

# THERAPEUTIC NOTES.

## INFECTIOUS DISEASES.

As the kidneys are the most active channel of elimination, not only of leucomaines and ptomaines, but also the micro-organisms of infectious and other diseases, it is specially important that elimination be constantly favored by the administration of a soothing and healing diuretic resolvent. This indication is met by administering sanmetto in teaspoonful doses four times a day. This explains why this remedy is so valuable as adjuvant treatment in la grippe, scarlet fever, gonorrhœa and other diseases.

## VARICOSE ULCERS.

The following has been used with great success in cases of varicose ulcers: The patient is put to bed for two or three days, then the leg is shaved and scrubbed and zinc oxide powder applied; if ulcer is large, put an extra layer of the powder and gauze over it; then paint leg with the following: White gelatine, 150 parts; zinc oxide, pulv. 150 parts; glycerine, 250 parts; distilled water,

450 parts; and apply bandage, then the paint again until there are three layers of paint and two of bandage. Take temperature and if it is normal do not disturb for two or three weeks. This splint is found to be most comfortable (and to far surpass any elastic stocking), and the patient may go around his ordinary work without its being injurious, as long as there is no temperature.—*Canadian Nurse*.
