

It Keeps Them Well.

That is exactly what our Vapo-Cresolene will do for your children. When any contagious disease is in the neighborhood you can keep your children from having it by allowing them to breathein the vapor every night. Not a disease germ can live in this vapor,

yet it is perfectly safe. You see it is that little "ounce of prevention" you have heard so much about. It brings quick relief from croup, colds, coughs and other throat troubles. 19 Vapo-Cresolene is sold by druggists everywhere. A Vapo-Cresolene outfit, including the Vaporizer and Lamp, which should last a life-time, and a bottle of Cresolene, complete, \$1.50; extra supplies of Cresolene 25 cents and 50 cents. Moist Heat, a Thorough Germicidal Agent, Is Used.

When the vessel has tied up to the wharf in New Orleans, the first step is the removal of the bedding, clothing and cushions and other cloth fabrics to the quarantine shed. Here they are hung on a framework consisting of a series of racks suspended from a long car running on a track and so arranged that when the racks are filled the whole thing may be run inside one of the three great disinfecting cylinders with which the station is equipped.

ous steel These cylinders are enorme boilers fifty feet in length by eight feet in diameter and fitted inside with continuous coils of steam pipe. The cylinders are covered with asbestus and swathed in felt, and when the cylinder caps are on they are airtight. When the clothing has been placed inside and the cylinders closed, dry heat is forced through the pipes at a temperature of 180 degrees, and this is followed by moist heat raised to a temperature of 230 degrees. The pressure of from six to eight pounds put upon this steam heat is sufficient to force it through heavy mattresses or bundles of cloth-

After a period which varies from thirty minutes to an hour the cylinders are opened, the racks are run out, and the rapid evaporation which follows causes the clothing to dry almost immediately. The clothing is unharmed by this process, and the moist heat is a thorough germicidal agent. It is an interesting fact that if a freshly laundered linen shirt or collar is put into the cylinder it will emerge thoroughly, moist and apparently in need of another starching. The evaporation is so rapid, however, that it is immediately restored to its original condition, not even the gloss being removed.-Leslie's Monthly.

YOKOHAMA BY NIGHT. Lantern Illumination Makes the City

Akin to Fairyland. A row of paper lanterns in the black shadow of a wall is the first impression the newly arrived traveler has of Yokohama as he steps from his "sampan" on to the wharf at night

The lanterns hang low and almost motionless, but at the word "rickshaw" they begin to sway, and with a silent, almost rhythmical movement they come rushing toward him. A moment later he discovers that each lantern is attached to a rickshaw, which offers for less than half a yen an hour to convey him anywhere his fancy may lead him. But go where he will the lantern is always there, dangling and swaying

and dimly flashing.

The lantern on the rickshaw is a less, starlit sky, fanned by a soft breeze which seems half of the sea and like people gliding about everywhere. It hardly seems real. It isn't fairyland exactly, because fairies are not supposed to be always as picturesque as are these Japanese. Certain it is that few things anywhere in the round world can be more beautiful than lan-

tern lighted Yokohama. As the occidental crosses the bridge over the canal from the foreign quarter and enters the native city he sees a hewildering maze of lights. Through out Yokohama gas lamp posts are few and far between, a fact which makes the lantern illumination all the more cuous. They are not hung at regular heights or intervals, but make a sort of tangle of soft colored lights over the front of the buildings and even across the street.

He gave the driver of the break which daily ran to Au Sable Chasm \$50 in two weeks and feed the other servants with like recklessness. The guests of the hotel grew very indignant, because there was no getting along with the employees, who almost literally fought among themselves to minister to the needs of the English actor and sadly neglected the rest of the guests.

There is Danger and Teath in Imitations and Substitutes

YOU NEED THE GENUINE Paine's Celery Compound IF YOU EXPECT A CURE

See that you make no error or false and vigilance on your part are neces-sary to avoid the dangers of substitution and imitations.
Your case at this time demands the

est druggists. Paine's Celery Compound loosens bonds of disease; it enables the weak, rundown and emaciated victims to recuperate rapidly; it places them on

solid rock of health. No other medicine at the present day can so promptly banish the terrors of rheumatism and neuralgia; no other can so quickly overcome treacherous liver complaint and kidney disease, If you are a victim of blood diseases Paine's Celery Compound will purify and enrich your blood and make it course healthfully through the body. See that you get the genuine Paine's Celery Compound from your dealer; look for the name PAINE'S on the wrapper and bottle.

Some people only know by heresay that it is more blessed to give than to receive.

The profit of a gold mine depends, not on the amount of rock crushed under the stamps but upon the amount of gold which can be extracted from the rock. In a similar way the value of the food which is eaten does not depend on the quantity which taken into the stomach but upon the amount of nourishment extracted from it by the organs of nutrition and digestion. When these organs are diseased they fail to extract the nourishment in sufficient quantities to supply the needs of the several or-gans of the body, and these organs cannot work without nourishment. The result is heart trouble, liver trouble, and many another ailment. Pierce's Golden Medical Discovery acting on every organ of the dige tive and nutritive system, restores it to health and vigor. It cures disease remote from the stomach through the stomach in which they originated. "Golden Medical Discovery" contains neither alcohol nor narcotics.

IT WAS A PRETTY PISTOL.

But It Proved Too Expensive For "No, we don't keep a pistol in our

spartment any more," said the girl who draws for the magazines and shares a small flat with a young woman who teaches in one of the private schools; "not since an experience we had last winter. Before that we did. and we had a perfect beauty of a pistol, too," she added in a tone of regretmove if you are making efforts to rid yourself of disease. Attention, care, handle inlaid with pearl. "You see, this is what happened: I was the one who knew more about handling a pistol, so I used to sleep with it under my pillow. We were both awfully afraid of burglars, and after there had been a series of robberies in our neighborhood we were so terror stricken that we were ready to take alarm at the slightest sound. One night, to our horror, we were botharoused by a creaking noise and then a light bump, just as if some one, tiptoeing around, had stumbled against something. For an instant we were simply paralyzed with fright. Then, looking tremblingly about the room, I made out over in one corner a tall, dark figure, perfectly motionless. I reached cautiously for the pistol, aimed it and fired twice. The figure did not fall, and the horribly strange thing was that it did not move or make a sound. Yet

I felt sure I had hit it. "Although we were frightened half to death we felt we must get up and light the gas to investigate. By that time people from the other apartments in the building were rushing to our door to find out what the shots meant. Well, the light revealed matters. I had simply ruined Marian's new forty dollar coat which hung on a hook in that corner. The poise we heard? Oh, that was some one on the floor below who had come in late and stumbled against a chair.".

A FATAL MEAL

The Untimely Ending of a Crow Who

"Saw a curious thing in California last winter," said the man who travelels about. "I had stopped for a moment to chat with a man who was plowing, when he called my attention to a large centiped that he had just plowed up.

".'Come along with me a few feet," said he, 'and let's see what those crows will do when they find it.'

"We went on a few feet, and the crows followed. One big, black fellow soon saw the centiped and swallowed him at one gulp. Then, in the expressive slang of the day, there was some thing doing in the neighborhood of that crow. With a caw of despair he mounted into the air for perhaps a hundred feet, then fell heels over head till he was a few feet from the ground Then he managed to catch himself and flew upward again and away for the hills, cawing wildly. He had not gone more than 300 feet when he lost all control of himself and fell like a shot to the ground. We went over to where he had fallen and found him on his back with his feet in the air, stone
