NOVEMBER.—Of breeding stock for the dairy, Mr. Nimmo, who flourishes near Napanee, says, he had thorough-bred Ayrshires, and short-horns, but he believed the best breed for the dairy was obtained by crossing common Canadian cows with thorough-bred Durhams. He deprecates pure-bred for the Dairy, and recommends crosses of thorough-breeds of good milking families, or the best milkers of common Canadian cows. Mr. Nimmo has had much experience in raising stock. A cross between a good native cow and a pure-bred Durham, and then crossed with an Ayrshire produced excellent milkers. He had seven cows which yielded 7,800 pounds of milk during 1870. Cows must have plenty of good food and an abundance of good water. One cow well fed and cared for, is better than three poorly treated.
