

The Best Day of All

Farmers Come by Thousands to the Fair.

Yesterday's Attendance Estimated at Thirty Thousand People.

Early Morning Rain Couldn't Put a Dampener on the Fair.

Busy Day Among the Live Stock and Machinery—Parade of Prize Animals.

At doubts and misgivings regarding the success of the Western Fair of 1899 had vanished from the minds of the directors before noon yesterday. The early morning rain caused forebodings of failure, just as the gloomy prediction of melancholy misanthropes cast a shadow over the prospect before the fair opened. But the clouds broke, the sun shone forth gloriously, and the crowds came by tens of thousands. The actual figures are not to hand, but the attendance yesterday has been variously estimated by the officials at from 20,000 to 25,000. For the first time during the fair the unparalleled show of live stock and the display in machinery hall received yesterday the attention they deserved. It was Farmers' Day, and all parts of Western Ontario were generously represented. During the afternoon attractions in the ring there were 10,000 people on the covered and open stands, and they were not even missed from the grounds. In addition to the usual specialties before the grand stand, there was the annual parade of prize-winning animals, which took place at 2 o'clock. A number of photographs were taken of the prize stock in groups. The large company of vaudeville performers, who furnish the specialty programme every afternoon and evening, were also photographed together.

The rain in the evening kept thousands away, but thousands more braved the weather. There were 6,000 people on the grand stand in the evening. The full bill of attractions was run off, though the fireworks display had to be hastened somewhat.

THE RING ATTRACTIONS.

The attention of the thousands of people on the stands and of the multitude crowding around the fences was occupied during the afternoon by the horse races and special attractions. The latter were introduced by Arion (Jason C. Graham), the intrepid high wire artist. Mr. Graham is a young Canadian who has spent the past seven years giving exhibitions of his skill and daring in cities throughout the States and Canada. His home is in Owen Sound, the native place of Dixon and other world-renowned equilibrist. The powerful Herminette brothers, the marvelous Japanese jugglers and balancers; the accomplished young lady cornetist, Miss Lillian Bietsoe; the skillful Dundas family, the side-splitting six Senetts, the fighting caymen and thrilling hippodrome, were all in evidence. A novel feature on Mr. Cooke's bill was a race between a riderless horse and a horse and rider by jockey. The former led from start to finish, and covered the half-mile in 27½ seconds. The riderless horse and the chariot races were repeated, and proved as interesting as ever.

The Seventh Band was in its usual place, and presented a delightful programme.

SPEEDING.

There were six interesting debutantes in the farmers' trot and pace, Texas Jessie, owned and driven by Lewis Wigle, of Leamington, won first money. Guinette being her strongest competitor. Bobby B. made a good showing, and so did Dorcas, a 2-year-old, half-brother to the winner. The third heat was particularly interesting. The Leamington mare broke badly at the start and went far behind during the first quarter. Then she gained steadily, passing the bunch and obtaining a lead of a couple of lengths. Guinette made a nice start on the stretch, and cut Jessie's lead down to a nose. Summary:

Farmers' trot and pace; purse \$100: Texas Jessie, b. m., Lewis Wigle, Leamington, 1 2 1 1 Bobby B., ch. g., J. W. Hill, Fort Rowan, 1 4 4 4 Guinette, b. g., Charles Barrett, Parkhill, 3 2 2 2 Dorcas, b. g., Angus Wigle, Kingsville, 4 3 3 3 Nancy R. b. m., Minor Ramsden, Alvinston, 5 5 5 5 Tutti Frutti, b. m., Thompson Moore, Stratford, 6 6 6 6 Time—2:27½, 2:27½, 2:27½.

The 2:30 trot was won by Duke Sprague in three straight heats. Each heat was a procession. The Lambeth gray was too much of a clinch for the event to be worth extending. Summary: 2:30 trot; purse \$100: Duke Sprague, Dr. Routledge, Lambeth, 1 1 1 1 Alice, Wm. Pierce, 2 2 2 2 Gertrude, Dick Wing, 3 3 3 3 Standby, McAlpine, Alvinston, 4 dr Time—2:34½, 2:29½, 2:29½.

LADIES' WORKS.

The ladies' department has never shown to better advantage than it has this year. It is situated in the well-lighted wing adjoining the art gallery, where the work is displayed in a very artistic manner. Those in charge of the department have arranged it with an eye to ease and comfort. The heavy styles of work have been placed on long tables, on either side of the room. It consists of knitting, crocheting in wool, couching and certain classes of embroidery. Down the center of the room are set large glass cases, for the use and protection of the delicate displays. The work this year is of a more varied nature, and the exhibition is one of the largest ever seen at the Fair. On entering and turning to the left, one comes first to the fancy paper exhibits, paper flowers, shaving balls, etc.

Next comes knitting in wools and cottons, also crochet work in similar material. Under the first classification are included shawls, scarves, neckties, caps, afghans, socks, scarves, hoods, etc., while the crocheting embraces mats, dollies, scarves, hoods, slippers, collars, etc. Some of the knitting is particularly attractive, and was greatly admired. A beautiful crochet collar attracted much attention, and was rewarded with first prize.

There is a large number of entries in the embroidery on silk and linen. A lunch cloth, with poppy design, is the center of attraction, as is also a cloth, taking second prize, by a London lady. The designing is very elaborate in this section, and the work most skillfully and carefully done. The netting entries are numerous, and of great variety, and some patterns are marvels of daintiness. A large case full of sofa pillows of innumerable colors, designs and materials are set forth in tempting array. A pink satin skirt with an open-work lace design was awarded first prize. It is a beauty. There are many beautiful cases for holding tiny articles of dress, and pin cushions of every variety displayed. A number of embroidered photo frames, claimed much attention. The lace exhibit is quite up to the usual excellent standard. The quilts, blankets, and carpet-weavings are well represented, and afforded much pleasure to sightseers. A quilt containing the flags of all the different nations of the earth, worked with silk, attracting much attention than any other article in the room. There was a crowd continuously around it. The first prize ticket was attached to it.

THE DECORATED CHINA.

The display of hand-decorated china in the annex is much more effective this year than ever before, owing to the greater space devoted to this beautiful and interesting exhibit. The larger space has enabled Mr. J. A. Hain, superintendent of this department, to arrange the display to much greater advantage than last year. The most marked and gratifying improvement of the work shown is in the quality of the work shown. The designs are more beautiful and the work more delicately and artistically done. There are four tea sets, the first prize set, having beautiful roses on a pale green ground. There are two pretty exhibits of dessert plates, one with fruit and one with flower decorations. The former taking first prize, probably because, though the work appears to be equally well done on both, the fruit was considered a more appropriate decoration. The display of the decorations is always taken into consideration in awarding the prizes. The exhibit includes beautiful examples of raised paste, gold and enamel work, and a plain white dish with a dainty bonbon dish shows the raised paste and enamel work in combination. There are quite a number of superb punch-bowls and trays, one of the latter having most beautiful poppy decorations. Two jardinières, with roses and chrysanthemums, respectively, are very nice. There is also some very fine Dresden work. On the whole, the display is much the best ever shown here, and the department of decorated china promises to become one of the most important in the annex.

THE ART GALLERY.

The art annex is one of the chief objects of interest about the main building, and is continually thronged with visitors. There are more paintings and drawings shown this year than usual, but the work, on the whole, is not up to the standard. But there are some really good things and plenty of promise. The display is interesting. A large portrait and a garden scene by Miss Florence Carlyle, stand prominently forth for their excellence. Miss Carlyle's work is bold in execution and notable for clever coloring. Miss Carlyle shows some pleasing water colors and a few oil paintings. The display is most meritorious. Miss Farncombe has done some fine work in oils. Mr. C. Bridgman's copies in water colors are also excellent. The display of water colors is attractive, too, by S. K. Davidson's water colors. The pen and ink collection is large, and some clever work by Miss E. Fraser.

SHEEP.

Among the live stock there is none which attracts more attention than the sheep. Men, women and children of all classes manifest a keen interest in the gentle wool-bearers. Here and there about the long rows of pens there is always someone dabbling in the fleece. The sheep are in the best of health, and the display is decidedly the best and largest in the history of the fair. All classes show an increase. The Canadian farmer is devoting more attention to sheep raising, and the importers are more active than heretofore. Thirty exhibitors are represented by over 400 head. The Shropshires make the largest class, with 84 head, and the Oxford Downs come next with 63. There are 60 South Down, 41 Dorset Horned, 32 Cotswolds, 14 Leicester, 14 Lincoln, 14 Hampshire, and 53 fat sheep. Pens had to be built in the stockmen's pavilion to accommodate the extra number of exhibitors.

SWINE.

The number of swine shown this year is nearly double that at the Fair last year, and improvement is noticed in every class. Over 40 extra pens were hastily constructed adjoining the cattle pavilion to accommodate the increase. Chairman Brown, of the grounds and buildings committee, attended to the wants of the exhibitors promptly, and the stock-owners are grateful. The quality of the stock shown this year is especially fine. Tamworths are in the majority, there being 72 animals of this breed. The other classes are made up as follows: Yorkshires 41, Chester White 18, Poland China 35, Berkshire 67, Duroc 19, and other pure breeds 27.

FAIR NOTES.

Mr. Daniel Thody's valuable coach and team were driven to the horse stables early yesterday morning. The horse was valued at \$1,000. It was complained at yesterday's meeting of the directors that one exhibitor had taken a prize for millet that was imported; also that certain prize-winning barley and rye exhibits were samples, and that two other exhibits of corn and beans were

grown on the same farm, all of which is contrary to the rules. The complaints will be investigated. The Massey-Harris Company, Limited, has been awarded a special first prize for spring wheat.

Notable Exhibits.

MASSEY-HARRIS COMPANY, LIMITED.

As usual, we find this progressive company at the old stand in the agricultural implement building, where they exhibit a full line of their world-renowned machines. They have, as usual, their usual corps of courteous attendants to take care of the crowds of farmers visiting their stand. It has been the center of attraction in machinery hall, not only for the excellent finish of the machines shown, but for the very artistic manner in which their stand has been decorated. The exhibit is in charge of Mr. R. L. Smith, the company's courteous and genial general agent, of London. It is needless for us to comment at any length upon the reputation of this truly Canadian company, and indeed, it is needless to say there is not a farmer in the civilized world who has not heard of them, or even used the machines it makes, all of whom will bear testimony to the excellence of the machines, and the generous treatment always afforded its patrons. Farmers or the people generally do not stop to think what this great Canadian company has accomplished. It is at the present time employs over 3,000 Canadian workmen in its factories, earning nearly one million dollars in wages per annum, and indirectly employing thousands of other Canadians, who produce the raw material for its construction of their machines, so largely used by Canadian farmers, who reap the benefit of so truly a patriotic company. The motto of this company is "Canada for the Canadians," which is a motto well worthy of it and every other Canadian industry. We only wish that the same motto would be adopted by every farmer of this Dominion, who, if they would patronize home industries in place of foreign goods, would not only add much to their own interests, but to the Dominion of which they are part, and thus add to the number of Canadian employes, and to the national welfare of Canada. The Massey-Harris Company, we believe, export more machines to foreign countries than any other implement company in the world. Of this every true Canadian should be proud. They have built up a great record for Canada as a manufacturing country, and we are naturally proud of this Canadian farmer, because the company is able to employ hundreds more men, whose wages necessarily are paid to Canadian farmers for their produce.

This company is always foremost in the production of new machines, but never willing to put any machine on the market till it has been thoroughly tested.

Their New No. 4 Light Binder is a marvel of perfection. It has been thoroughly tested at home and abroad. Everyone who has bought and used it this year are exultant in their praises for their excellent work. It binds all kinds of crops and under all conditions. It is a beauty in appearance. It is very light in draft. It is easily handled, in fact, everyone uses it. It is not only the best binder, but it is the best and lightest draft binder they have ever used. We very strongly recommend it to every farmer. It is a binder for a binder until they have been waited upon by a representative of this Canadian concern, who will be pleased to explain the points of excellence of this new machine over any other.

We also learn that this is not the only new thing the company has to offer the Canadian farmer. The No. 7 Mower is now ready for the hay crop of 1900. Space will not permit of details, but the company's new catalogue, which will give a full description of this new mower, as well as of everything else they manufacture and supply, can be obtained either through the local agent of the district, or by mail upon application. This company is distributing at their exhibit a little Pocket Memo Book, containing lots of valuable information for the farmer, and we are glad to see this company has not forgotten the farmer's wife, as they have prepared a neatly gotten-up little book for her individual use, and which contains lots of hints for the household. This consideration of the part of the Massey-Harris Company we are sure will be appreciated by the ladies of the farm. We notice on the inside of the cover book the following suggestions to the farmers of Canada:

Support Home Industries. Employ Canadian labor. Keep your money in your own country. Build up the Dominion. Develop home markets.

Why buy foreign-made machines when better can be obtained at home? Why send your money to the foreign country to benefit your competitors in farm products? Why assist in developing foreign industries, when Canadian labor needs employment in your own country? We compliment this Canadian company upon its success at home and abroad, and we feel sure the patriotic suggestions will be appreciated and entered into by every truly loyal and patriotic Canadian.

A WONDERFUL PILE OF BEEF.

The leading attraction on the grounds is Fergus, the "natural" white ox, which weighs nearly 4,000 pounds, and stands six feet high. The huge animal is perfect in every line, and excited the admiration of thousands who paid him a visit today in his confinement. The several prominent butchers who have handled large beasts joined in saying they had never seen the like of Fergus before. Visitors will have one more chance to see this wonderful beast, and all should avail themselves of the opportunity.

THE STANLEY PIANOS.

"It touches the heart." The little heart-shaped card bearing this inscription is in almost universal evidence among the visitors to the Western Fair. It refers to the celebrated Stanley piano and is merely a terse and novel way of expressing the opinion of every lover of music who hears the Stanley. The beauty, symmetry, quality and genius about the Stanley. It possesses the subtle qualities of tone that elude description, but are instantly felt. An evidence of the popularity of the Stanley is shown in the fact that the entire exhibit at the Fair has been sold, and the firm are taking numerous orders for the Stanley. The Stanley piano is made by Mr. H. Wellington Burnett, of Toronto, who is assisting Mr. James Keenleyside, the local representative of the Stanley Manufacturing Company, as they have every reason to be gratified with business done during the Fair.

MANN MANUFACTURING COMPANY, BROCKVILLE.

The high reputation of the goods turned out by this enterprising firm has attracted hosts of friends from all over Canada, who were welcomed at the exhibit by H. McIntosh, the general Western Ontario representative, as-

MUNYON'S INHALER CURES CATARRH

Colds, Coughs, Hay Fever, Bronchitis, Asthma and all Diseases of the Throat and Lungs.

Clouds of medicated vapor are inhaled through the nostrils, and the inflamed and diseased parts which cannot be reached by medicine taken into the stomach.

It reaches the sore spots—it heats the raw places—it goes to the seat of the disease—it soothes and cures the inflamed system—\$3.00 a box, druggists or sent by mail.

11 ALBERT ST. - TORONTO.

Assisted by F. Bartram, Watford; R. J. Kerr, Arwood, Ont.; J. McArthur, Essex; D. J. McLehlan, Iowa; S. E. Caven, Kincardine, and J. Dumart, Zurich, general agents. A machine that attracts much attention is the giant Steel Pressure Combined Drill, which is easily adapted to working in heavy or light ground, being provided with a sliding working lever, by which the pressure can be changed from the under side of the lift bar to the top. When heavy ground is being worked the drills are held down by springs, while they float when the pressure is reversed. This is the only drill on the market embodying this principle, and it has been greatly admired by thousands of farmers who have called to examine its simple mechanism, by which the operator has the control of the machine. Several American farmers, greatly pleased with the principle of this drill, have placed their orders, which will be shipped at various points in the United States. Another very popular machine is their Giant Cultivator, which works in land through which the wheels of a horse or mule are impossible to travel. Three years ago one was purchased by the London City Council, and ever since has been used for ridding up macadam roads. It gives splendid results. Wide shear points for weed-cutting and summer fallow work are furnished, the adjustable being marked with numbers. Besides these two machines, the firm manufacture disk harrows, seeders, corn drills, harrows and cultivators, all of the high quality guaranteed by wide experience in catering to the needs of progressive farmers.

THE PETER HAMILTON IMPLEMENTS.

The history of the Peter Hamilton Manufacturing Company, the well-known implement firm, would include a very large share of the history of Peterboro, the thriving town where this important industry is one of the most important factors. The Peter Hamilton exhibit is attracting a great deal of attention. It is among the most varied and attractive in machinery hall. It includes binders, mowers, seed drills, straw and ensilage cutters, sulky rakes, cultivators, etc. It is necessary to describe those farm appliances in detail. Their superiority and uniform excellence is known everywhere throughout the Dominion. The highest praise on every side. The machine was fully tested, and next year it will be the firm's leading specialty. It is a heavy-duty machine, and yet will go through a 12-foot gate. It delivers grain in perfect order, even in the case of rye seven feet high. It is a heavy-duty machine, and yet it is driven from both ends of the axle, securing continuous feed. It is constructed so easily to handle it, that a boy can handle it. The Hamilton No. 7 ensilage and straw cutter, with reversible belt feed, is a perfect machine. It has a capacity of 10 tons of corn in eight minutes, and works equally well in long or short stuff. The blade is concave, insuring even cutting all along the blade. It is perfect in perfection, but perfection is no trifling matter. The motto which, faithfully followed for 33 years, has led the Peter Hamilton Manufacturing Company to success, and secured a reputation for reliability and honest dealing with the farming community.

ECONOMICAL STOVES.

The first outlay for a stove, the purchase price—is a small part of the expense that the stove entails. It is desirable that the purchase price be right; but that is not the sole consideration. The stove will save money in the long run is the most economical. The Peninsular Steel Oven Ranges and Baseburners are money-savers, and at the same time perform their functions perfectly. The Peninsular Range, with aerated oven, burns but half a ton of coal per month, running day and night. The exhibit includes the Preston Hot Water Boilers, and is one of the largest and most interesting in the main building. Owing to continual crowding about the exhibit some people may find it inconvenient to examine the ranges and heaters displayed, but they need not be disappointed. A visit to Thompson's Stove House, 424 Richmond street, will satisfy their curiosity.

HEINTZMAN & CO.

The old firm of Heintzman & Co. apparently find no difficulty in retaining the hold on the public which long years of patient striving toward perfection enabled them to obtain. The firm of the Heintzman & Co. Piano during the Fair have been larger than ever before. Throngs of satisfied customers have paused in passing to say pleasant words of praise. The prediction and to admire the new improvements. For Heintzman & Co. are never satisfied. They do not claim that perfection has been attained. They only know that no piano has ever been turned out of their factory that at the existing stage of piano manufacture could be excused. What ever long experience, brains, money and unremitting attention to even the minutest details can do in the way of producing a high-grade piano is done in the case of every Heintzman Piano put on the market. The London warehouses are in charge of Mr. J. A. Croden, at 27 Dundas street.

COPP BROS.' STOVES.

No other article in the furnishing of a modern household plays so important a part in making the home what a home ought to be—a place of comfort and brightness and cheer. Of the cooking range this is true the year round. The range is king of the kitchen. And the time is now at hand when the heater will be the center of attraction for many months. There need be no worry about the selection of a heater or a range. An examination of the display made by the Copp Bros. & Co. (Limited), of Hamilton, or a visit to the warehouses of J. C. Park, 661-663 Dundas street, London, where the heaters and the celebrated Copp Bros.' Stoves is kept, will settle this vexed question. Nothing can compare with the Aberdeen Heater, Copp Bros.' beautiful new base-burner, with its triple flue construction. Every stove, in fact every range and heater manufactured by the Copp Bros.

Co.—and the variety is the most comprehensive on the market—contains the highest obtainable degree of economy, comfort and beauty. (Continued on Page 6.)

Police Court.

James Watson was charged at the police court this morning, with having thrown a stone at a crowded street car on Dundas street, just east of English, last night.

Mr. McKillop asked for an adjournment of the case. "Call the witness," said the magistrate. "I wouldn't hold the prisoner without some evidence."

Detective Nickle, in answer to Mr. McKillop, stated that he saw the prisoner throw a stone at an electric car on Dundas street east at 9:35. The car was filled with passengers. The witness saw Watson throw and heard the stone strike the car. He arrested the prisoner on the spot.

The case was enlarged until Monday and bail was refused. Watson lives on the Hamilton road, and is a son of a house-mover. He, with two other young men, was standing around, and Detective Nickle decided to watch the trio. The detective kept within a few feet of the men, and alleges that when between English and Rectory streets, Watson deliberately carried a stone at a passing car. Nickle grabbed him, and Watson started to scuffle, when the officer drew his billy and felled Watson with a blow on the back of the head. The prisoner was then taken to the police station in the patrol.

Willis Moxley, charged with fighting at the Fair grounds, was discharged. John Ross was charged with letting his cow run at large. He was discharged.

John Doe, an insane youth, was taken in one of his father's rags and Robert Hueston was charged with fast driving. Case enlarged for a week. Charles Ryan spent last night in the jail for stealing into the Fair grounds. He was discharged.

John Delaney, John Boubly, Fred Freller, Thos. Blain and Edward Gladder, drunks, were discharged.

Wild With Eezema

For 12 Years She Suffered Terribly— Completely Cured by Three Boxes of

Dr. Chase's Ointment.

Mrs. R. Stoddard, Delhi, Norfolk county, Ont., writes as follows: "I was troubled with Eczema, or Salt Rheum, for over 12 years, and during that time doctored with different physicians, but found that they could only give temporary relief. I saw Dr. Chase's Ointment advertised, decided to try it, and before I had used half a box found great relief and change. Altogether, I have used three boxes, and am now completely cured. I have recommended it to my neighbors, and can say it is the best I have ever used, and in my estimation, worth its weight in gold."

That Dr. Chase's Ointment will cure any case of Eczema, Salt Rheum or itching skin is fully endorsed by the evidence of scores and hundreds of cured ones. Send for a box at all dealers, or Edmanston, Bates & Co., Toronto.

TILLSON FOR QUALITY.

Tillson's "Molina" Rolled Wheat, "Pan-Dried" Rolled Oats, Flaked Barley, "Gold Dust" Corn Meal and Graham Flour are Cereals of the highest quality there is or can be. They are the standards from which the quality of other Cereals are judged. "Just as good as Tillson's" is a phrase that some grocers use to induce people to buy weak imitations of the original Tillson quality.

The Tillson Co., Limited, Tillsonburg, Ont.

A Skin of Beauty is a Joy Forever. Dr. Felix Conrad's Oriental Cream or Magical Beautifier. Removes tan, pimples, freckles, moths, patches, rash and skin diseases, and every blemish on beauty, and defies detection. It has stood the test of 50 years and is so harmless we taste it to be sure it is properly made. Accept no counterfeits of similar name. Dr. L. A. Sayre sold to a lady of the haut ton (a patient). "As you ladies will use them I recommend Gourd's Cream as the least harmful of all the skin preparations."

Also Poudre Subtile removes superfluous hair without injury to the skin.

Dr. L. A. Sayre, Prop., 37 Great Jones street, New York.

For sale by all druggists and Fancy Goods Dealers throughout the United States, Canada and Europe.
