

ACTION PLAN: OBJECTIVE ONE - ECONOMIC GROWTH AND PROSPERITY

ACTION	MILESTONE INDICATORS
Work for progress in particular on methyl bromide advanced phase-out dates under the Montreal Protocol.	Phase-out dates for methyl bromide agreed as 2015 for developing countries and 2005 for others with interim cuts
Participate in negotiation of a Biosafety Protocol under Biodiversity Convention to ensure the safe (in terms of biodiversity) transboundary movement of living modified organisms.	Target date for the international community is an agreement by the end of 1998

ACTION PLAN - ISSUE 1E

Using * Team Canada and other appropriate initiatives to promote the development, effective transfer and application of innovative sustainable technologies, including technology exchanges and the export of Canadian knowledge, products, expertise and services.

ACTION	MILESTONE INDICATORS
Examine the extent to which Canadian satellite imaging/mapping expertise and other applied environmental technologies and equipment can be utilized to support global sustainable development goals and objectives.	Examination complete and decision taken by close of 1998

ACTION PLAN - ISSUE 1F

Working to ensure that export development and financing mechanisms support sustainable development objectives while ensuring a level playing field for Canadian exporters and their international competitors.

ACTION	MILESTONE INDICATORS
Work with the Department of Finance, within the OECD Export Credits Group to establish a multilateral regime that will address environmental aspects of projects financed with official export credits, that would be equally binding on all export credit agencies.	Specific proposals presented at Export Credits Group meetings by close of 1997

* Team Canada is a partnership between business and federal, provincial/territorial and municipal governments to help Canadians increase their global trade.
