Phone 32, RUGGLES BLOCK

It would be difficult to imagine Nova Scotia without its efficient telephone system, so intimate and necessary a part of the Province's commercial, social and official life has the telephone become.

Why should not the people of Nova Scotia supply the necessary capital required from time to time to extend and improve their own telephone system?

Why should not every telephone subscriber be a telephone shareholder?

Why should the people of other Provinces, or the United States, or England supply the money for our service and control this great Public Utility, when we can easily finance it ourselves? We Nova Scotians already supply the earnings—why not also supply the Capital?

Full information to interested parties regarding this company's new issue of 7% stock, with earnings stabilized by legislation, will be gladly furnished on application.
