into the dye; boil about half an hour, take out the wool and rinse in cold water.

A color almost as fine may be had by using quarter pound of alum, and boiling in the same way.

YELLOW.—One pound of wool or cloth, three quarters of a pound of fustic, quarter pound of alum—put all into an earthen vessel and pour on sufficient hot water to cover the wool and keep it warm all night; give it half an hour's boil in a brass kettle and then rinse in cold water.

A much deeper and richer yellow may be made by using turmeric powder instead of fustic, and proceeding in the same manner.
