Crow Contraction of the contract

was through and support that this admir-sympathy and support that this admirinstitution was tounded, not more had yet made its appearance in our than half-a-dozen years ago. The midst, and as a result, the attendance than half-a-dozen years ago, the minust, and as a result, the attendance importance to the British Empire of the was extraordinary, the whole of London widespread and far-reaching studies and blossoming forth in all its finery. The widespread and far-reaching studies and researches of the members of this school need handly be emphasized. But too much emphasis cannot be put on the work achieved by the institution, not-work achieved by the institution, not-work achieved by the institution, not-tor institution in all its finery. The superlative attraction of the 'exhibition this year is the piece in the Empress the-atre, called "With the Fleet." There have been many fine shows at Earl's withstanding the fact that its financial court, but none to equal this trip down resources were not munificent by any the Meditteranean on a full blown cruismeans. In the educational field it has trained over 500 students, not merely by kept in full man-a'-war style, and the lectures, but by actual demonstration of illusion of the moving scenery, coupled the plagues and fevers which annually with the firing of guns, etc., the moveravage tropical countries, and are the ments and drilling of the Jack Tars and scourge of the white man who has to marines is complete. It was voted on spend his life in these parts of the globe. every hand a triumph of delightful en-Though the school so far is but in the | tertainment. beginning of its scientific enquiries into tropical diseases, it has already shown

how much the future will yield. Mr. Chamberlain's appeal for funds to carry on this great work should meet with an mmediate and generous response. The increasing shortage of officers in the army and the fact that resignations are

becoming more frequent every day, has given rise to much comment recently, and seeing that there are 4,000 gaps in the regular and auxiliary forces, it is time the war office accepted the problem as one to be solved before any other. It is well known that this deficiency has steadily growing, and what is still better known is the fact that there is no chance of an increase in the number of officers under present conditions. For a tan. number of years the object of those in authority has been seemingly to increase the officer's work without mending his pay-an object that is hardly likely either to attract new candidates or to encour-age old ones. If soldiering is made too irksome for the rich man he will give it up; and on the other hand, the inadequacy of the pay makes it practically impossible for the poor man. An illustration of the truth of this is to be found in the case of Capt. Ronald Birch, Norfolk Regiment, who recently appeared in the Colchester Bankruptcy court. This young officer had risen from the ranks and he explained to the court that his present insolvent condition was due to the fact that he could not meet

It was through Mr. Chamberlain's active memory and support that this admirdining rooms after former favorites of the boards—"Nellie Farren," "Kate Vaughan" and "Fred Leslie."

The return of the King to London and the reassembling of parliament was the signal for the opening of the London sea-son, and those "in the swim" have begun to take their yearly plunge into the tide of gaieties. The opera is in full swing, with a distinguished audience to witness each performance. The park, too, is crowded with fashionable throngs in the afternoon, both walking and driving, as also in the morning, when well known and prominent figures in the political and social world may be seen taking an early canter in the Row. The sudden change in the weather, from bleak winds and rain to bright; warm sunshine is re sponsible for an unusual amount of outdoor activity, and the traffic in the re

The declarations made by Mr. Balfour gions of Reget street, Bond street and in his speech on the subject of our nasurrounding neighborhoods is such as to tional defence, which has been so anxiappal even stoutest-hearted policeman. ously looked forward to, were such as to set at rest the mind of the most con-throwing aside for the nonce her wonted throwing aside for the nonce her wonted firmed pessimist with regard to the danstaidness of demeanor, and hansoms gers from invasion of this country. tingle past, motors whirr onward and The Prime Minister's statements were high-stepping carriage horses dash along so emphatic that they quite dispelled the through our West End thoroughfares. giving a pleasant air of bustle and exfavorite bogeys of the scaremongers, which have been kept so prominently becitement to our sober Lonon streets that fore our eyes, during the past few months. It is hardly too much to exmost successful of the novelties in the glove line will be, one is inclined to think,

heads of the 10 masts 10 cars hang by steel pendants 50 feet long; and as the whole structure rotates the 10 cars fly outwards and attain a diameter of 150 feet or more as may be desired. This great machine is to be erected and operated in a most conspicuous posi-tion at the Portland fair. If has been built from the plans of Jas. K. Rebbeck, insulting engineer and inspector of the ork, who is the constructive designer of the machine, R. H. Casswell, of Vanouver, being the patentee.

Although many intricasies of construction are involved great simplicity has been attained, and the ease and rapidity with which the machine may be completely dismantled and re-erected is con spicuous. Sixty people may sit in the pendant cars and be swung through the "Kate air at 30 miles an hour, while 60 more less venturesome may take seats on The platform.

On Saturday afternoon a most satisfactory trial was carried out by Messrs. Bullen and staff at their works, everything working to perfection. Every man engaged on the construction vied with his neighbors for first seat in the swinging cars, all being enthusiastic and con-fident of results. The work has been well carried out, and is a credit to all concerned, and bids fair to be a most accessful venture.

"BRITISH COLUMBIA WEEK"

Will Be Special Feature of Big Exposition at Portland.

There will be a "British Columbia week" at the Portland exposition commencing on Monday, July 3rd, and ending on Saturday, July 8th. The attention of British Columbians is drawn to this feature in the following correspondence communicated to the provincial press by Hon. F. J. Fulton:

> Provincial Secretary's Office. Victoria, May 30th, 1905.

Sir :-- I enclose herewith a copy of a letter addressed to His Honor the Lieutenant-Governor by the president of the Lewis & Clark Centennial Exposition. You will observe that the letter states that the exposition management has set apart the period commencing Monday, July 3rd, and ending Saturday, July 8th. as British Columbia week. As this will be of interest to a recognized forms in either boots or great number of people in the province, it gloves is not eagerly adopted. The new has occurred to me that the best way of long gloves have inserts of rare lace to bringing it to their notice will be through the elbows, and superb embroideries on the newspapers, and I would therefore ask suede and kid; jewels even are occasion-ally introduced for ornamentation. There in your columns, so that it may be brought are also new designs in suede and kid to the attention of your readers and the mittens, but these cannot be said to be al- I residents of your neighborhood. I have the honor to be, sir, your obedient

FRED. J. FULTON,

Provincial Secretary. Office of the President,

Portland, Ore., April 17th, 1905. r H. G. Joly de Lotbiniere, Lieutenant-Governor of British Columbia, Victoria, B. C.:

Dear Sir :- On behalf of the Lewis & lark Centennial Exposition, I take pleasure in stating that, with a view of doing honor

tation charges. Paralleling to the west the Arlington to the great province of British Columbia and organizing a systematic movement by vein along its whole course through the Arlington, Speculator and Mabou groups, which the people of the various communities in the province can, in substantial numis the Neepawa lode which is similar i bers, arrange to visit and enjoy the manifold educational advantages and other at- character to the Arlington, varying in width from 7 to 15 feet. tractions at the exposition, the exposition The Enterprise vein has a more east management has decided to set apart the erly and westerly course. It runs through the Enterprise south and west period commencing Monday, July 3rd, and ending Saturday, July 8th, as "British Colin two veins converging on the Mabou umbia Week." Separate days in the week ground, joins with the Arlington and in can be designated by municipalities of the

can be designated by municipalities of the province for their respective special cele-brations at the exposition. A "Dominion of Canada Day" has already been arranged for Saturday. July 1st. If this plan meets with your approval we three to five feet in width for Saturday, July 1st. It will be gathered that the Mabou.

would request the issuance by you of a proclamation a month in advance of the Mabou, which consists of three claims, the Mabou, Oro and Ohio, together with the
