## LEAD PRICES HELP SLOCAN

London Companies Forming to Handle  
British Columbia Mines.

English Noblemen Put in Their Money—  
Nickel in the Kootenay Country—  
Star Has Paid \$20,000 in Dividends—  
How the Figures Stand—The Trout Lake  
Region Has Attraction—C. Mining  
News.

"There is," says the London, Eng.  
Journal of Commerce, "a mining  
activity in the Dominion of Canada  
at the present moment than ever be-  
fore. Finer actual results have been  
realized in the past season than have  
most sanguine miners dared to hope  
for. In a host of widely separated  
districts—the Selkirk River, the Lake  
of the Woods, and above all in Kootenay  
—mining has been carried beyond the  
experimental stage. Each year the  
country has its bonanza mines, properties  
of indisputable value, making large  
and regular returns to their owners.  
Any one of them may be safely cap-  
italized for the London market at mil-  
lions of dollars."

Advance in Lead Will Help Slocan.  
The recently announced advance of  
5 cents in the price of lead, from 10  
cents to 15 cents, is a most impor-  
tant item. The United States should materially  
increase the value of the Slocan  
mining district. Its galena ore, which  
carries a large percentage of lead, should  
be now more valuable than ever.

## NICKEL IN KOOTENAY.

Rich sample of Gerdorfite lead to have  
been found near Kootenay.  
Mr. R. G. McConnell of the Dominion  
Geological Survey has written Martin  
King, manager of the Trail Mining  
Company, as follows:

Ottawa, Ont., March 4.  
Martin King, Esq., Roseland, B.C.  
Dear Sir: One of the specimens of  
your last fall while looking over the  
Columbia-Kootenay mine contains  
gerdorfite, a rich nickel ore, and it  
is possible your ore contains a nickel  
value worth considering. I would be  
much obliged if you would express an  
opinion on the nickel value of your  
ore. At our change five pounds or so of your  
ore will be sent to me for analysis. We have  
not enough material on hand for the pur-  
pose, and will send a copy of the  
result when completed.

Yours sincerely,  
R. G. McConnell.  
Geological Survey Department.  
Gerdorfite is a high grade nickel  
ore, closely resembling arsenopyrite  
in color. It assays about 20 per cent  
in nickel when pure. Nickel is worth  
at the smelter about the same as cop-  
per, though its value when refined is  
more than twice as great.

## \$350,000 IN DIVIDENDS.

What the Famous Slocan Star Has Already  
Paid Its Shareholders.

The last dividend of five cents per  
share declared by the owners of the  
Slocan Star has been paid. The amount  
thus paid since August, 1895, up to  
the present time, is \$350,000. In 1895  
\$100,000 was paid and in 1896 \$250,000.  
In order to receive the dividend the  
idea of the receipts and expenditures  
of the greatest dividend-paying mine  
in British Columbia has been made  
the subject of an annual statement just issued.

## REVIVAL OF SILVER MINING

Indications of It West of  
Port Arthur.

## OLD MINES CLEARED AGAIN

And Foreign Capital Will Be Used to  
Take Out the Ores.

Two Hundred Thousand Dollars Offered  
for the Kabanagh Property Through  
Which the Hammond-Folger Reef Line  
—Steamers for the Lake of the Woods—  
Clifford Sifton in Luck—General  
Ontario Mining News.

Judging from all indications there is  
to be a revival of silver mining in the  
district west of Port Arthur.  
Some time ago the Rabbit Mountain  
mine was cleared of water and in-  
spected by Messrs. Ahn and Hay, the well-  
known mining men, for a French com-  
pany, which company is now negotiat-  
ing for the purchase of the property.  
And now The Algoma Herald makes  
the announcement that the east end  
Silver Mountain mine is to be worked.  
The old Liverpool company worked in  
the property extensively for several years  
and met with a great measure of suc-  
cess. The mine was closed in 1895, but  
rather being desirous of awaiting de-  
velopments, but it is claimed he has  
been successful in his efforts.

Yesterday Mr. Ames brought to the  
city a number of samples of free-mil-  
ling ore, which were analyzed by the  
gold in the ore. If it should be demon-  
strated conclusively that large deposits  
of this kind exist in the district, the  
large amount of gold in the ore, which  
is now being mined, would be a great  
asset to the district. The mine was  
closed in 1895, but rather being desirous  
of awaiting developments, but it is  
claimed he has been successful in his  
efforts.

For some weeks back Mr. A. L. Mc-  
Ewen, the former manager of the En-  
glish company, and still later their agent  
in this country, has been in negotia-  
tion with a company of capitalists of  
Cedar Rapids, Iowa, who desired  
to buy the East End property. The  
negotiations went smoothly and the  
company was formed. The first pay-  
ment was made on Friday morning  
last, and the company is now in the  
process of organizing.

## ENGLISH NOBLES

Becoming Interested in Some of British  
Columbia's Rich Gold Mines.

British capitalists, many of them  
titled, are interesting themselves in  
British Columbia mines. One of the  
first to be interested was Mr. Grant  
Govan, who formerly had a large  
interest in the Kootenay mines. He  
has now returned to England, and  
has been succeeded by Mr. J. H. Mac-  
donald, who is a member of the House  
of Commons. Mr. Macdonald is a  
member of the House of Commons, and  
has been interested in the Kootenay  
mines for some time.

## \$200,000 OFFERED.

Big Figure Bid for the Kabanagh Property  
on New Bill Lake.

It is understood that Pittsburgh cap-  
italists, who wish to mine on the  
Hammond-Folger Reef property on  
Saw Bill Lake, have offered \$200,000  
for the property. The offer is being  
considered by the Dominion Geologi-  
cal Survey, and it is expected that the  
property will be sold to the highest  
bidder.

## MILD WEATHER

At Last Portage Interfering With the  
Transportation of Machinery and Supplies.

The mild weather is breaking up the  
roads around Rat Portage, and should  
bring about a speedy resumption of  
the work. The weather has been so  
warm that the roads are now in a  
state of disrepair, and the work is  
being delayed. It is expected that the  
work will be resumed in a few days.

## LOTS OF STEAMERS.

It appears as if there will be any  
number of new steamers plying the  
waters of the Lake of the Woods this  
coming summer. First of all there is  
the new steamer "Cayah," which is  
being built at Rat Portage. It is  
expected that it will be ready for  
service in the summer of 1897.

## LEGISLATURE CALLED UPON TO DISAPPROVE

of the Englewood Land Grab.

Says The Rat Portage Miner: The  
provincial government has been called  
upon to disapprove of the Englewood  
land grab. The government has been  
called upon to disapprove of the  
land grab, and it is expected that  
the government will do so.

## THE BISHOP OF MONTREAL.

The Bishop of Montreal, who has  
been in the city for some time, has  
been very successful in his efforts to  
raise money for the poor. He has  
been very successful in his efforts to  
raise money for the poor, and it is  
expected that he will continue to do  
so.

## THE BISHOP OF MONTREAL.

The Bishop of Montreal, who has  
been in the city for some time, has  
been very successful in his efforts to  
raise money for the poor. He has  
been very successful in his efforts to  
raise money for the poor, and it is  
expected that he will continue to do  
so.

## THE BISHOP OF MONTREAL.

The Bishop of Montreal, who has  
been in the city for some time, has  
been very successful in his efforts to  
raise money for the poor. He has  
been very successful in his efforts to  
raise money for the poor, and it is  
expected that he will continue to do  
so.

been in the city for some time, has  
been very successful in his efforts to  
raise money for the poor. He has  
been very successful in his efforts to  
raise money for the poor, and it is  
expected that he will continue to do  
so.

## THE BISHOP OF MONTREAL.

The Bishop of Montreal, who has  
been in the city for some time, has  
been very successful in his efforts to  
raise money for the poor. He has  
been very successful in his efforts to  
raise money for the poor, and it is  
expected that he will continue to do  
so.

## THE TORONTO WORLD

none of it has been milled as yet. As-  
says that have been made, however,  
show that the value is about \$1.50  
per ton. As it costs more than \$3.50  
per ton to mine and that this ore  
seems to be a handsome margin of  
profit. Messrs. E. L. Sawyer &  
Co., Limited, Chas. E. Bell, and  
others, are now working on the prop-  
erty, and it is expected that they will  
be able to all who apply for it.

## MID-EAST ONTARIO.

Frontenac County Gold—What is Going on  
Down in Eastern  
Kingston, Ont.

During the past six months as many  
as 150 samples of gold-bearing quartz  
mined in Frontenac County have been  
brought into the city. This is doubt-  
less news to a large number of citi-  
zens, but it is nevertheless a matter  
of no great importance. This number  
of thousands have been known to have  
been exhibited in the city, but cer-  
tainly by those who have no knowl-  
edge on the subject. The samples were  
contained in small portions of gold-  
bearing quartz, and it is expected that  
they will be able to all who apply for it.

## TORONTO MINING AGENCY.

30 Yonge Street. Tel. 2502.  
All B.C. mining stocks at lowest prices. Send name and address for our weekly market report.

## REVISED THEIR DECISION.

Private Bills Committee Expires Their  
From a Dilemma and Treats  
All Alike.

The Private Bills Committee yester-  
day found itself face to face with a  
difficult problem. The committee had  
to decide whether or not to pass the  
bill authorizing the municipalities of  
Drayton and Kempenfelt to be re-  
ported subject to the petitioners  
having obtained a two-thirds majority  
of the voters. Yesterday the commit-  
tee passed the bill relating to a bonus  
by the town of Thorold, subject to  
the voters. The committee also passed  
the bill relating to a bonus by the town  
of Thorold, subject to the voters. The  
committee also passed the bill relating  
to a bonus by the town of Thorold, subject  
to the voters.

## TREAT ALL ALIKE.

Chairman Gibson expressed the  
opinion that in the case of Drayton,  
where only three or four votes were  
lacking to give the necessary two-  
thirds vote, it would be a hardship  
to give them an opportunity of again  
appearing before the committee. The  
committee decided to treat all alike,  
and to do so the other bills should  
be considered.

## THE QUEEN'S OWN.

List of Those Who Have Just Been Granted  
Sergeants' and Corporals' Certificates.

The following appears in the reg-  
imental orders issued by Major Del-  
more, commanding the regiment:  
Sergeants' certificates—These having  
been granted to the following: J. H. Mac-  
donald, 1st class; J. H. Macdonald, 2nd  
class; J. H. Macdonald, 3rd class; J. H.  
Macdonald, 4th class; J. H. Macdonald,  
5th class; J. H. Macdonald, 6th class;
