

## MEXICO

### Key Energy and Environmental Data (1989 data)

|                                                           |                         |
|-----------------------------------------------------------|-------------------------|
| TPES                                                      | 103.5 Mtoe              |
| % Non-OECD TPES                                           | 2.84                    |
| % Total World TPES                                        | 1.40                    |
| Per Capita TPES                                           | 1.22 toe per person     |
| TPES/GDP                                                  | 0.61 toe/1000 US\$ 1985 |
| Per Capita TFC                                            | 1.00 toe per person     |
| TFC/GDP                                                   | 0.50 toe/1000 US\$ 1985 |
| Energy related CO <sub>2</sub> emissions per capita       | 0.93 t carbon/person    |
| Energy related CO <sub>2</sub> emissions per unit GDP     | 0.46 t carbon/1000 US\$ |
| % Total energy related Non-OECD CO <sub>2</sub> emissions | 2.56                    |
| % Total energy related World CO <sub>2</sub> emissions    | 1.34                    |
| % Population growth (yearly average growth 1980-1989)     | 2.17                    |
