

# DE LAVAL SEPARATOR

When all's said and done, the fact sticks out like a bump on a log, that a dairy without a *De Laval Cream Separator* is on the limp. 500,000 users is some and means much.

COWANSVILLE, QUE.

**What the Creamery Superintendent says of the U.S. Separator**

"Within the past two years I became a convert to the farm separator system. I did so because I investigated that system and the quality of cream made under it. Most of the farmers in this section use the U.S., and I find that on these farms much greater interest is taken in the success of the dairy. When we started this creamery we determined to equip it with the best of modern machinery, and we selected U.S. Separators for our patrons. When I looked into the farm separating system I found the U.S. by far the best separator—producing more and better cream than any other machine. I encourage this system all I can—it is the best for the farmers, and do not hesitate to tell them to get the U.S. if they want the best results for the least work. It is practical, the closest skimmer, holds the World's record with an average of .0138 of 1% for 50 consecutive runs. The cream runs so even and smooth, we maintain a high even quality of product—a great point for the Creamery."

For Manitoba and the West we transfer our Separators from Chicago and Minneapolis, and for Eastern Provinces from Quebec, Sherbrooke, Montreal and Hamilton.

VERMONT FARM MACHINE CO., Bellows Falls, Vt.
