This Table shews the time of high water ashore, of which circumstance all masters of vessels ought to be well aware when they remove their vessels from one place to another; but the ebbing continues three quarters of an hour in the Channel.

RULE. Having found the age of the moon at the top of each month in the Calendar, look in the left column of the table for the day from new to the full moon, then in the right column the day from the full to the new moon, and in the middle column you will find the time when it is high water ashore.

Times of High Water, on the days of New & Full Moon, at different places of the River St. Lawrence.

At Seven Isles	1 h	Tadoussac	2 $\frac{3}{4}$ h
At Caouy	1 $\frac{1}{4}$	Pot à l'eau de vie	3 $\frac{1}{4}$
