- OSI
  On-Site Inspection
      SN: Refers to a verification method that involves the
          physical presence of foreign or international
          inspectors on the territory of the inspected country.
          This term includes discussion of the following types of
          inspections: general, selective, progressive/zonal,
          intrusive, non-intrusive, obligatory and non-obligatory
          means of on-site inspection, challenge inspections,
          short notice inspections and suspect-site inspections.
