No. 2.

Emergency Food

Panopepton contains all the nutritive elements of beef and wheat in an absolutely non-coagulable form, and the organic and inorganic savory stimulant principles, all in their normal association and of standardised, high nutritive balance of proteins to carbohydrates.

Panopepton, therefore, possesses peculiar properties and advantages over any natural or other artificial food, and is so signally successful in serious straits that it is especially worthy of regard as an "emergency" food of wonderfully restorative properties.

A complete description of PANOPEPTON, its composition and the method by which it is prepared, will be sent gratis to any physician.
