Oliver D. Schock, Hamburg, Pennsylvania, April, 1888. No information.

G. S. Lamborn, Liberty Square, Pennsylvania, February 9, 1888. Has seven specimens of hard brown sandstone, black trap, quartzite, gray and black jasper. Surface finds from the banks of rivers and in plowed fields. No duplicates.

George S. Lamborn, Liberty Square, Pennsylvania, February 7, 1889. Since writing last has come in possession of a stone implement—very hard—of ash color, with small end somewhat broken. Inclosed a sketch. The dotted lines were probably the original edge, tolerably sharp. The outside lines were drawn looking at it the broad way; the inside are looking against the edge. The sketch is full size. He has never before seen one like it. It was found at McCall's Ferry, Lancaster County, Pennsylvania.

Rev. W. M. Taylor, Mount Jackson, Pennsylvania, April 12, 1888. Has but few rude implements. Will look for some this summer.

Norman Spang, Etna, Pennsylvania, February 6, 1888. Has had many hundreds.

F. W. Brown, Glen Rock, Pennsylvania, February 7, 1888. Has none and knows of none.

C. John Hexamer, 419 Walnut street, Philadelphia, Pennsylvania, February 7, 1888. Has none.

S. H. Zabm, Lancaster, Pennsylvania, February 27, 1888. Has six hundred rude implements, principally of gray stone or trap rock, white quartz, jasper, and flint, found on the banks of the Susquehanna River and in plowed fields in Pennsylvania and Maryland, and in Florida on the banks of a lake, associated with arrow and spear points, axes, etc. Deposit seemed accidental. Has some which he would exchange for objects not in his collection.

George H. Clapp, Pittsburgh, Pennsylvania, February 7, 1888. Has thirty of argillite and flint, found on the surface in the Ohio River Valley, 13 miles below Pittsburgh, associated with chips and finished arrow and spear heads. Deposit seemed accidental.

I. S. Gelst, secretary Natural History Lyceum, Marietta, Pennsylvania. (No date.) Has none.

J. D. McGuire, Ellicott City, Maryland, February 9, 1888. Has about three hundred of quartz or quartzite, found on the Eastern Branch Potomac River, District of Columbia; Patuxent River near Relay, Baltimore and Ohio Railroad, Maryland; South River Neck, Anne Arundel County, Maryland, and a few from his farm, Howard County, Maryland. Found on surface at high flood-line of these streams. Has a cache of twenty from Anne Arundel County. Ten feet away was another cache. One cache of one hundred; one of twenty-six. All of the cache implements found near oyster-shell heaps.

MEM.—May not these belong to the prehistoric man who made the shell heaps? There are believed to have been two epochs of prehistoric culture represented in the kjoekemoddings of Denmark. The shell heaps of America should be carefully examined for evidences of paleolithic man or for an earlier epoch than the neolithic period.

O. N. Bryan, Marshall Hall, Maryland, February 23, 1888. Sent a large number to the Smithsonian Institution last spring.

E. Stanley Gary, Baltimore, Maryland, February 6, 1888. No information.

Otis Bigelow, Avenel, Maryland, February 8, 1888. Has already deposited his collection in the Smithsonian Institution. Knows of workshop on the Mattaponi in Goochland, Caroline County, Virginia.

Alexander C. Black, Army Medical Museum, Washington, District of Columbia, February 10, 1888. Has none. Has given all his specimens to the Smithsonian Institution. All were surface finds from Randolph County, Indiana. Never found in mounds.

Allert S. Gatchet, Washington, District of Columbia, February 7, 1888. Has none. Sends lists of museums in Switzerland.
