dividends. That is a startling statement—but true.

And being true—it is a wise move to sell an ordinary cow—and buy an I HC Cream Harvester with the proceeds. It is equivalent to trading an ordinary cow for a champion. For no cow pays as big a profit on the investment as an I HC Cream Harvester—and no cow can pay dividends for so long a time.

—and no cow can pay dividends for so long a time.

You must also remember that a poor separator is a bigger loss than having none at all. For a poor separator means hard work, annoyance, and poor cream. You should be careful to choose a good separator when you buy. The little extra cost should not concern you. A good separator must of necessity cost more than a poor one, because it costs more to make and is worth more.

There are so many cream separators on the market, that you will do well to take no risk. Choose an I H C. Then you will be sure of getting all the profits that a good separator means. You will be sure of getting a machine that skims to a trace—a machine that is famous for its remarkable simplicity—its easy turning, and its easy furning.
