May Last Year.

But It Was Distributed Over the Months That Year, Whereas There's Been a Drought on Since the 19th of April, 42 Days This Year.

The drought which is causing so much concern to the lumbermen and farmers has been on since April 19th, nearly a month and a half, or to be more accurate 42 days, and in that time the rainfall as measured at the meteorological bureau here was 3.45 inches. The worst of it is, however, that this year the rainfall was not distributed evenly, but was concentrated in a few days. May 4 and 5, when the precipitation was 2.85, leaving .60 of an inch divided throughout the rest of the 42 days as follows: From April 19th to April 30th, .48 in; May 1st to May 3rd, .04 in; May 4th to May 5th, .04 in; May 6th to May 10th, .04 in; May 11th to May 12th, .04 in; May 13th to May 14th, .04 in; May 15th to May 16th, .04 in; May 17th to May 18th, .04 in; May 19th to May 20th, .04 in; May 21st to May 22nd, .04 in; May 23rd to May 24th, .04 in; May 25th to May 26th, .04 in; May 27th to May 28th, .04 in; May 29th to May 30th, .04 in.

The total for April, 1902, was 2.41, and for May, 1902, was 4.76 or 7.17 inches for the two months. In April, 1903, the precipitation was 5.76 inches and in the month just closed was 3.45, a total of 9.21 inches. Though this is greater than in April and May of 1902, but in the latter case the rainfall was not evenly distributed among the days of the two months.

The annual theological sermon was delivered this morning by Rev. J. C. Berrie, of Jacksonville (N. B.), before a large assembly. His address was an excellent one and was listened to with close attention.

Mr. Berrie's text was 1 Cor. 1-3, and during the course of his remarks he said: "What we need to realize is that, though we are God thinking in us, we are God working through us. All our movements for goodness and truth are God working through us."

Mr. Berrie treated his subject under three heads, viz: What all ministers should feel; what all ministers should do; and what all ministers should desire. Speaking of the first he said: "Every true minister feels in us God thinking in us. He feels that he is a part of God's work, and that he is called to do God's will."

TRURO HAS TELEPHONE WAR.

Protest Against Company Jumping the Rates.

Delegation Carries Town's Case to the Governor-in-Council—There's Been Peace Since 1899, When Threat of Independent Line Brought Company to Terms.

Truro, N. S., May 20.—(Special).—There is prospect of a big war between the Nova Scotia Telephone Company and the Truro board of trade over the attempt of the company to raise the telephone rates nearly fifty per cent in Truro. The company will meet the governor-in-council Monday to get its action ratified, and the board of trade has appointed a committee, including Mayor Black, Hon. F. A. Lawrence (speaker of the local house), G. A. Hall (secretary of the board), and C. E. Bentley to protest against the measure.

In 1899 the company made an attempt to raise their local rates here and a local company was organized and a line was being installed when the telephone company made a proposition to the local company to make the rates \$25 for stores and \$15 for houses if the local company would give up its independent line.

This was agreed to by the board of trade and has been in force until a few weeks ago.

The company is putting up a new building and proposes installing metallic lines and claims it must have \$35 for stores and \$25 for houses. When the rate was \$25 for stores and \$15 for houses, the company seemed to be in a position to make a proposition to the local company to make the rates \$25 for stores and \$15 for houses if the local company would give up its independent line.
