The Electric MAN-TRAP

A criminal cuts his chance of a get-away down to nearly zero when he goes up against this new improvement in Police Signal Apparatus.

He might as well put his foot in an automatic trap as try to beat a good Police Department that employs the

for efficiency

GAMEWELL
POLICE SIGNAL
SYSTEM

The Westmount News

POLICE SIGNAL SYSTEM PROVES SUCCESSFUL

That the local police signal system is a most useful accessory to the local force, was proved recently when constable Gorman made his sensational capture of Edward J. Gault, who was the victim of the theft, phoned to the police office giving a description of the man who had just taken her purse. Inside of three minutes this description had been phoned to every available police station. At 11 o'clock the man had been captured and was locked in the station cells.

All this through the signal system, which was installed in 1912 by the Northern Electric Co. It comprises twelve boxes at various points throughout the city. Each box is equipped with a telephone, a light and a bell.

Each man since his headquarters every time he passes a box. In the station the reader requires the year, month, date, time and number of the signal in order to get the man.

Northern Electric

Gamewell Police Alarm System

He needs an hour for his get-away—this system gives him about three seconds. Because not only can the patrolmen call the Station but the station calls all the patrolmen. Twice as efficient as the old systems.

Write our nearest house for full particulars.
