

P. E. I. LIBERALS READY FOR BATTLE

Rousing Convention at Charlottetown

J. J. Hughes, M.P. Chosen
Standard Bearer
Again

F. B. Carvell, E. M. MacDonald
and the Candidate Make
Stirring Speeches, Showing
Up the Short Comings and
Iniquities of the Borden
Government.

Charlottetown, P. E. I., July 22.—J. J. Hughes, M.P., Liberal federal representative for Kings, was unanimously re-nominated today at a convention marked by a record attendance and great enthusiasm. Mr. Hughes accepted the nomination in a stirring speech and the feeling which dominated the audience was shown, when in response for an expression of their desire to help him win a clean, honest election, the audience rose, cheering, to their feet. Kings county may be depended on to return Hughes by a larger majority than ever the last election.

Resolutions were passed condemning the Borden policy, denouncing the rule in the strong terms, approving the action taken by the federal bill, expressing confidence in Sir Wilfrid Laurier and his naval policy and in Mr. Hughes. The local government came in for strong condemnation, and the federal government was urged to enforce the prohibition law, which was passed by the Liberals, and received severe censure.

The large hall was too small to hold the great throng who came to attend the public meeting in the afternoon. The speakers were E. M. MacDonald, M.P., Pictou; F. B. Carvell, M.P., Woodstock; and Mr. Hughes.

Mr. MacDonald dealt first with the tariff question, claiming the government was afraid to change the tariff, and the increase of freight rates on the I. C. R. and P. E. I. Railway, the desire of Mr. Cochrane to make the maritime provinces the milk cows of the dominion, and the gift of \$150,000 to Mackenzie & Mann.

The appointment of a commission to investigate the fisheries was scathingly scored by this able parliamentarian. He then turned to the part of his speech to the battle on naval policy, exposing the inconsistency and vacillating conduct of Borden, and pointing out that the federal government had allowed to be delivered to the consumer the naval policy that had introduced by Sir Wilfrid Laurier, which meant the revival of the decadent shipbuilding industry in the maritime provinces.

The laws governing the sale of milk in this city, this official said, if lived up to, would be the means of insuring a pure milk supply. He then turned to the question of the fisheries, and every vendor, whether he be a producer of a shop keeper, is compelled to procure a license before he can sell milk. He said he was a shop keeper, and he would keep the milk in an earthen jar.

Yearly visits are made by the inspectors of the board of health to the farms where milk is produced and the license is granted a vendor until the report of the inspection of his place is received from the inspector.

Need Laboratory. Speaking with The Telegraph last night, one of the leading officials of the board of health said that two things were necessary in order to improve the supply here. A permanent inspector, or a visit by the board of health, was pointed to visit the places of all vendors, both in and out of the city, at all seasons of the year, and take samples of the milk, which would be submitted to the board for examination. This, however, necessitate the establishment of a laboratory, which could not be procured for the money now available.

Mr. Carvell dealt first with the trade question, showing the government was showing that the government was responsible for withholding the grant to the provinces this year.

Mr. Carvell struck a responsive chord among the farmers and fishermen, who composed nine-tenths of the audience, when he dwelt on the subject of getting access to American markets. Even the proposed reduction of tariff by the United States will give a measure of relief, but not to the extent as if reciprocity had passed and Canada's products given a monopoly of the American market, whereas now all the world will get a share of the reduction or the abolition of duties.

He scored the protection policy and declared himself in favor of a fifty per cent increase in the British preference. In dealing at some length with the naval issue, he pointed out that Mr. Hughes showed there was a lack of interest in the navy. He said that the navy was a great applause he showed that the action of the Tory government in seeking to have ships built without tender was a great mistake. He said that the navy was a great mistake. He said that the navy was a great mistake. He said that the navy was a great mistake.

Board of Health Official Says
Supply Not Perfect Until
This Is Done

MORE INSPECTORS
Frequent and Unexpected Visits to
Farms Patronized by Vendors Should
Be Made—Infant Mortality Not
High However and Nothing Radically
Wrong with Present Supply.

Wednesday, July 24. The question of establishing a municipal milk department in the city, as outlined in The Telegraph last week has been the cause of a great deal of discussion in regard to its practicability and advantages and although the idea has been expressed that the scheme would not do much to reduce the mortality, especially among children, a board of health official said yesterday that the system of milk supply would likely be continued under existing circumstances.

TERRIBLE HOLOCAUST IN OVERHAUL FACTORY

125 Employees Were Cut Off From Escape

Many Jumped From Windows
and Were Either Killed or
Injured, Whilst Others
Mounted Fire Escapes Only
to be Roasted by Flames
That Enveloped Them—
Fifty in Hospitals.

Binghamton, N. Y., July 22.—Fifty persons were killed, according to late estimates and as many injured, a dozen of them mortally, in a fire which swept the four-story factory building of the Binghamton Clothing Company this afternoon. The victims were chiefly women and girls.

Early tonight twenty-two bodies have been recovered. In the city hospital and in private institutions are thirty injured. Some two score persons are known to have escaped, as by a miracle, from the burning building. The fire broke out in a room where a large quantity of clothing was being stored. The fire spread rapidly and the building was completely destroyed.

"BOMB" MAILED CARNEGIE LOADED WITH CHEESE

"Internal Machine" Taken to a Vacant Lot by New York
Officials and the Zinc Case Riddled with Bullets Before
Nature of the Contents Became Known—Odor of a Real
Scotch Cheese Finally Permeated the Atmosphere and
the Alarm Was Over.

New York, July 22.—The mystery of the "bomb" which somebody sent to the Carnegie Corporation, in care of the secretary of the Carnegie Corporation, who promptly turned it over to the police, was solved today. It was a Scotch cheese, enclosed in a small-proof case of zinc—a Scotch cheese, according to a cheese expert, called into conference after the bureau had definitely determined that the "bomb" contained neither nitro-glycerine, dynamite or any other explosive.

The cheese was returned to the Carnegie Corporation tonight, resembling more the Swiss product than the Scotch. Shaughnessy Sees No Breakers

Sir Thomas Says Money
Stringency is Due
to Bankers

With Fine Crop Prospects,
Rush of Settlers and Great
Amount of Work in Hand
and so be Started There is
No Reason to Fear a Trade
Depression in the Dominion

Montreal, July 22.—Sir Thomas, Shaughnessy, president of the C. P. R., in an interview today asserted that the present economic situation in the dominion is by no means such as to give cause for anxiety and that he fully expects conditions to be quite normal again in the late fall.

"It cannot be denied," said Sir Thomas, "that in some lines there is not so active as it was a year ago. Banks are not encouraging investment in unproductive real estate by loaning money in that direction.

"Our Canadian banks realize their responsibilities as financial guides and guardians, and just now they are taking a conservative attitude, which is both wise and timely. Likewise bankers in other countries, when there is a war feeling in the air, they are strengthening their reserves, and I think that at the present time our banks are very strong in their reserves. So the situation in that respect is sound.

"The existing general scarcity of money, or rather the high rate of interest demanded by lenders, have necessarily had the effect of restricting the issue of municipal and other securities and there has been a consequent falling off in the amount of public work that is being done.

"But this state of affairs is merely temporary, due almost wholly to exogenous causes, and I can see no real reason for anxiety. The general trade of the country is very active, and I am sure that the conditions will be quite normal again in the late fall.

"You tell me that in some quarters gloomy prophecies are being made to the effect that there is likely to be a serious financial trouble in the autumn, but for my part, I have no fear of any trouble this autumn, and I cannot see any reason why there should be any.

"People who are talking about Canada's reckless expenditure, asserting that she is unwarrantably pledging her future and that a crisis is imminent do not, I think, realize just what they are talking about. During the past few years, we have had a very good year, with a fair crop, we have every reason to expect that conditions will be quite normal again in the late fall.

"Sir Thomas Optimistic. Sir Thomas made it clear that there is no need to anticipate anything in the nature of an economic crisis in Canada. That the banks and other interests concerned have a very good year in hand, and expressed the belief that the fact that his company had recently decided to spend \$100,000,000 on extensions and improvements in the railway during the next few years was a sign of the confidence and a steady effect.

"The tide of immigration is greater this year than ever," said Sir Thomas, "and this is another encouraging feature. We are fortunate in getting a better class of immigrants than the United States got in their early days. The United States had to look to the United Kingdom and the continent of Europe for their new population, whereas we, in addition to that fact, have the United States as well and the people we are getting from the United States are among the best coming to us, especially for farming purposes.

"All these who came to Canada from over the border are most welcome, whether they be farmers or manufacturers, and I do not think that those who have come to us in the past have had cause to regret their coming. Canada, in short, is still a comparatively new field, and the situation is well calculated to be productive in the future, and the general situation is quite healthy."

Dorchester, N. B., July 21.—The funeral of the late Mrs. Amelia Tingley took place from her residence here Saturday afternoon at 2:30 p. m. The funeral service was held at the house and was conducted by the Rev. B. H. Thomas, assisted by the Rev. James Gage, pastor of the Methodist church, and the Rev. R. A. Robinson, rector of Trinity church. A united choir composed of members of the Baptist and Trinity churches rendered the music. Mrs. B. H. Thomas and W. A. Palmer sang The Last Chord during the service. Interment was made in the upper Dorchester cemetery.

CHIEF RIDEOUT TELLS HIS STORY IN REID CASE

Girl Held for Infanticide Told
Officer Employed in Case
That She Had Given Child
to a Mr. and Mrs. McKilpin
in Dufferin Hotel.

Wednesday, July 23. Chief Rideout testified yesterday afternoon in the preliminary hearing of the infanticide case against Violet Reid. The prisoner was then remanded to jail for the space of one week, when other witnesses will be heard. The one witness was on the stand for a good part of the afternoon, and his evidence constituted the bulk of the case.

Chief Rideout outlined his connection with the case. About May 23, after being engaged by the attorney-general, he started to work the matter, clearing up the mystery surrounding the finding of the dead baby at Fredericton Junction. The following day he visited the Reid home and talked to the accused, and he was told that she had given the child to a Mr. and Mrs. McKilpin in Dufferin Hotel.

ARE THERE MANY SUCH PEOPLE IN THE WORLD?

An instance of diabolical cruelty and flagrant disregard for the laws protective of game out of the world was given Sunday at Magog, when two young men, whose identity will be learned in time, heartlessly shot down a young male deer that innocently grazed in a field along the road.

The deer was a beautiful specimen of its kind and was a welcome visitor to the residents along the road. Daily and seemingly without fear it came and browsed in the fields and was watched in its movements by numbers of the children of the neighborhood. It came for the last time Sunday and unfortunately sought an out patch where it nibbled the stalks, and was seen by two young men, who, thinking it rare sport, ruthlessly shot it down.

A. M. Clarke, who witnessed the deed, gave chase to the young men, and, leaving the slain animal wallowing in its life's blood on the ground, although they made good their retreat Sunday it is thought that they will be easily found when necessary, and made pay for their cruel sport.

The deer was not the only animal to be killed. The deer was not the only animal to be killed. The deer was not the only animal to be killed. The deer was not the only animal to be killed. The deer was not the only animal to be killed.
