DOMINION ALLIANCE MEMBERS ARE TALKING OF THIRD PARTY

Deputation To Wait On the Leaders of Both Parties To Secure Their Views on Question—Whitney Government's Laxity In Enforcing License Laws Condemned.

Toronto, Feb. 13. — "Greetings to members of Dominion Alliance assembled at Massey Hall tonight. The greatness of the nation rests largely upon the well-ordered homes of the people, and in no land is the word 'home' more sacred than in Canada. The devotion in which it is held by all classes alike makes for the temperance which honorably distinguishes Canada among the countries of the world. Happily your work to promote the great cause is more favorably regarded than that of similar bodies in other lands. It is a work well worthy of earnest endeavor, and I wish you every success.—Strathcona."

The above cablegram from Lord Strathcona, in London, to Joseph Gibson, president of the Ontario branch of the Dominion Alliance, was read tonight in Massey Hall at the public mass meeting of the Dominion Congress and Ontario Alliance.

At the afternoon session a deputation was appointed to wait upon the Ontario Government and the leader of the Opposition to find out the attitude of their respective parties on

temperance issues. Ex-Controller Spence, of Toronto, advocated the formation of a strong prohibition party in Ontario, in case neither the present parties would adopt prohibition.

Condemnation of the lax manner in which the liquor license law is enforced by the Whitney Government, especially in Northern Ontario, was expressed in the annual report of the executive committee of the Ontario branch.

The executive have been asked to consider the question of getting legislation to place the making of gifts of liquor in local option municipalities on the same standing as sales.

At the afternoon session a resolution was introduced requesting the Provincial Government and the Dominion authorities to act in conjunction to suppress the manufacture and sale of liquor in the outlying portions of the Province.

A resolution to have the Government license stopping places in local option districts, the same as in municipalities, where liquor is sold, and another for the placing of provincial candidates in the field, are to be considered.

young people. The Provincial Union has fixed that fee at one dollar, but many women of the elder societies consider that is rather heavy for the young ladies, and already have asked the Provincial Union to reduce the amount required to fifty cents. Pending their decision, the London Union resolved to ask only the latter fee.

It was decided that the week of prayer, postponed on account of the Dominion Alliance convention, be held instead on March 12, 14 and 15.

The topic for March 12 will therefore be taken up at the next meeting, Feb. 27.

Miss Garrett, the Young Woman's Christian Temperance Union provincial secretary, was then introduced, and addressed those present.

Miss Garrett is the happy possessor of a charming personality, a very sweet voice, and an eloquent and ready address. Her persuasive powers are, doubtless, largely due to the intense earnestness felt by her with regard to her work in her chosen field of God's labor.

"VERY UTOPIAN," SAYS MR. GLAUBITZ
Dispatch Regarding Growing Vegetables Does Not Impress Him.

"Very Utopian," is the way General Glaubitz, of the water commission, characterized the dispatch which stated that vegetable growers in the vicinity of Chatham would increase their output greatly by warming the earth with electricity.

The telegram stated further that a Toronto syndicate had purchased a large tract of land in Kent County to test the experiment.

"That may come in the future, but it is some distance away yet," said Mr. Glaubitz. "The idea is very utopian, to say the least. Electricity will increase the productivity of plants, there is no question of that, but that happens where the current by repeated explosions, of the nature of lightning, but infinitely smaller, as can be seen near wireless stations, increase the supply of hydrogen, a plant food, but the heating proposition is something different. I know nothing whatever about it."

THE GROCERS' GUILD ELECTS EXECUTIVE

Address by E. F. B. Johnston, K. C., and Papers on Trade Matters.

Toronto, Feb. 14. — The Dominion Wholesale Grocers' Guild concluded its annual convention yesterday afternoon with a long business session, which, aside from the election of officers for the coming year, was entirely devoted to matters of internal economy in the trade. The methods and objects of the Canadian Credit Men's Association formed the subject of a lengthy treatise by Mr. W. J. Ball, secretary of the newly formed Ontario branch of the organization. The meeting went on record in respect to the latter address, with a resolution strongly recommending the advantage of the credit exchange to all members of the guild.

Mr. Fred T. Smye's paper, which embodied a plea for more complete organization of the guild than at present existing, "The house that wavers," he said, "is the food on which the crooked house feeds, and often destroys the whole structure. Let us move away from cliques that are crooked to the hills of original thought. Don't try to undermine your rival; it only comes home to you."

Mr. H. C. Beckett, of Hamilton, spoke on "Loyalty to Manufacturers," which he interpreted as referring to manufacturers who did the right thing by their customers. A prolonged discussion of the contract which is annually presented for

DEPARTMENT OF ART FOR INDUSTRIAL SCHOOL

Classes Will Be Held on Monday and Thursday in Alexandra School.

A department of art and design has been added to the local Industrial School, and classes will be held on Monday and Thursday evenings. This decision has been reached by the committee in charge, and students will be enrolled by Principal Beal at once. The need of an art school has long been felt. Not since the old Ontario School of Art and Design, conducted by the late John R. Peel, has there been such an institution. This school did much for the young people of London, and many of its graduates are today successful commercial artists and designers. The demand for the latter has enormously increased in the past few years, but London has no school from which to supply the demand. Since the opening of the Industrial School Principal Beal has had so many inquiries that it was decided to open classes. The first session will be held on Monday evening next. There will be courses in freehand, perspective, plain and color shading, and plain and color design. Those who wish instruction on these subjects should communicate at once with Mr. Beal. The committee have secured Mr. David Wilkie to instruct the class. He is a graduate of the South Kensington Art School, of London, Eng., and also spent some time in Paris in this work. All the other departments of the Industrial school are well filled, and keen interest is being taken in the work by the students.
