

Syrup Cocillana COMPOUND

EACH FLUIDOUNCE CONTAINS:
 Tinct. Euphorbia Pulifera, 120 minims. Syrup Squill Compound, 24 minims.
 Syrup Wild Lettuce, 120 minims. Cascaria (P. D. & Co.), 8 grains.
 Tincture Cocillana, 40 minims. Heroin hydrochloride, 6-84 grains.
 Dose, $\frac{1}{2}$ to 1 fluidrachm. Menthol, 8-100 grain.

SYRUP COCILLANA COMPOUND offers to the practitioner of medicine a safe, and efficient agent for the treatment of the various catarrhal affections of the respiratory tract for which he is commonly called upon to prescribe. This **NEW LAXATIVE EXPECTORANT**, the name of which, by the way, does not suggest its therapeutic application to the patient, is of especial value in the treatment of both acute and chronic bronchitis, particularly when the secretions are scanty and hard to expel. *Give it a trial—it will please you.*

Supplied in 16-fl.-oz. and $\frac{1}{2}$ -imp.-gal. bottles.

Lactone

TO MAKE DELICIOUS BUTTERMILK.

Put a quart of pure, fresh, cold milk in a pitcher. Add one-third of a quart of hot water. Put in a pinch of salt. Crumble in a **LACTONE TABLET**, stirring well into the milk. Cover and set in a warm place for 24 to 48 hours. Put the fermented milk into an ice box or other cool place. When cold it is ready for use. Stir well before serving.

LACTONE TABLETS contain pure cultures of selected lactic-acid germs. When added to sweet milk, as directed above, they cause lactic-acid fermentation, the result being a buttermilk of finest flavor—more nutritious than dairymen's buttermilk because containing all of the butter-fat of the milk.

LACTONE BUTTERMILK, either as a beverage or as a food for invalids, convalescents and infants, may be prescribed with perfect confidence.

Lactone Tablets—bottles of 25.
