## LEADING AUTHORITIES NOW SHOW JUST WHAT TAN-LAC REALLY IS

Physiological Action of Principal Ingredients of Celebrated Medicine on the Human System is Explained.

SUPREMACY CLAIMS WELL SUPPORTED

Many of the Medicinal Elements Have Been Known and Used Since Civilization First Began.

Tan-lac, the celebrated medicine which has been accomplishing such remarkable results throughout this country and Canada, is composed of the most beneficial roots and herbs known to science. The formula is purely ethical and complies with all National and State Pure Food and Drug Laws. Altogether, there are ten ingredients in Tan-lac, each of which is of recognized therapeutic value. Many of these ingredients have been individually known and used since civilization first began, and some of them have been used and prescribed by leading physicians everywhere, but until they were brought together in proper proportion and association, as in the Tan-lac formula, humanity had not heretofore realized their full value and effect.

In referring to one of the more important ingredients of Tan-lac, the Encyclopedia Britannica says: "It has been the source of the most valuable tonic medicines that have ever been discovered." In referring to others of the general tonic drugs contained in Tan-lac, the 18th Edition of Potter's Therapeutics, a standard medical text book, states that "They impart general tone and strength to the entire system, including all organs and tissues."

This same well-known authority, in describing the physiological action of

the morning sermon spoke of the life of St. Joseph.

In Dr. Morrison's Pulpit. Owing to the illness of Rev. Dr. Morrison, the morning service in the First Baptist church, yesterday, was conducted by Rev. Robert Crisp and the evening service was conducted by William Brindley. Dr. Morrison is recovering from an attack of grippe.

## BALLIN DEAD; HE SHOT HIMSELF

Danish Chief of Industry Was German-Born and Was on Allies' Blacklist.

Copenhagen, April 11.—M. J. Ballin, one of the foremost figures in Danish industry, died early today, as a result of a self-inflicted bullet wound. Ballin, who was a native of Germany, was very proud of the industrial concerns of Ballin's Sonner, of which he was the chief spirit, and was reputed to have spent his private fortune in a vain attempt to prevent the decay of the stock of the company, which was quoted at sixty today against 320 in 1918.

In consequence of his German sympathies, Ballin was prominently named on the Allied "blacklist" during the war.

WIRELESS TELEPHONES

AMAZE THE SAVAGES

London, March 26.—(Associated Press, by Mail).—Natives of the Swad tribe who inhabit the mountainous wilds of Africa were dumbfounded recently at wireless telephone experiments, according to a Marconi official.

The natives refused to believe it was possible to communicate vocally over long distances, and were given an opportunity to listen in on wireless conversations.

On hearing the voices, the tribesmen, among whom were a number of petty chiefs, hurried away and held an "indaba." Presently a deputation returned and asked if there was to be a white man's war. "If there is," he said, "I want to be on the white man's side."

A MUSICAL TREAT.

A musical treat was provided in the vestry of the Wellington row synagogue last night for the large gathering which met under the auspices of the Hebrew Literary Society with Max Marcus, the president, in the chair. Sol. Karsnow, a native of Galicia, Poland, was a gradu-

ate of the Vienna conservatoire and a virtuoso wizard as a violinist, was the star performer. He was assisted in an excellent recital programme by Miss Belle Andur, soprano soloist, and by Bayard Currie, pianist. Mr. Karsnow and his mother have lately arrived from Europe and will make their home in St. John with A. L. Stearns, who is Mrs. Karsnow's brother. The chief essay of the evening was given by Dr. A. Sporn on the "Jew in Medicine."
