MARCH 25TH.

Advice from Superintendent Gauthier states that the shaft is now 94 feet deep, that drifting will commence at the 100-foot level, and that he expects to soon be bagging ore for shipment. Supt. NOW 15 CENTS PER SHARE.

SILVER BIRD is surrounded by the greatest producing mines in the Cobalt District. SILVER BIRD is absolutely inside property, consisting of twenty acres (patented), being the west half of the northeast quarter of the north half of Lot 3, Concession 6, Coleman.

SILVER BIRD is a mine in full operation, with two 25 h.p. boilers, steam hoist, steam drills and all machinery and buildings necessary

SILVER BIRD is working two shifts and is in full operation both day and night, sinking upon three veins and in the same formations identically as in the O'Brien, Timmins and Right of Way mines and lying immediately between these mines and the Green-Meehan, Red Rock, Cobalt Contact and Nipissing Extension. The veins are broadening out and are increasing in values with depth, now 94 feet in shaft.

SILVER BIRD has no indebtedness; there are no incumbrances against the property or stock of the company. The capitalization of The Silver Bird Cobalt Mines, Limited, is but \$1,500,000.00, par value of the shares \$1.00 each, fully paid and non-assessable, and no personal liability, with 500,000 shares in the treasury. The first allotment is now offered to the public for subscription at 15 cents per share. Considering the inside location of the property, development done, results obtained, low capitalization and the large amount of shares

in the treasury, this is unquestionably one of the best bargains (if not the greatest bargain) that have been offered in Cobalt mining shares.
