

III. Industrialization

All efforts should be made by the international community to take measures to encourage the industrialization of the developing countries, and, to this end:

(a) The developed countries should respond favourably, within the framework of their official aid as well as international financial institutions, to the requests of developing countries for the financing of industrial projects;

(b) The developed countries should encourage investors to finance industrial production projects, particularly export-oriented production, in developing countries, in agreement with the latter and within the context of their laws and regulations;

(c) With a view to bringing about a new international economic structure which should increase the share of the developing countries in world industrial production, the developed countries and the agencies of the United Nations system, in co-operation with the developing countries, should contribute to setting up new industrial capacities including raw materials and commodity-transforming facilities as a matter of priority in the developing countries that produce those raw materials and commodities;

(d) The international community should continue and expand, with the aid of the developed countries and the international institutions, the operational and instruction-oriented technical assistance programmes, including vocational training and management development of national personnel of the developing countries, in the light of their special development requirements.

IV. Transfer of technology

All efforts should be made:

(a) To formulate an international code of conduct for the transfer of technology corresponding to needs and conditions prevalent in developing countries;

(b) To give access on improved terms to modern technology and to adapt that technology, as appropriate, to specific economic, social and ecological conditions and varying stages of development in developing countries;

(c) To expand significantly the assistance from developed to developing countries in research and development programmes and in the creation of suitable indigenous technology;

(d) To adapt commercial practices governing transfer of technology to the requirements of the developing countries and to prevent abuse of the rights of sellers;
