

BISHOP BALDWIN HAS PASSED AWAY

His Lordship Never Regained Consciousness and Slept Peacefully From Time Into Eternity.

London, Oct. 26.—The Bishop of Huron passed to rest at five minutes to eleven o'clock last night. He had been sinking perceptibly during the day. His Lordship never regained consciousness, sleeping peacefully away into the eternal rest he had earned so well.

The funeral arrangements are very simple. There will be no lying in state at the cathedral. The funeral service will be at 8:30 o'clock on Saturday morning at St. Paul's Cathedral, following which the body will be taken on the 10:20 G. T. R. train to Toronto, where interment will be made at St. James' Cemetery.

A LIFE OF SAINTED USEFULNESS
Maurice Scollard Baldwin was born in Toronto sixty-eight years ago last June. He was a son of the late John Spread Baldwin, whose family had for generations been intimately connected with the early political history of this Province.

Soon after he graduated from Trinity in 1866 he came to London, joining the brilliant coterie of young clerics whom the late Bishop Cronyn, first bishop of the Diocese of Huron, was gathering about him. It is noticeable that of the young men who formed this band of workers in the diocese, less than five rose to be Bishops of the Canadian church, these being Bishop Baldwin, Sullivan, the late Bishop of Algoma, who wore himself out in his noble work in that great diocese; Curran, the present incumbent; Bishop of Montreal, one of the most eloquent men in the Canadian church to-day; Dumoulin, the present well-known Bishop of Niagara, and McLean, the late Bishop of Saskatchewan.

The late Bishop Baldwin was ordained a deacon by Bishop Cronyn on April 1st, 1869, and was the next day set to work with that earnest and intense zeal for souls that always characterized his gently and devoted life. His first charge was as a curate under the late Rev. Dr. St. George Guelph, rector of the diocese, and the charge including Christ church, Westminster, Lambeth and Byron. On June 30th, 1871, the year following, he was ordained a priest, and after a brief absence from the diocese was given, in 1872, charge of St. Paul's church, Port Dover. In 1873 he was stationed at Christ church, Port Stanley, but in the year following was back at Port Dover again.

It was in 1873, the year following his appointment to the deanery of Christ church cathedral, that the Synod of the Diocese of Huron offered the Bishopric to him. His eager mind grasped and appreciated to the full the multitudinous opportunities for master service as the head of one of the largest of the dioceses in Canada, and he left his Montreal duties to take up the many cares and heavy responsibilities inevitable to him who becomes Bishop of Huron. It was on the 18th of October that he was elected to be Bishop and on November 30th of that year—St. Andrew's Day—he was consecrated to eleven o'clock last night. He had been sinking perceptibly during the day. His Lordship never regained consciousness, sleeping peacefully away into the eternal rest he had earned so well.

His Lordship never regained consciousness, sleeping peacefully away into the eternal rest he had earned so well. All the members of the family were at the bedside. The funeral arrangements are very simple. There will be no lying in state at the cathedral. The funeral service will be at 8:30 o'clock on Saturday morning at St. Paul's Cathedral, following which the body will be taken on the 10:20 G. T. LIBERAL RALLY AT FOLDEN'S

Rousing Speeches in Support of the Candidature of Mr. Malcolm S. Schell—Meeting Largely Attended.

(From Friday's Daily)

The Hall at Folden's Corners was last night the scene of a magnificent meeting in the interests of Mr. Malcolm S. Schell, the Liberal Candidate for South Oxford. Old-time enthusiasts received most attentive hearings and the pointed, telling arguments advanced in dealing with the strength of the Laurier administration were enthusiastically applauded. It was a meeting that could not fail to fill every follower of the Liberal cause with confidence as to the result of the approaching contest in this constituency.

The candidate, Mr. Schell, was not present, he being engaged in addressing the electors at Tillsonburg. The meeting, however, could not have been more enthusiastically had he been present. The Opposition were conspicuously absent. It was in progress an invitation was extended to Opposition speakers but there was no response.

Mr. Willard Thomas was in the chair. The speakers were Mr. Mr. Stephen Noxon, Mr. J. A. Kneal, Mr. Millington, Mr. M. J. Comiskey and Dr. McKay.

The most important political issues of the day were dealt with by the several speakers. Mr. Noxon was received with prolonged applause. In his opening remarks Mr. Noxon said "The wheel has taken another turn and brought us face to face with a political contest in this riding. The result is in your hands. It depends upon you, the zeal with which you enter the contest and the way in which you mark your ballots. The result is more momentous than any other in our history. It is a contest of issues at stake now which will depend upon the result of this election as to what these issues will be. It is for the electors of this riding to ask themselves what has been the result, and what the chances of greatness of the Government that has been in power and are now asking you for a renewal of your confidence to carry out the important schemes laid down by them. We have the power so to say, and when the same schemes of greatness are put to the test of this country. Such a change had taken place in the trade of the country, and the Government that it was upon a basis that was satisfactory to all interested. The manufacturers had been encouraged and the country had taken a new lease of life.

Teaching upon the tariff question Mr. Noxon said "The Liberal Government had looked fairly into both sides of the question. They have reduced duties in many instances on the necessities of life and at the same time they have given manufacturers protection and the Liberal Government, that it was upon a basis that was satisfactory to all interested. The manufacturers had been encouraged and the country had taken a new lease of life.

On behalf of the candidate, Mr. Kneal said, "Gentlemen, you have looked forward to sending a farmer to parliament. We have that man. Give us your hand in friendship and help us to elect one of the brightest young men of this riding." A voice, "That's what we'll do."

Mr. Millington, the next speaker, referred to the agricultural industry as an one which depended on the success and he emphasized the great advancement that had been made in this respect in the eight years that the Liberals had been in power. The speaker also dealt with the Grand Trunk Pacific project heartily endorsing the action of the Government.

Mr. M. J. Comiskey gave a forceful and comprehensive speech on the financial record of the Liberal administration. He called attention to the giant strides that had been made in building up Canada during the last eight years and showed by statistics that the public debt during that period had been reduced over a million dollars.

SKELETON OF A MAMMOTH FOUND

It Was Discovered By Men Employed on the Double Tracking on the G.T.R.

(From Friday's Daily)

Workmen employed on the double tracking of the G.T.R. near Dundas yesterday came across the skeleton of an enormous mammoth. Unfortunately the skeleton was broken in being taken from the ground, and a portion of it was carted away. The major portion of it was preserved, however, and will likely be presented to the Dundas museum by the Hamilton Scientific association. One of the tusks is over nine feet from tip to tip, and the teeth are almost as large as a man's wrist. W. O. Johnson, a railway contractor, is now in possession of the find. He brought a small piece of one of the tusks and one of the teeth to the city this morning to show his friends—Hamilton Spectator.

OXFORD TEACHERS CONVENTION

Forty-Fourth Session of Oxford Teachers' Institute Being Held at Woodstock.

(From Friday's Daily)

The forty-fourth session of the Oxford Teachers' Institute met yesterday in the Town Hall at Woodstock, and is being continued there to-day, about one hundred and fifty of the teachers of the county are present and an especially interesting programme is being provided. Owing to the recent addition of Nature Study to the public school course by the regulations of the Department, and to the fact that this subject is a new one to most of the teachers, it has been made a special feature of the institute by the committee in charge of the programme. The committee Dr. Muldrew, head of the Macdonald institute at Guelph, to deal with the subject. The sudden and lamented death of Dr. Muldrew, a few weeks ago, compelled a change. This subject was taken in hand by several of the public school teachers, by Mr. Cole of the Woodstock Collegiate Institute and by Inspector Carlyle, in the forenoon. Mr. Hastings of Whitmer, and Mr. J. A. McMillan of Woodstock, discussed in a practical manner, how they had taken up the subject with their pupils. As our readers may know, this subject includes the study of common things about us, as flowers, plants, weeds, trees, birds, animals, minerals, the soil, the air, the human body, etc. The great aim of the skilful teacher is to open the eyes of the child to what is about him, to give him habits of observation and reflection, and to instil in him a love of nature. It is surprising how blind most of us are to the world of nature about us and how little we really know about even the common things. The boys and girls of the future will be taught to have their eyes open, both physically and mentally, to this wonderful world in which God has placed us.

The talk of the two gentlemen mentioned above was intensely practical and hence instructive to those of their fellow-teachers who may not have had their advanced training in which God has placed us. The talk of the two gentlemen mentioned above was intensely practical and hence instructive to those of their fellow-teachers who may not have had their advanced training in which God has placed us.

DOUBLE TRACK IS NOW BEING USED

Freights Running Over G.T.R.'s New Line East of London—Days of Activity.

(London Advertiser)

While remembering the great West, its need for railways and the grand scheme that is going to be carried out by the G.T.R. in this matter, it is not, one should not overlook the fact that old Ontario herself is making great headway. Our progress is not so phenomenal, but it is just as sure as that of the Northwest, just think of what industry, what activity, what returns, lately published, with regard to the increase in the population and assessment of London for the past year. A steady buying of real estate is going on all over Ontario, and the railways are not idle. Right here in London we are seeing the activity of the railways, following up the ever-increasing demand for freight and passenger accommodation. The double-tracking of the G. T. R. between this city and Hamilton is being rapidly completed. The new track is now being used by freight trains between here and Portchester, and between Copetown and Hamilton. The line will be ready for use between here and Woodstock in a few days. Then there are the projects lines between Toronto and Northern points, the demand for a union station here the new interswitch, which will shortly be built, Ontario's iron highways are active.
