

WAR CLAIMS OF CANADIAN LIFE COMPANIES AND FRATERNALS.

BRITISH INSURANCE POLICY.

Although the trend of insurance policy for several years past has been steadily in the direction of consolidation, there have never before been arranged so many fusions within so short a space of time. The amalgamations may be attributed mainly to the advantages which large offices transacting all forms of business are considered to have over those which confine themselves to one or two forms of insurance. There is further a belief that in the keen competition that is expected after the war the largest offices will be in the best position. It is they who, as a rule, can afford to employ the best brains and are able to work the business most economically.—*London Times.*
